Management and Cost Accounting

Management Accounting is becoming increasingly international. "Management and Cost Accounting" is a unique and influential textbook that has been widely used by business schools and practitioners worldwide. The book provides a comprehensive introduction to the concepts of management accounting, including the importance of decision making, cost behavior analysis, responsibility accounting, and performance measurement.

Financial Accounting

Financial Accounting is a fundamental course for all business students. It introduces the basic concepts of financial statements, financial reporting, and the role of financial accounting in decision making. The book covers topics such as financial statement analysis, regulation of financial reporting, and advanced topics such as multinational accounting.

Cost Accounting

Cost Accounting is a course that focuses on the systematic measurement and analysis of costs involved in the production of goods and services. It is a crucial course for students pursuing careers in accounting, finance, and management. The book covers topics such as cost behavior, cost-volume-profit analysis, and cost allocation.

Managerial Accounting

Managerial Accounting is a course that focuses on the use of accounting information for decision making in organizations. The book covers topics such as cost-benefit analysis, capital budgeting, and performance evaluation.

Human Resource Accounting

Human Resource Accounting is a relatively new field that applies traditional accounting principles to the management of human capital. The book covers topics such as employee compensation, human capital investments, and the role of accounting in strategic human resource management.

Compensation Accounting

Compensation Accounting is a specialized area of accounting that focuses on the management of compensation costs. The book covers topics such as executive compensation, equity compensation, and pension accounting.

Executive Financial Reporting

Executive Financial Reporting is a course that focuses on the role of financial reporting in decision making by managers and investors. The book covers topics such as financial statement analysis, earnings management, and the role of financial reporting in capital market decisions.
