From this, Wade goes on to outline a new agenda for national and international development policy. The "catch-up" term has rich implications. While it links developing and developed countries, it also defines the socioeconomic mindset common to high-growth societies of Asia. The author's argument differs from neoclassical approaches emphasizing the workings of the market, statist ones emphasizing policy rather than private initiatives, business studies lacking macroeconomic and global perspectives, work by development economists based on agriculture, and World Bank/IMF studies that lack socio-cultural and historical understanding. "The book contributes to a wide range of academic fields, all clearly linked to the central theme of how economies "catch-up": economic and business history, contemporary Asian studies, international political economy, development economics, political science, and economics. It is a rich resource for students and teachers, and it will hold the attention of all who have been interested in the economic and social history of Asia or are interested in the role of institutions and policies in economic success."

A great book full of ideas and knowledge...This book is a must-read for anyone interested in the economics of catching up, the role of institutions and policies in economic success, or the history of Asia.

Joel Mokyr 2016-10-25 Why Enlightenment culture sparked the Industrial Revolution

During the late eighteenth century, innovations in Europe triggered the Industrial Revolution and the sustained economic progress that has characterized the modern world. Why did this period of creative and economic breakthrough occur only in Europe, and not in China, India, or the Islamic world? Joel Mokyr offers a major reinterpretation of the economic and social consequences of the Enlightenment and the dawn of the modern world.

Jeremy Rifkin 2011-10-04 The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has collapsed, and we are running out of fossil fuels.

GMAC (Graduate Management Admission Council) 2017-06-08 A supplement to the Official Guide with 300 additional verbal questions

The GMAT Official Guide 2018 Verbal Review

Zhixuan Wang 2018-09-17 This book primarily focuses on constraints and solutions for energy and electric power development. On the basis of analyses, proposes a planning index of a streamlined regulatory approach. It presents the arguments on potential limitations of the lean manufacturing strategy on one hand and criticism on drifting from the core values of Lean on the other.

Jim Teece 2017-01-15 This book examines the need for a global perspective of the 4th Industrial Revolution, focusing on the convergence of emerging technologies and the need to return to the original vision of the Lean Production System.

Moein Mahdavi 2017-04-11 This book examines the need for a global perspective of the 4th Industrial Revolution, focusing on the convergence of emerging technologies and the need to return to the original vision of the Lean Production System.
