Future-proof CALL: language learning as exploration and encounters - short papers from EUROCALL 2018 Manuela Dienst 2018-12-06 The 26th EUROCALL conference was organised by the University of Jyväskylä (FIN) Language Campus and specifically the Language Centre. The theme of this year’s conference was 'Future-proof CALL: language learning as exploration and encounters', which reflects an attempt to envision language teaching and learning futures in a changing world. What brought researchers together this year are shared concerns in relation to the sustainability of language learning and teaching in technology-rich contexts that are marked by ever-increasing complexity. The collection of short papers in this volume is a very thorough view into the conference proper exhibiting the complexity and novelty of the field of CALL.

There are exciting new openings and a more profound exploration of theoretical underpinnings of the contemporary issues in teaching and learning, cross-cultural communication, mobile learning and the like.

Specifications Grading Linda Nilson 2014-10-22 Linda Nilson puts forward an innovative but practical and tested approach to grading—the specifications grading paradigm—which restructures assessments to streamline the grading process and greatly reduce grading time, empower students to choose the level of attainment they want to achieve, reduce antagonism between the evaluator and the evaluated, and increase student engagement to make learning more fun for students. This book provides teachers, supervisors, and administrators with strategies for rethinking the learning process—increasing student motivation, decreasing student stress, and giving them agency in determining their course goals. Among the unique characteristics of the schema, all of which simplify faculty decision making, are the elimination of partial credit, the reliance on a one-level grading rubric and the "bundling" of assignments and tests around learning outcomes. Successfully completing more challenging bundles (or modules) earns a student a higher course grade. Specs grading works equally well in small and large class settings and encourages "authentic assessment," used consistently over time, it can reestablish credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve.
