The Locke Reader John W. Yolton 1977-03-01 John Yolton seeks to allow readers of Locke to have accessible in one volume sections from a wide range of Locke's books, structured so that some of the interconnections of his thought can be seen and traced. Although Locke did not write from a system of philosophy, he did have in mind an overall division of human knowledge. The readings begin with Locke's essay on Hermeneutics and the portions of his Essay Concerning Human Understanding on how to read a text. The reset of the selections are organized around Locke's division of human knowledge into natural science, ethics, and the theory of signs. Yolton's introduction and commentary explicate Locke's doctrines and provide the reader with the general background knowledge of other seventeenth-century writers and their works necessary to an understanding of Locke and his time.

Post-Hindu India Kancha Ilaiah 2009-11-17 Kancha Ilaiah, the author of the best selling book Why I am Not A Hindu, pens a thought-provoking critique of Brahmanism and the caste system in India, while anticipating the death of Hinduism as a direct consequence of, what he says is, its anti-scientific and anti-nationalistic stand. This work challenges Hinduism's interpretation of history, with a virulent attack on caste politics, and also takes a refreshing look at the necessity of encouraging indigenous scientific thought for the sake of national progress. It establishes Hinduism as a 'backward' religion that suppresses the latent scientific and productive potential of the Dalit–Bahujan communities. The author says this oppressive system of spiritual fascism is detrimental to both the future of religion and the nation-state. He thus criticizes the idea of spiritual justice or varnadhharma, used to justify the caste system, as rooted in spiritual inequality. On a micro-analytical level, it is based on a thorough study of the productive knowledge systems of the Dalit–Bahujan communities of Andhra Pradesh, and provides a detailed day-to-day analysis of the scientific technological practices and events at work in the life of a member of these communities. On a macro level, it shows how Hinduism fails to negotiate between faith and reason, unlike other major religions of the world. Kancha Ilaiah critiques the intellectual imagination of the dominant communities and inspires the marginalized. In the process of doing so he crafts a work of immense socio-political interest which appeals to academics, and also to all those who are concerned about contemporary India’s polity and social fabric.

Terasenia Greg Egan 1999-07-12 Welcome to Terasenia, the island of butterflies, where evolution has stopped making sense. Prabir Suresh lives in paradise, a nine-year-old boy with an island all his own: to name, to explore, and to populate with imaginary creatures stranger than any exotic tropical wildlife. Terasenia is his kingdom, shared only with his biologist parents and baby sister Madhusree. The evolutionary puzzle of the island’s butterflies that brought his family to the remote South Moluccas barely touches Prabir; his own life revolves around the beaches, the jungle, and the schooling and friendships made possible by the net. When civil war breaks out across Indonesia, this paradise comes to a violent end. The mystery of the butterflies remains unsolved, but nearly twenty years later reports begin to appear of strange new species of plants and animals being found throughout the region — species separated from their known cousins by recent, dramatic mutations that seem far too useful to have arisen by chance from pollution, disease, or any other random catastrophe. Madhusree is now a biology student, proud of her parents’ unacknowledged work, and with no memories of the trauma of the war to discourage her, she decides to join a multinational expedition being mounted to investigate the new phenomenon. Unable to cast off his fears for her safety, Prabir reluctantly follows her. But travel between the scattered islands is difficult, and Madhusree has covered her tracks. In the hope of finding her, Prabir joins up with an independent scientist, Martha Grant, who has come to search for both clues to the mystery and whatever commercial benefits it might bring to her sponsor. As Prabir and Martha begin to untangle the secret of Teranesia, Prabir is forced to confront his past, and to face the painful realities that have shaped his life.

It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you’ll be off to a great start.

Differential Forms and Applications Manfredo P. Do Carmo 2012-12-06 An application of differential forms for the study of some local and global aspects of the differential geometry of surfaces. Differential forms are introduced in a simple way that will make them attractive to “users” of mathematics. A brief and elementary introduction to differential manifolds is given so that the main theorem, namely Stokes’ theorem, can be presented in its natural setting. The applications consist in developing the method of moving frames expounded by E. Cartan to study the local differential geometry of immersed surfaces in R3 as well as the intrinsic geometry of surfaces. This is then collated in the last chapter to present Chern’s proof of the Gauss-Bonnet theorem for compact surfaces.
