Tinnitus Retraining Therapy Paweł J. Jastreboff 2006-10-30 Tinnitus and oversensitivity to sound are common and affect tens of millions of people. The prevalence of tinnitus has been estimated at between 25 and 40% of the population in industrialized countries. Tinnitus Retraining Therapy (TRT) is a treatment that aims to retrain the brain to no longer perceive sound as a problem. The treatment, developed by the author, has been shown to be effective in reducing the perceived severity of tinnitus and improving quality of life. The book provides a comprehensive overview of the evidence supporting the use of TRT, as well as a practical guide to implementing the therapy in clinical practice. It includes case studies, practical exercises, and suggestions for self-help strategies.

Essentials of Audiology Sakshi Arora Hans 2017-06-20 This new edition of this international bestseller has been substantially revised and updated with a new chapter on tinnitus. This textbook presents a comprehensive overview of the anatomy, physiology, and pathology of the auditory system, as well as the diagnostic and therapeutic approaches used in the assessment and treatment of hearing loss. It is a must-read for all audiologists, otolaryngologists, and speech-language pathologists.

Tinnitus Retraining Therapy Paweł J. Jastreboff 2008-10-30 Tinnitus Retraining Therapy (TRT) is a treatment and counseling approach developed by Paweł J. Jastreboff. The approach was based on the Jastreboff neurophysiological model of tinnitus, which proposed that tinnitus is caused by a mismatch between the brain's expectations of sound and the actual sound reaching the ears. The treatment involves retraining the brain to no longer perceive tinnitus as a problem. The book provides a detailed description of the Jastreboff neurophysiological model, outlining the evidence supporting the treatment. It also presents a practical guide to implementing the treatment, with case studies and practical exercises to help clinicians and patients.
