The Civil War: The Final Year Told by Those Who Lived It Aaron Sheehan-Dean 2014-04-03 This final installment of the highly acclaimed four-volume series traces events from March 1864 to June 1865. It provides an incomparable portrait of a nation at war with itself, while illuminating the military and political events that brought the Union to final victory, and slavery and secession to their ultimate destruction. Here are more than 150 letters, diary entries, memoir excerpts, speeches, articles, messages, and poems by over a hundred participants and observers, both famous and unsung, including Abraham Lincoln, Jefferson Davis, Ulysses S. Grant, William T. Sherman, Robert E. Lee, Frederick Douglass, Walt Whitman, Herman Melville, Harriet Jacobs, Henry Adams, Elizabeth Keckly, and George Templeton Strong, as well as Union and Confederate soldiers; women diarists from North and South; and freed slaves. The selections include vivid and haunting firsthand accounts of legendary battles and campaigns—the Wilderness, Spotsylvania, Cold Harbor, the Atlanta campaign, the Crater, Franklin, Sherman’s march through Georgia and the Carolinas—as well as of the desperate conditions inside Andersonville prison; the sinking of the Confederate raider Alabama; the passage of the Thirteenth Amendment; and the struggles of both black and white civilians to survive the harsh and violent downfall of the Confederacy.

More Than Human Theodore Sturgeon 2013-04-30 Six misfits, one powerful entity. An award-winning novel about belonging by “one of the greatest writers of science fiction and fantasy who ever lived” (Stephen King). Individually, they are a seemingly simpleminded young man living in the woods who can read the thoughts of others, a runaway girl with telekinetic powers, twin girls who can barely speak but can teleport across great distances, and an infant with a mind like a supercomputer. Together, they are the Gestalt—a single extraordinary being comprised of remarkable parts—although an essential piece may be missing. . . . But are they the next stage in human development or harbingers of the end of civilization? The answer may come when they are joined by Gerry. Powerfully telepathic, he lacks a moral compass—and his hatred of the world that has rejected him could prove catastrophic. Winner of the International Fantasy Award and considered Theodore Sturgeon’s masterpiece, *More Than Human* is a genre-bending wonder that explores themes of responsibility and morality, individuality, and belonging. Moving and suspenseful, lyrical and provocative, the novel was one of the first to elevate science fiction into the realm of literature, and inspired musicians and artists, including the Grateful Dead and Crosby, Stills and Nash. From the Nebula Award–winning author of *Godbody*, *The Dreaming Jewels*, and other great works of science fiction, this is an unforgettable reading experience and a must for anyone who enjoys Ramsey Campbell, Robert Silverberg, or Philip José Farmer. This ebook features an illustrated biography of Theodore Sturgeon including rare images and never-before-seen documents from the University of Kansas’s Kenneth Spencer Research Library and the author’s estate, among other sources.

William Tecumseh Sherman: Memoirs of General W. T. Sherman (LOA #51) William Tecumseh Sherman 1990-10-01 Hailed as prophet of modern war and condemned as a harbinger of modern barbarism, William Tecumseh Sherman is the most controversial general of the American Civil War. “War is cruelty, and you cannot refine it,” he wrote in fury to the Confederate mayor of Atlanta, and his memoir is filled with dozens of such wartime exchanges. With the propulsive energy and intelligence that marked his campaigns, Sherman describes striking incidents and anecdotes and collects dozens of his incisive and often outspoken wartime orders and reports. This complex self-portrait of an innovative and relentless American warrior provides firsthand accounts of the war’s crucial events—Shiloh, Vicksburg, Chattanooga, the Atlanta campaign, the marches through Georgia and the Carolinas. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation’s literary heritage by publishing, and keeping permanently in print, America’s best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

Aldo Leopold: A Sand County Almanac & Other Writings on Conservation and Ecology Aldo Leopold 2013-03-21 Since his death in 1948, Aldo Leopold has been increasingly recognized as one of the indispensable figures of American environmentalism. A pioneering forester, sportsman, wildlife manager, and ecologist, he was also a gifted writer whose farsighted land ethic is proving increasingly relevant in our own time. Now, Leopold’s essential contributions to our literature—some hard-to-find or previously unpublished—are gathered in a single volume for the first time. Here is his classic *A Sand County Almanac*, hailed—with Thoreau’s *Walden* and Carson’s *Silent Spring*—as one of the main literary influences on the modern environmental movement. Published in 1949, it is still astonishing today: a vivid, firsthand, philosophical tour de force. Along with *Sand County* are more than fifty articles, essays, and lectures exploring the new complexities of ecological science and what we would now call environmental ethics. Leopold’s sharp-eyed, often humorous journals are illustrated here for the first time with his original photographs, drawings, and maps. Also unique to this collection is a selection of over 100 letters, most of them never before published, tracing his personal and professional evolution and his efforts to foster in others the love and sense of responsibility he felt for the land. **Evaporating Genres** Gary K. Wolfe 2011-01-03 In this wide-ranging series of essays, an award-winning science fiction critic explores how the related genres of science fiction, fantasy, and horror evolve, merge, and finally “evaporate” into new and more dynamic forms. Beginning with a discussion of how literary readers “unlearned” how to read the fantastic during the heyday of realistic fiction, Gary K. Wolfe goes on to show how the fantastic reassessed itself in popular genre literature, and how these genres themselves grew increasingly unstable in terms of both narrative form and the worlds they portray. More detailed discussions of how specific contemporary writers have promoted this evolution are followed by a final essay examining how the competing discourses have led toward an emerging synthesis of critical approaches and vocabularies. The essays cover a vast range of authors and texts, and include substantial discussions of very current fiction published within the last few years.

May Swenson: Collected Poems May Swenson 2013-04-04 In celebration of the centenary of May Swenson’s birth, The Library of America presents a one-volume edition of all of the poems that Swenson published in her lifetime—from her first collection *Another Animal* (1954) to the innovative shaped poems of *Iconographs* (1970) to her final work *In Other Words* (1987)—as well as a selection of previously uncollected work. The collection reveals the sweeping compass of Swenson’s curiosity: nature poems display her keen observation of wildlife; exuberant and erotic love poems celebrate beauty and passion; place poems record her travels to the American Southwest, France, and Italy and her residence in New York City and Sea Cliff, Long Island; verse “analyses” investigate baseball, wave motion, the DNA molecule, bronco busting, James Bond movies, and the first walk on the moon. Swenson was an inveterate reviser: poems in earlier volumes were frequently reworked for inclusion in later volumes, such as *To Mix with Time* (1963) and *New and Selected Things Taking Place* (1978). While preserving the order of publication, this volume presents the author’s final or definitive version. Substantive textual variants and title changes are detailed in the notes to the volume.

Past Master R. A. Lafferty 2019-10-03 Wolf Hall meets The Man in the High Castle in this mind-bending science fiction classic, now presented in an authoritative new edition from Library of America Plucked from time, Sir Thomas More arrives on the human colony of Astrobe in the year 2535 A.D., where there is trouble in utopia: can he and his motley followers save this golden world from the Programmed Persons, and the soulless perfection they have engineered? The survival of faith itself is at stake in this thrilling, uncategoryzable, wildly inventive first novel—but the adventure is more than one of ideas. As astonishingly as Philip K. Dick and other visionaries of the 1960s new wave, Lafferty turns the conventions of space-opera science fiction upside-down and inside-out. Here are fractured allegories, tales-within-tales, twinkle-in-the-eye surprises, fantastic byways, and alien subjectivities that take one’s breath away. Neil Gaiman has described Lafferty “a genius, an oddball, a madman”; Gene Wolfe calls him “our most original writer.” *Past Master*, long-hailed by insiders and now presented in authoritative form, with an introduction by Andrew Ferguson and unpublished omitted passages included in the notes, deserves to perplex and delight a wider audience.

Fahrenheit 451 Ray Bradbury 2012-01-10 A totalitarian regime has ordered all books to be destroyed, but one of the book burners, Guy Montag, suddenly realizes their merit.

The Long Tomorrow Leigh Brackett 2021-06-15 “Close to being a great work of science fiction.”--New York Times One of the original novels of post-nuclear holocaust America, *The Long Tomorrow* is considered by many to be one of the finest science fiction novels ever written on the subject. The story has inspired generations of new writers and is still as mesmerizing today as when it was originally written. Len and Esau are young cousins living decades after a nuclear war has destroyed civilization as we know. The rulers of the post-war community have forbidden the existence of large towns and consider technology evil. However, Len and Esau long for more than their simple agrarian existence. Rumors of mythical Bartorstown, perhaps the last city in existence, encourage the boys to embark on a journey of discovery and adventure that will call into question not only firmly held beliefs, but the boys’ own personal convictions. “She [Brackett] has created science-fiction to compare with serious mainstream literature.”--New York Herald Tribune

James Fenimore Cooper: The Leatherstocking Tales Vol. 2 (LOA #27) James Fenimore Cooper 1985-07-01 When Cooper’s most memorable hero, Leatherstocking, started an American tradition by setting off into the sunset in *The Pioneers*, one early reader said of his departure, “I longed to go with him.” American readers couldn’t get enough of the *Leatherstocking* saga (collected in two Library of America volumes) and, fourteen years after he portrayed the death of Natty Bumppo in *The Prairie*, Cooper brought him back in *The Pathfinder*, or *The Inland Sea* (1841). During the Seven Years War, just after the events narrated in *The Last of the Mohicans*, Natty brings the daughter of a British sergeant to her father’s station on the Great Lakes, where the French and their Indian allies are plotting a treacherous ambush. Here, for the first time, he falls in love with a woman, before Cooper manages first of *Leatherstocking*’s most poignant, and perhaps his most revealing, escape. *The Deerslayer* (1842) brings the saga full circle and follows the young Natty on his first warpath. Instinctively gifted in the arts of the forest, pious in his respect for the unspoiled wilderness on which he loves to gaze, honorable to friend and foe alike, stoic under torture, and cool under fire, the young *Leatherstocking* emerges as Cooper’s noblest figure of the American frontier. Enacting a rite of passage both for his hero and for the culture he comes to represent, this last book in the series glows with a timelessness that renders everywhere where he will find enchanting. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation’s literary heritage by publishing, and keeping permanently in print, America’s best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

Childhood’s End Arthur C. Clarke 2012-11-30 In the Retro Hugo Award–nominated novel that inspired the *Syfy* miniseries, alien invaders bring peace to Earth—at a grave price: “A first-rate tour de force” (*The New York Times*). In the near future, enormous silver spaceships appear without warning over mankind’s largest cities. They belong to the Overlords, an alien race far superior to humanity in technological development. Their purpose is to dominate Earth. Their demands, however, are surprisingly benevolent: end war, poverty, and cruelty. Their presence, rather than signaling the end of humanity, ushers in a golden age. . . . or so it seems. Without conflict, human culture and progress stagnate. As the years pass, it becomes clear that the Overlords have a hidden agenda for the evolution of the human race that may not be as benevolent as it seems. “Frighteningly logical, believable, and grimly prophetic. . . . Clarke is a master.” —Los Angeles Times

American Antislavery Writings: Colonial Beginnings to Emancipation Various 2012-11-08 For the 150th anniversary of the Emancipation Proclamation, here is a collection of writings that charts our nation’s long, heroic confrontation with its most poisonous evil. It’s an inspiring moral and political struggle whose evolution parallels the story of America itself. To advance their cause, the opponents of slavery employed every available literary form: fiction and poetry, essay and autobiography, sermons, pamphlets, speeches, hymns, plays, even children’s literature. This is the first anthology to take the full measure of a body of writing that spans nearly two centuries and, exceptionally for its time, embraced writers black and white, male and female. Benjamin Franklin, Thomas Paine, Phillis Wheatley, and Olaudah Equiano offer original, even revolutionary, eighteenth century responses to slavery. With the nineteenth century, an already diverse movement becomes even more varied: the impassioned rhetoric of Frederick Douglass and William Lloyd Garrison joins the fiction of Harriet Beecher Stowe, Louisa May Alcott, and William Wells Brown; memoirs of former slaves stand alongside protest poems by John Greenleaf Whittier, Henry Wadsworth Longfellow, and Lydia Sigourney; anonymous editorial/complement speeches by statesmen such as Charles Sumner and Abraham Lincoln. Features helpful notes, a

chronology of the antislavery movement, and a16-page color insert of illustrations.

What Makes This Book So Great Jo Walton 2014-01-21 As any reader of Jo Walton’s *Among Others* might guess, Walton is both an inveterate reader of SF and fantasy, and a chronic re-reader of books. In 2008, then-new science-fiction mega-site *Tor.com* asked Walton to blog regularly about her re-reading—all kinds of older fantasy and SF, ranging from acknowledged classics, to guilty pleasures, to forgotten oddities and gems. These posts have consistently been among the most popular features of *Tor.com*. Now this volumes presents a selection of the best of them, ranging from short essays to long reassessments of some of the field’s most ambitious series. Among Walton’s many subjects here are the Zones of Thought novels of Vernor Vinge; the question of what genre readers mean by “mainstream”; the underappreciated SF adventures of C. J. Cherry; the field’s many approaches to time travel; the masterful science fiction of Samuel R. Delany; Salman Rushdie’s *Midnight’s Children*; the early Hainish novels of Ursula K. Le Guin; and a Robert A. Heinlein novel you have most certainly never read. Over 130 essays in all, *What Makes This Book So Great* is an immensely readable, engaging collection of provocative, opinionated thoughts about past and present-day fantasy and science fiction, from one of our best writers. At the Publisher’s request, this title is being sold without Digital Rights Management Software (DRM) applied.

Emphyrio Jack Vance 2011-11-14 Far in the future, the craftsmen of the distant planet Halma create goods which are the wonder of the galaxy. But they know little of this. Their society is harshly regimented, its religion austere and unforgiving, and primitive - to maintain standards, even the most basic use of automation is punishable by death. When Amiante, a wood-carver, is executed for processing old documents with a camera, his son Ghyll rebels, and decides to bring down the system. To do so, he must first interpret the story of Emphyrio, an ancient hero of Halman legend. All Jack Vance titles in the SF Gateway use the author’s preferred texts, as restored for the Vance Integral Edition (VIE), an extensive project masterminded by an international online community of Vance’s admirers. In general, we also use the VIE titles, and have adopted the arrangement of short story collections to eliminate overlaps.

Daniel Keyes’s beloved *Flowers for Algernon*, winner of the Nebula Award and adapted as the Academy Award-winning movie *Charly*, is told through the journal entries of Charlie Gordon, a young man with severe learning disabilities who is the test subject for surgery to improve his intelligence. Using early manuscripts and original setting copy, this Library of America volume restores the novel to a version that most closely approximates Zelazny’s original text.

Cities In Flight James Blish 2013-12-12 James Blish’s galaxy-spanning masterwork, originally published in four volumes, explores a future in which two crucial discoveries - antivigray devices which enable whole cities to be lifted from the Earth to become giant spaceships, and longevity drugs which enable their inhabitants to live for thousands of years - lead to the establishment of a unique Galactic empire.

Dick, The Library of America now presents a two-volume anthology of nine groundbreaking works from the golden age of the modern science fiction novel, works by turns satiric, adventurous, incisive, and hauntingly lyrical. Critical Terms for Science Fiction and Fantasy Gary K. Wolfe 1986 “The critical vocabulary of the mainstream often give short shrift to the fantastic, and scholars of the fantastic have often had to look elsewhere for their critical terminology.

Such scholars will find Wolfe’s work an excellent resource.” Choice

The Demolished Man Alfred Bester 2018-01-08 #4 in the Millennium SF Masterworks series, a library of the finest science fiction ever written. The first Hugo Award winner for best novel in 1953. “One of the all-time classics of science fiction.”--Isaac Asimov “Bester’s two superb books have stood the test of time. For nearly sixty years they’ve held their place on everybody’s list of the ten greatest sf novels” —Robert Silverberg In a world policed by telepaths, Ben Reich plans to commit a crime that hasn’t been heard of in 70 years: murder. That’s the only option left for Reich, whose company is losing a 10-year death struggle with rival D’Courtney Enterprises. Terrorized in his dreams by The Man With No Face and driven to the edge after D’Courtney refuses a merger offer, Reich murders his rival and bribes a high-ranking telepath to help him cover his tracks. But while police prefect Lincoln Powell knows Reich is guilty, his telepath’s knowledge is a far cry from admissible evidence. Alfred Bester was among the first important authors of contemporary science fiction. His passionate novels of worldly adventure, high intellect, and tremendous verve, *The Stars My Destination* and the Hugo Award winning *The Demolished Man*, established Bester as a s.f. grandmaster, a reputation that was ratified by the Science Fiction Writers of America shortly before his death. Bester also was an acclaimed journalist for *Holiday* magazine, a reviewer for the *Magazine of Fantasy and Science Fiction* and even a writer for *Superman*.

Brain Wave Poul Anderson 2011-09-29 ‘Imagine that tomorrow neurotic response is so accelerated on this earth that an I.Q. of 500 is commonplace, a moron has the thinking capacity of yesterday’s intellectual. Poul Anderson’s detailedly plausible exploration of his theme makes for an unusually satisfying and stimulating book.’

The Mars Project Wernher Von Braun 1953 This classic on space travel was first published in 1953, when interplanetary space flight was considered science fiction by most of those who considered it at all. Here the German-born scientist Wernher von Braun detailed what he believed were the problems and possibilities inherent in a projected expedition to Mars. Today von Braun is recognized as the person most responsible for laying the groundwork for public acceptance of America’s space program. When President Bush directed NASA in 1989 to prepare plans for an orbiting space station, lunar research bases, and human exploration of Mars, he was largely echoing what von Braun proposed in *The Mars Project*.

Shakespeare in America: An Anthology from the Revolution to Now Various 2014-04-01 “The history of Shakespeare in America,” writes James Shapiro in his introduction to this groundbreaking anthology, “is also the history of America itself.” Shakespeare was a central, inescapable part of America’s literary inheritance, and a prism through which crucial American issues—revolution, slavery, war, social justice—were refracted and understood. In tracing the many surprising forms this influence took, Shapiro draws on many genres—poetry, fiction, essays, plays, memoirs, songs, speeches, letters, movie reviews, comedy routines—and on a remarkable range of American writers from Emerson, Melville, Lincoln, and Mark Twain to James Agee, John Berryman, Pauline Kael, and Cynthia Ozick. Americans of the revolutionary era ponder the question “to sign or not to sign;” Othello becomes the focal point of debates on race; the Astor Place riots, set off by a production of *Macbeth*, attest to the violent energies aroused by theatrical controversies; Jane Addams finds in King Lear a metaphor for American struggles between capital and labor. Oscar Welles revolutionizes approaches to Shakespeare with his legendary productions of *Macbeth* and *Julius Caesar*; American actors from Charlotte Cushman and Ira Aldridge to John Barrymore, Paul Robeson, and Marlon Brando reimagine Shakespeare for each new era. The rich and tangled story of how Americans made Shakespeare their own is a literary and historical revelation. As a special feature, the book includes a foreword by Bill Clinton, among the latest in a long line of American presidents, including John Adams, John Quincy Adams, and Abraham Lincoln, who, as the collection demonstrates, have turned to Shakespeare’s plays for inspiration.

The War of 1812: Writings from America’s Second War of Independence Various 2013-04-04 On June 18, 1812, the United States formally declared war for the first time. President James Madison’s call to arms against Great Britain provoked outpourings of patriotic fervor and vigorous—some said treasonous—domestic opposition. Over the next three years the War of 1812 would prove as divisive as it was rich in nationalist myth-making: We have met the enemy, and he is ours . . . Don’t give up the ship! . . . Oh, say can you see . . . Now, on the bicentennial of a conflict that shaped the future of a continent, here is the first comprehensive collection of eyewitness accounts in over a century. Reflecting several generations of scholarly discoveries, it covers all the theaters of war, from frontier battles in Canada, Michigan, and New York to naval confrontations on the high seas and Great Lakes, from the burning of Washington to the defense of New Orleans. Here are 140 letters, memoirs, poems, songs, editorials, journal entries, and proclamations by more than 100 participants, both famous—Thomas Jefferson, Andrew Jackson, Tecumseh, Dolley Madison, and the Duke of Wellington, among others—and less well known, such as Laura Secord, the Canadian Paul Revere, and William B. Northcutt, whose remarkable diary provides a common soldier’s view. Features helpful notes, a chronology of the war, and full color endpaper maps.

Religion in Science Fiction Steven Hrotic 2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction literature. Space travel, futuristic societies, and non-human cultures are traditional themes in science fiction. Speculating on the societal impacts of as-yet-undiscovered technologies is, after all, one of the distinguishing characteristics of science fiction literature. A more surprising theme may be a parallel exploration of religion: its institutional nature, social functions, and the tensions between religious and scientific worldviews. Steven Hrotic investigates the representations of religion in 19th century proto-science fiction, and genre science fiction from the 1920s through the end of the century. Taken together, he argues that these stories tell an overarching story-a ‘metanarrative’-of an evolving respect for religion, paralleling a decline in the belief that science will lead us to an ideal (and religion-free) future. Science fiction’s metanarrative represents more than simply a shift in popular perceptions of religion: it also serves as a model for cognitive anthropology, providing new insights into how groups and identities form in a globalized world, and into how crucial a role narratives may play. Ironically, this same perspective suggests that science fiction, as it was in the 20th century, may no longer exist.
