Slow Blind Drive Gwen O'Toole 2006-06-19 Slow Blind Drive is a conversation with the dead. A letter to an unlikely muse and a testament to the resilience of unconditional love. All at once haunting and horrific, erotic and endearing, this is the story of what it means to grow up a girl, to find solace in addiction, to have everything and give it away. It's a raw and sentimental account that follows a childhood friendship as it thrives and suffers through an intimate love, drug addiction, mental illness and betrayal. This is a story whose characters stay with you long after you've turned the last pages.

Neo-Humanism: Liberation of

Intellect P. R. Sarkar 2019-02-13

This book outlines the theory of Neo-Humanism as propounded by the great 20th century thinker P.R. Sarkar. Neo-humanism is described as humanism expanded to include the entire creation: all varieties of human cultural expressions, and the animal and plant world, even until the inanimate world. This 'neo-humanism', rather than being an atheistic concept, recognizes the value of a human beings internal world, and thus bases the inspiration of neo-humanism upon a universal spirituality which is an essential part of the human psyche, although at times unconscious. This inner connection provides the mental expansion, empathy and perception so that will allow human society to live 'neo-humanism' not only in theory but as a real experience integrated into the individual and collective self. The author also clearly and concisely

describes the modes by which vested economic and media interests manipulate and distort human thinking, and how this can be combatted through rationality and proper education. This he links in a unique way spirituality, rationality and human emotion. This book offers a unique perspective for anyone interested in sociology, multiculturalism, anti-speciesism, globalization, anthropology, alternative economics, etc.

Light-Duty Vehicle Greenhouse Gas Emission Standards and Corporate Average Fuel Economy Standards (US National Highway Traffic Safety Administration Regulation) (Nhtsa) (2018 Edition) The Law Library 2018-11-25
Light-Duty Vehicle Greenhouse Gas Emission Standards and Corporate Average Fuel Economy Standards (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition) The

Law Library presents the complete text of the Light-Duty Vehicle Greenhouse Gas Emission Standards and Corporate Average Fuel Economy Standards (US National Highway Traffic Safety Administration Regulation) (NHTSA) (2018 Edition). Updated as of May 29, 2018 EPA and NHTSA are issuing this joint Final Rule to establish a National Program consisting of new standards for light-duty vehicles that will reduce greenhouse gas emissions and improve fuel economy. This joint Final Rule is consistent with the National Fuel Efficiency Policy announced by President Obama on May 19, 2009, responding to the country's critical need to address global climate change and to reduce oil consumption. EPA is finalizing greenhouse gas emissions standards under the Clean Air Act, and NHTSA is finalizing Corporate Average Fuel Economy standards under the

Energy Policy and Conservation Act, as amended. These standards apply to passenger cars, light-duty trucks, and medium-duty passenger vehicles, covering model years 2012 through 2016, and represent a harmonized and consistent National Program. Under the National Program, automobile manufacturers will be able to build a single light-duty national fleet that satisfies all requirements under both programs while ensuring that consumers still have a full range of vehicle choices. NHTSA's final rule also constitutes the agency's Record of Decision for purposes of its National Environmental Policy Act (NEPA) analysis. Lexical Ontological Semantics

Guoxiang Wu 2019-02-05 Lexical

Ontological Semantics introduces ontological methods into lexical semantic studies with the aim of giving impetus to various fields of endeavours which envision and model the semantic network of a language. Lexical ontological semantics (LOS) provides a cognition-based computation-oriented framework in which nouns and predicates are described in terms of their semantic knowledge and models the mechanism in which the noun system is coupled with the predicate system. It expands the scope of lexical semantics, updates methodologies to semantic representation, guides the construction of semantic resources for natural language processing, and develops new theories for human-machine interactions and communications.

Achtung-Panzer! Heinz Guderian
1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War.

Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age,

exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

DOPE, INC. Britain's Opium War Against the World Executive Intelligence Review 2021-02-12
The Opium Wars of 1840-1860 were dark chapters of history. Britain went to war to force China to import thousands of tons of opium, to cripple and impoverish that nation. The Opium Wars never really ended. The U.S., like China, was too great for the London money lords to occupy by force. One

way America is being brought to heel is by the drug trade. Crime and other social problems in the U.S. and Mexico are massively influenced by drugs and drug dealing. Illicit drugs may now account for as much as \$1 trillion annually in financing for criminal activity and corruption. TOPICS: The East India Company; British role in the drug trade, from the wars on China, the HongShanghai Bank, Bronfmans, Prohibition, and Organized Crime in the U.S. Financial derivatives; Wall St., money laundering; medical marijuana. decriminalization; Soros and IMF links to drugs. Afghan opium; Colombian cartel; terrorism. Russia targeted by Dope, Inc. cocaine, heroin, amphetamines. More than 30 years have passed since the first edition of Dope, Inc. was published, in 1978. Commissioned by Lyndon Larouche, it threatened the world's power structure. It became America's

underground best-seller. Dope, Inc. drew the line between American patriots and the British apparatus destroying the USA. The London and Wall Street bankers ran for cover. A mammoth campaign of slander and government dirty tricks tried to bury the authors, because Dope, Inc. revealed the most deeply held secrets of the big names behind the world's illegal narcotics trade. In Venezuela, the leading drug-running families who were exposed in the Spanish-language version, Narcotrafico, S.A., used their political influence to have it banned and confiscated. Financiers scrambled to control the damage of this unprecedented exposure. The Hongkong and Shanghai Banking Corporation was denied a license in New York State because it failed to refute the charges in Dope, Inc, when the state demanded accounting of its hidden profits, silent subsidiaries,

and paraphernalia of money-laundering. Now in 2010, Dope, Inc. is completely updated: Soros - Afghanistan - the government and bankers behind the cartels. Today the British-controlled dope trade finances the world's leading terrorist entities - Afghanistan's Taliban, the Chechen rebels, the FARC guerrillas of Colombia. Dope money supports the bankrupt world financial system. A trillion dollars goes through the Cayman Islands, the Isle of Man, Dubai. Speculation makes it trillions more. It sucks the blood of the real economy; and the dope destroys mankind's powers of reason.

Affective Health and Masculinities in South Africa

Hans Reihling 2020-04-24
Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized

as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and

global health.

[Planning Wild Cities](#) Wendy

Steele 2020-10-13 This book critically engages with the contemporary challenges and opportunities of wild cities in a climate of change. A key focus of the book is exploring the nexus of possibilities for wild cities and the eco-ethical imagination needed to drive sustainable and resilient urban pathways. Many now have serious doubts about the prospects for humanity to live within cities that are socially just and responsive to planetary limits. Is it possible for planning to better serve, protect and nurture our human and non-human worlds? This book argues it is. Drawing on international literature and Australian case examples, this book explores issues around climate change, colonization, urban (in)security and the rights to the city for both humans and nature. It is within this context that this book focuses on the urgent need to better understand how contemporary cities have changed, and the

relational role of planning within it. Planning Wild Cities will be of particular interest to students and scholars of planning, urban studies, and sustainable development, and for all those invested in re-shaping our 'wild' city futures.
