The Pedagogy of Confidence Yvette Jackson

2015-04-24 In her new book, prominent

professional developer Yvette Jackson focuses on students' strengths, rather than their

weaknesses, to reinvigorate educators to inspire learning and high intellectual performance.

Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap. The author seeks to rekindle the belief in

the vast capacity of underachieving urban students, and offers strategies to help educators inspire intellectual performance. Jackson

proposes that a paradigm shift towards a focus on strengths will reinvigorate educators passion for teaching and belief in their ability to raise the intellectual achievement of their students.

Jackson addresses how educators can systematically support the development of motivation, reflective and cognitive skills, and high performance when standards and assessments are predisposed to non-conceptual methods. Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, the influence of new technologies, and language preferences of students.
