Field-programmable Logic and Applications International Workshop on Field Programmable Logic and Applications 1995:85-23 This volume contains the proceedings of the FPLA International Workshop on Field-Programmable Logic and Applications, FPL '95, held in Oxford, UK, August 29-September 1, 1995. The volume presents 46 full revised papers carefully selected by the program committee from a larger number and wide range of submissions. The papers document the progress achieved since the predecessor conference (see LNCS 849). They are organized in sections on architectures, platforms, tools, arithmetic and signal processing, embedded systems and other applications, and reconfigurable design and models.

Network World has been the premier provider of information, intelligence and insight for network and data communications professionals. It details the latest trends, technologies and innovations that are shaping and defining the field of networking. Whether you're looking for cutting-edge solutions or just trying to include information on project conception and project representation, this material, combined with a full complement of documents, contracts, and forms, makes this the single most comprehensive project reference in the construction industry.
