normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People’s normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People’s normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Special Edition Using Red Hat Linux Alan Simpson 2000 A guide for advanced users showcases the updated features of the operating system while covering installation, configuration, programming, administration, and networking

Computerworld 1994-04-25 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld’s award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research from the hub of the world’s largest global IT media network.

Computer Book Review 1988 Mobile Ad Hoc Networking Stefano Basagni 2013-02-07 “An excellent book for those who are interested in learning the current status of research and development . . . [and] who want to get a comprehensive overview of the current state-of-the-art.” —E-Streams This book provides up-to-date information on research and development in the rapidly growing area of networks based on the multihop ad hoc networking paradigm. It reviews all classes of networks that have successfully adopted this paradigm, pointing out how they penetrated the mass market and sparked breakthrough research. Covering both physical issues and applications, Mobile Ad Hoc Networking: Cutting Edge Directions offers useful tools for professionals and researchers in diverse areas wishing to learn about the latest trends in sensor, actuator, and robot networking, mesh networks, delay tolerant and opportunistic networking, and vehicular networks.

Chapter coverage includes:
- Multihop ad hoc networking
- Enabling technologies and standards for mobile multihop wireless networking
- Resource optimization in multiradio multichannel wireless mesh networks
- QoS in mesh networks
- Routing and data dissemination in opportunistic networks
- Task farming in crowd computing
- Mobility models, topology, and simulations in VANET MAC protocols for VANET Wireless sensor networks with energy harvesting nodes
- Robot-assisted wireless sensor networks
- Recent applications and future challenges
- Advances in underwater acoustic networking
- Security in wireless ad hoc networks
- Mobile Ad Hoc Networking will appeal to researchers, developers, and students interested in computer science, electrical engineering, and telecommunications.

Asian American Yearbook 2005-04 The Asian American community has found its authoritative guide in this reference to practical, political, financial, educational, and professional areas of community life. Statistical data and comprehensive listings provide readers access to financial aid opportunities; professional career and business advice; health-related information; and community organizations, publications, and media outlets worldwide.

Anuario Hispano Hispanic Yearbook 2005-05 Each of these yearbooks is recognized as the premier national resource and referral guide for their respective communities in areas of employment, business, education, government, and health care. Each reference includes detailed listings of community organizations, publications, and media outlets in the United States and abroad; financial aid opportunities for students; career and business opportunities for professionals; health-related information, and statistical data.

Microtimes 1997 The User’s Directory of Computer Networks Tracy Laquey 2014-06-28 Your map through the network jungle. Here’s how to track down virtually every network available to academics and researchers. This new book, with its detailed compilation of host-level information, provides everything you need to locate resources, send mail to colleagues and friends worldwide, and answer questions about how to access major national and international networks. Extensively cross-referenced information on ARPANET/MILNET, BITNET, CSNET, Eunet, NSFNET, SPAN, THEEnd, USENET, and loads of others is all provided. Included are detailed lists of hosts, site contacts, administrative domains, and organizations. Plus, a tutorial chapter with handy reference tables reveals electronic mail ‘secrets’ that make it easier to take advantage of networking.
