Kahneman's work with Amos Tversky is the subject of Michael Lewis's The Undoing Project: A Friendship That Changed Our Minds

In the international bestseller, Thinking, Fast and Slow, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how
choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, Thinking, Fast and Slow is destined to be a classic.

Never Cry "Arp!" and Other Great
Adventures  Patrick F. McManus  
1996-05-15  America's best-selling outdoor humorist for adults has a secret following: middle-grade and young-adult readers. Never Cry "Arp!" is a lively collection of twelve stories about young Pat's misadventures in the Great American Wilderness. All the McManus regulars are here: Crazy Eddie Muldoon, the best friend everybody wishes they had (and everybody's mother wishes they didn't); Rancid Crabtree, the good-hearted, if gamey, woodsman; Pat's skunk dog, Strange, who lives up to his name; and Pat's pal, Retch Sweeney, who does, too. This is a book for kids who love to start fishing at 4am (at least they say they do) or for those who prefer to experience the mighty outdoors in the safety of their homes. "Everybody should read Patrick McManus," said the New York Times. Now, everybody can.

These Precious Days  Ann Patchett  2021-11-23  The beloved New York Times bestselling author reflects on home, family, friendships and writing in this deeply personal collection of essays. "The elegance of Patchett’s prose is seductive and inviting: with Patchett as a guide, readers will really get to grips with the power of struggles, failures, and triumphs alike." —Publisher's Weekly “Any story that starts will also end.” As a writer, Ann Patchett knows what the
outcome of her fiction will be. Life, however, often takes turns we do not see coming. Patchett ponders this truth in these wise essays that afford a fresh and intimate look into her mind and heart. At the center of These Precious Days is the title essay, a surprising and moving meditation on an unexpected friendship that explores “what it means to be seen, to find someone with whom you can be your best and most complete self.” When Patchett chose an early galley of actor and producer Tom Hanks’ short story collection to read one night before bed, she had no idea that this single choice would be life changing. It would introduce her to a remarkable woman—Tom’s brilliant assistant Sooki—with whom she would form a profound bond that held monumental consequences for them both. A literary alchemist, Patchett plumbs the depths of her experiences to create gold: engaging and moving pieces that are both self-portrait and landscape, each vibrant with emotion and rich in insight. Turning her writer’s eye on her own experiences, she transforms the private into the universal, providing us all a way to look at our own worlds anew, and reminds how fleeting and enigmatic life can be. From the enchantments of Kate DiCamillo’s children’s books (author of The Beatryce Prophecy) to youthful memories of Paris; the cherished life gifts given by her three fathers to the unexpected influence of Charles Schultz’s Snoopy; the expansive vision of Eudora Welty to the importance of knitting, Patchett
connects life and art as she illuminates what matters most. Infused with the author’s grace, wit, and warmth, the pieces in These Precious Days resonate deep in the soul, leaving an indelible mark—and demonstrate why Ann Patchett is one of the most celebrated writers of our time.

**Parentology** Dalton Conley 2014-03-18

An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his
profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

The Grasshopper Trap Patrick F. McManus 1986-09-15 Patrick F. McManus, the “funniest guy in the Outdoor Life and Field & Stream gang...offers another bag of whimsy in the Great Outdoors”* with The Grasshopper Trap. In this collection of thirty zany stories, spoofing camping, fishing, and other outdoor recreational activities, McManus shares his hilarious wilderness misadventures. From facing an angry bear with an unloaded gun and the folly of running a boat while it’s still on the trailer to not questioning the ingredients found in camp cookout cuisine and the best methods of catching grasshoppers, no one knows how to express Mother Nature’s sense of humor like Patrick F. McManus. “It’s enough to tickle the most rabid member of the National Rifle Association.”—*Kirkus Reviews

Machine Habitus Massimo Airoldi 2021-12-13 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and
the invisible, the relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoldi shows how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The ‘machine habitus’ is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in our social and cultural life. They Shoot Canoes, Don’t They? Patrick F. McManus 1982-09-15 With tongue pressed firmly in cheek and a gentle but penetrating eye for human foibles, Patrick F. McManus celebrates the hidden pleasures, unappreciated lore, and opportunities for disaster to be found in the recreations of camping, hunting, and fishing in his hilarious collection They Shoot Canoes, Don’t They? Gathered here for the reader’s edification are such treasures as the true but little known story of the discovery of the efficacy of live bait by Genghis Khan’s chef, an examination of the precarious and
perhaps fanatical expertise required for ice fishing, and a consideration of the circumstances that can cause a deer to ride a bicycle. Among additional topics explored are The Crouch Hop and Other Useful Outdoor Steps, The Sensuous Angler, and Psychic Powers for Outdoorsmen. Included, too, is The Hunter’s Dictionary, an invaluable lexicon that helps the novice sportsman understand such arcane terminology as “Ooooooeee-ah-ah-ah! (If there’s one thing I hate, it’s putting on cold, wet pants in the morning)” and “Baff mast pime ig bead feas mid miff pife! (That’s the last time I try to eat peas in the dark with my hunting knife!” The author’s appreciation of outdoor life began in his early boyhood, when he absorbed a wealth of improbable information imparted by the old woodsman Rancid Crabtree, “who bathed only on leap years.” Young McManus also enjoyed special adventures with his ill-remembered sidekick, Retch Sweeney, and another boon companion of days gone by, the loquacious family dog, Strange, whose exploits as a hunter were limited to assaulting stray chickens and on one memorable occasion a skunk. “McManus here follows up A Fine and Pleasant Misery with a collection of sketches that launches him into the front ranks of outdoor humorists.”—Library Journal

Race After Technology Ruha Benjamin
2019-07-09 From everyday apps to complex algorithms, Ruha Benjamin cuts through tech-industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity. Benjamin argues that automation, far from being a sinister story of racist programmers scheming on the dark web, has the potential to hide, speed up, and deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era. Presenting the concept of the “New Jim Code,” she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies; by ignoring but thereby replicating social divisions; or by aiming to fix racial bias but ultimately doing quite the opposite. Moreover, she makes a compelling case for race
itself as a kind of technology, designed to stratify and sanctify social injustice in the architecture of everyday life. This illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism. In doing so, it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture. Visit the book's free Discussion Guide here.

_Pre-Incident Indicators of Terrorist Incidents_ Brent L. Smith 2011-01 This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning
process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

*The Bear in the Attic* Patrick F. McManus 2003-06-01

The beloved humorist and bestselling author returns with his most riotous collection of essays to date. Overflowing with his trademark outdoorsman's wit, Patrick F. McManus's newest collection ponders the strange allure of the RV, the existential implications of being lost, the baffling tendency of animals to outsmart those who wish to hunt them, and the singular pleasure of doubling the size of every fish one doesn't actually catch. Combining the curmudgeonly voice of Dave Barry and the sly humor of Garrison Keillor, McManus brilliantly captures the everyday absurdities that comprise our existence. Alongside his
humor, McManus's inimitable vision consistently evokes a childlike wonder at the natural world. Even if we are running low on food, the compass is broken, and we are fairly certain we have just spotted a family of Sasquatches frolicking in the treetops, The Bear in the Attic makes the outdoors seem irresistible.

If You Didn't Bring Jerky, What Did I Just Eat? Bill Heavey 2008-10-07 A hilarious collection of essays dedicated to life in the great outdoors from Field & Stream’s acclaimed Sportsman’s Life columnist. For nearly a decade, Bill Heavey, an outdoorsman marooned in suburbia, has written the Sportsman’s Life column on the back page of Field & Stream, where he does for hunting and fishing what David Feherty does for golf and Lewis Grizzard did for the South. If You Didn’t Bring Jerky, What Did I Just Eat? is the first collection of Heavey’s sidesplitting observations on life as a hardcore (but often hapless) outdoorsman. Whether he’s hunting cougars in the desert, scheming to make his five-year-old daughter love fishing, or chronicling his father’s life through a succession of canine companions, Heavey brings his trademark wit to a wide-range of outdoor enthusiasms, running the gamut from elite expeditions to ordinary occupations. In turns hysterical and poignant, entertaining and educational, this is an irresistible addition to the collection of any avid outdoorsman—or any suburbanite intrigued by the call of the wild.
