Speeches of Note Shaun Usher 2018-12-04 From the author of the New York Times bestseller Letters of Note comes a collection of 75 of history's most interesting, profound, and sometimes unknown speeches from a range of scintillating personalities such as Frederick Douglass, Justin Trudeau, Albert Einstein, Meghan Markle, Barbara Jordan, and Ursula K. Le Guin. This thoughtfully curated and richly illustrated collection celebrates oratory old and new, highlighting speeches we know and admire, while also shining a light on profound drafts that were never delivered or have until now been forgotten. From George Bernard Shaw's warm and rousing toast to Albert Einstein in 1930 and the commencement address affectionately given to graduates at Long Island University by Kermit the Frog, to the chilling public announcement (that was thankfully never made) by President Richard Nixon should Neil Armstrong and Buzz Aldrin become stranded on the moon, Speeches of Note honors the words and ideas of some of history's

most provocative and inspiring personages.

Bow-tie Industrial Risk Management Across

Sectors Luca Fiorentini 2021-04 "As stated by ISO 31000 "organizations of all types and sizes face internal and external factors and influences that make it uncertain whether and when they will achieve their objectives. The effect this uncertainty has on organization's objectives is a risk. All activities of an organization involve risk". ISO, together with the International Trade Centre and the United Nations Industrial Development Organization published a specific guide about the importance of the implementation of sound risk management practices in small and mid enterprises. Risk management is an integral part of all organizational processes and of decision making. It should be systematic, structured and timely. It also should be based on the best available information and tailored. It should consider human and cultural factors ("soft" factors) together with technical and

organizational factors ("hard" factors)."

Manual of Wire Bending Techniques Eiichiro Nakajima 2010-01-01 Effective wire bending techniques that are customized to each individual patient make orthodontic treatment more efficient and can reduce treatment time. In lieu of overly complicated wire bending, the author of this manual promotes precise, intuitive bending and presents the proven methods that work with any biologically compatible wire. The essential components and techniques of customized wire bending are detailed step-by-step, including trimming of casts; selection and proper manipulation of pliers; the first-order

bends (in or out), second-order bends (up or down), and third-order bends (torque); and optimal methods of adjustment to be used during orthodontic treatment. In addition, the author elucidates the "fourth-order bend," which is the understanding of how to use a wire effectively to apply orthodontic force to a patient over time. Technical images and case presentations illustrate each step of the process to ensure maximum comprehension. A must-have guide for orthodontic residents and practitioners alike.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural

traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons

that go down easy. You’ll be laughing and learning at the same time.

The Complete Book of Combat Systema Kevin Secours 2016-02-01 In 1998 while changing after a kali training session, a friend approached Kevin Secours with a videocassette and asked, "You ever seen the Russian martial arts?" Looking at the Cyrillic label on the video, Secours asked, "Any good?" "It's interesting," the friend replied. "Weird as hell but interesting." Little did Secours know that tape would be his introduction to a 16-year (and counting) journey into the unorthodox world of the Russian martial arts, including years of high-level training under top Russian masters. On the video Secours saw mobility exercises unlike anything he had ever experienced. As he was to learn, the uniqueness of the Russian martial arts stemmed from the uniqueness of the country itself. The Cold War in the 1950s, during which the superpowers battled for supremacy, was the final forge that refined the Russian

martial arts into what they are today. In anticipation of global warfare, the Soviet government commissioned combat researchers to travel throughout the world to study different approaches. They tested these methods and integrated the best concepts with their own native traditions. This period of development led to the creation of distinct Soviet martial arts, including Sport Sambo, Combat Sambo, and Samoz, which was later modified and became known simply as Systema (literally "the System"). Approaching Systema from a decidedly Western perspective, Secours pressure-tested the strengths and benefits of every concept and technique, and ultimately took only what served him. He built his Combat Systema curriculum on a scientific approach to bio-mechanics, breath training, and combat psychology. In The Complete Book of Combat Systema, he keeps things practical, provable, and profitable for you to incorporate what works into your self-defense training.

Sick Tom Leveen 2013-10-01 Brian and his friends are not part of the cool crowd. They're the misfits and the troublemakers—the ones who jump their high school's fence to skip class regularly. So when a deadly virus breaks out, they're the only ones with a chance of surviving. The virus turns Brian's classmates and teachers into bloodthirsty attackers who don't die easily. The whole school goes on lockdown, but Brian and his best friend, Chad, are safe (and stuck) in the theater department—far from Brian's sister, Kenzie, and his ex-girlfriend with a panic attack problem, Laura. Brian and Chad, along with some of the theater kids Brian had never given the time of day before, decide to find the girls and bring them to the safety of the theater. But it won't be easy, and it will test everything they thought they knew about themselves and their

classmates. Praise for SICK "The gore and action will leave enthralled readers thrilled and then sated with each kill on either side." —Booklist "Between the pacing and the heroes' salty, blue language (full of lovingly creative, genital-inspired insults), reluctant readers who love zombies will devour it, right up to the abrupt end." —Kirkus Reviews "Sick is well written, with great detail, even if it is a little gory." —VOYA Magazine Awards 2014 Quick Picks for Reluctant Young Readers list from YALSA

Dream Quartet June Ballantyne 2021-09-24

I received four stories over a few months from dreams that came over a period of days and stayed in my mind until I wrote them down, and others via my subconscious. When I was sitting in my car at the beach and events happened that forced me to go home and sit at my computer, the stories came at great speed into my mind, and I typed them out and read them afterwards. The first is about a young girl who has moved to London for her new job working for the government. She meets a young gypsy who wants to tell her something. They have a connection, and events lead her to join him in the summer at the gypsy encampment, where she learns of her true family. Her life changes from there. The second story, again from a dream over

a period of days, is a love story. A girl has a past that gets in the way. The third story I love. I was sitting in my car at the beach and words ran across the book I was trying to read. I drove home, and before I arrived at my door, the words were pushing their way into my head. I sat and typed as fast as my fingers could keep me going, and then it ended. I did not know what I wrote, so I read the story: an amusing plan by six young adults to have a mystery holiday, while at the same time creating fun things for each of them to do while waiting for clues at their hotel, each one filled with mischief. It had an amusing twist for the ending. However, that night I had to get up and go to my computer and continue with a second part to the story. I really enjoyed it. The final story was very emotional for me. There was heartache, the mystery of where your soul goes after death, how life continues on a new path, and who is in charge.
