Private Readings/public Texts Kenneth Krauss 1993 In this volume, Kenneth Krauss maintains that if readers are to comprehend playscripts as plays, they must imagine the theatre audience - so vital to the staging of any script, but conspicuously absent from the text itself. Krauss examines what has been written about reading
playscripts (or "playreading") and proposes four possible ways, founded on a reception-oriented approach to theatre communication and spectator response, that playreaders may construct a sense of theatre audiences. The study begins with a review of a varied collection of books and dissertations, written over the last forty-five years, all of which explicitly discuss playreading and exhibit only minor interest in the relationship between reader and theatre audience. The study next attempts to explain why writers more sympathetic to a reader-centered view of reading, notably reader-response critics, have avoided dramatic texts almost entirely. The study finds that both theoretical and institutional limitations have kept recent so-called audience-centered critics from the crucial issues related to reading playscripts. Drawing on play reading literature and on theatre reception theory, the study presents four spectator constructs which readers may deploy during the reading of playscripts. The first is what some, notably David Scanlan and Karen Laughlin, see as the "inscribed" audience (the rhetorical "house" implied by the playscript itself), which is in fact usually a projection of readers themselves. The second construct, originally proposed by Roger Gross, is the hypothetical audience which is significantly distinct from text and reader. The third and fourth, suggested by Kirsten Nigro, are the more specific actual or historical audience - which is based on hard data about real spectators - and the speculated
audience, which focuses on either those who never come to see the play in question or those who actually did come but who must be imagined seeing the performance under different circumstances. These constructs are illustrated through four separate but related explorations of Jean Genet's Les Bonnes. The study offers a credible but highly subjective rhetorical reading and then develops a hypothetical approach which is (deliberately) flawed in part. The study then turns to the play's original staging and attempts to explain the negative responses of the actual spectators who attended the play's premiere run. Finally, in an attempt to speculate upon who might have comprised a better audience for Genet's play, the study concludes by inventing a restaging of the play in a different theatre, by different actors, under a different director, and by constructing a highly select and very appreciative house.

**Advanced Automotive Fault Diagnosis**

Tom Denton 2006-08-14 Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic
principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and 

ASE certification in the USA.

**Audi, Filia**

Saint John (of Avila) 2006 John of Avila (1499-1569) was a major figure in the ecclesial reform and spiritual renewal that finally came to pass in 16th-century Spain. In spite of discrimination because of his Jewish background, John had an excellent education at the Universities of Salamanca and Alcala, centers of Christian humanistic studies in Spain. As a diocesan priest in Andalusia, he labored as a preacher, confessor, spiritual director, catechist, evangelist, educator, and theologian. He knew and helped many saints including Ignatius of Loyola, Teresa of Avila, and John of God. Master Avila, as he was...
called, centered his efforts on the establishment of colleges and universities for the education of laity and priests and on reform of the priesthood. He also directed many religious and lay people. His spiritual masterpiece, the Audi, filia, is a guide to the spiritual life in which hearing the word of God in the Scriptures and contemplating the face of Christ, especially in his passion, leads to personal transformation in the communion of the Father and the Son. In many ways the book reflects the time in which it was written, but it also transcends it to provide direction for a faithful and mature Christian life in any age. +

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles National Research Council 2015-09-28 The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more
Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.
