**Audi, Filia** Saint John (of Avila) 2006 John of Avila (1499-1569) was a major figure in the ecclesial reform and spiritual renewal that finally came to pass in 16th-century Spain. In spite of discrimination because of his Jewish background, John had an excellent education at the Universities of Salamanca and Alcala, centers of Christian humanistic studies in Spain. As

a diocesan priest in Andalusia, he labored as a preacher, confessor, spiritual director, catechist, evangelist, educator, and theologian. He knew and helped many saints including Ignatius of Loyola, Teresa of Avila, and John of God. Master Avila, as he was called, centered his efforts on the establishment of colleges and universities for the education of laity and priests and on reform of the priesthood. He also directed many religious and lay people. His spiritual masterpiece, the Audi, filia, is a guide to the spiritual life in which hearing the word of God in the Scriptures and contemplating the face of Christ, especially in his passion, leads to personal transformation in the communion of the Father and the Son. In many ways the book reflects the time in which it was written, but it also transcends it to provide direction for a faithful and mature Christian life in any age. +

**Private Readings/public Texts** Kenneth Krauss 1993 In this volume, Kenneth Krauss maintains that if readers are to comprehend playscripts as plays, they must imagine the theatre audience - so vital to the staging of any script, but conspicuously absent from the text itself. Krauss examines what has been written about reading playscripts (or "playreading") and proposes four possible ways, founded on a reception-oriented approach to theatre communication and spectator response, that playreaders may construct a sense of theatre audiences The study begins with a review of a varied collection of books and dissertations, written over the last forty-five years, all of which explicitly discuss playreading and exhibit only minor interest in the relationship between reader and theatre audience. The study next attempts to explain why writers more sympathetic to a reader-centered view of reading, notably reader-response critics, have avoided dramatic texts almost entirely. The study finds that both theoretical and institutional limitations have kept recent so-called audience-centered critics from the crucial issues related to reading playscripts. Drawing on play reading literature and on theatre reception theory, the study presents four spectator constructs which readers may deploy during the reading of playscripts. The first is what some, notably David Scanlan and Karen Laughlin, see as the "inscribed" audience (the rhetorical "house" implied by the playscript itself), which is in fact usually a projection of readers themselves. The second construct, originally proposed by Roger Gross, is the hypothetical audience which is

significantly distinct from text and reader. The third and fourth, suggested by Kirsten Nigro, are the more specific actual or historical audience - which is based on hard data about real spectators - and the speculated audience, which focuses on either those who never come to see the play in question or those who actually did come but who must be imagined seeing the performance under different circumstances. These constructs are illustrated through four separate but related explorations of Jean Genet's *Les Bonnes*. The study offers a credible but highly subjective rhetorical reading and then develops a hypothetical approach which is (deliberately) flawed in part. The study then turns to the play's original staging and attempts to explain the negative responses of the actual spectators who attended the play's premiere run. Finally, in an attempt to speculate upon who might have comprised a better audience for Genet's play, the study concludes by inventing a restaging of the play in a different theatre, by different actors, under a different director, and by constructing a highly select and very appreciative house.

What Video Games Have to Teach Us About Learning and Literacy. Second Edition James Paul Gee 2014-12-02 James Paul Gee begins his classic book with "I want to talk about video games--yes, even violent video games--and say some positive things about them." With this simple but explosive statement, one of America's most well-respected educators looks seriously at the good that can come from playing video games. In this revised edition of What Video Games Have to Teach Us About Learning and Literacy, new games like World of Warcraft and Half Life 2 are evaluated and theories of cognitive development are expanded. Gee looks at major cognitive activities including how individuals develop a sense of identity, how we grasp meaning, how we evaluate and follow a command, pick a role model, and perceive the world.
