Marine Biotoxins Hans P. Egmond 2004 This paper provides an extensive review of different aspects of five shellfish-poisoning syndromes (paralytic, diarrhoeic, amnesic, neurologic and azapiracid), as well as one fish-poisoning syndrome (ciguatera fish poisoning), and discusses in detail the causative toxins produced by marine organisms, chemical structures and analytical methods of the toxins, habitat and occurrence of the toxin-producing organisms, case studies and existing regulations. Based on this analysis, risk assessments are carried out for each of the toxins, and recommendations are elaborated to improve the management of these risks in order to reduce the harmful effect of these toxins on public health.

Corporate versus National Interest in US Trade Policy Richard L. Bernal 2020-10-31 This book provides a history of the WTO US-EU banana dispute through the lens of a major actor: the US-owned multinational firm, Chiquita Brands International. It documents and explains how Chiquita succeeded in having the Clinton administration pursue a trade policy of forcing the European Union to dismantle its preferential banana import regime for exports from the small English-speaking Caribbean (ESC) countries. The export of bananas was critically important to the social stability and economic viability of these countries and that was in the national security interest of the United States. The experience indicates that succeeding in this goal was detrimental to U.S. national security interest in the Caribbean.

Tissue Engineering Raj K. Keservani 2022 "This new volume on applications and advances in tissue engineering presents significant, state-of-the-art developments in this exciting area of research. It highlights some of the most important applied research on the applications of tissue engineering along with its different components, specifically different types of biomaterials. It looks at the various issues involved in tissue engineering, including smart polymeric biomaterials, gene therapy, tissue engineering in reconstruction and regeneration of visceral organs, skin tissue engineering, bone and muscle regeneration, and applications in tropical medicines. Covering a wide range of issues in tissue engineering, the volume Provides an overview of the efficacy of the different biomaterials employed in tissue engineering (such as skin regeneration, nerve regeneration, artificial blood vessels, bone regeneration). Looks at smart polymeric biomaterials in tissue engineering Discusses the hybrid approach of tissue engineering in conjunction with gene therapy Explores using tissue engineering in the management of tropical diseases Considers various skin tissue engineering applications, including wound healing methods, skin substitutes and other materials Reports on the use of various biomaterials

in bone and muscle regeneration Describes the use of tissue engineering in reconstruction and regeneration of visceral organs Covers polysaccharides and proteins-based hydrogels for tissue engineering applications Providing an abundance of advanced research and information, Tissue Engineering: Applications and Advancements will be a valuable resource for medical researchers, pharmaceutical manufacturers, healthcare personnel, and academicians"--

The Natural History of a Mountain Year Claude Teancum Barnes 1996 For over thirty years, Claude Barnes, the first president of the Utah Audubon Society, recorded his observations of the flora and fauna of the Wasatch mountains. First published in four slim volumes -- one for each season -- this new one-volume edition combines regional lore and natural history with an intimate picture of nature along the Wastach front.

Act of God Garnet Hall 2016-09-02 Alan Livingston thought he had everything figured out. Graduate from college, got into law and eventually into politics. Until financial reality set in and he had to drop out after only two years. His goals were out of reach and options were few and far between. He hopped from job to job for a while, and tried everything from tree cutting to being a bouncer. Nothing stuck. Finally, he lands something both interesting and challenging. Alan has skills which help him as a private investigator. Respect for people, an unassuming manner, resourcefulness and a knack for finding the truth. Things might work out after all. Then he got a call in the middle of the night. At the airport in Lexington, Kentucky, Alan grabs his suitcase and rushes to get a car to investigate - a plane crash? What he finds will stay with him a long time.

Republic of Latvia International Monetary Fund. European Dept. 2019-08-07 This Selected Issues paper analyses the implications of global value chains (GVC) participation for Latvia's competitiveness and exposure to risks. Using a structural model, it assesses Latvia's competitiveness through different real effective exchange rate (REER) measures and examines the main factors behind differences in the measures. Based on this analysis, the paper suggests policy options to strengthen Latvia's competitiveness. The paper also estimates the impact of an appreciation of the GVC related REER measure on value added export growth and real GDP growth, and finds sizable effects, suggesting that a rapid labor market tightening could lead to erosion in competitiveness and reduction in growth. Finally, trade tension induced tariff hikes may have significant cost for Latvia, especially in terms of value added produced in the country. Trade tension induced tariff hikes are likely to have moderate costs for Latvia in terms of value added produced in the country. In this regard, policies aimed at enhancing product sophistication or quality and export market diversification could mitigate Latvia's exposure to trade shocks in GVCs.

Modern Electric, Hybrid Electric, and Fuel Cell Vehicles Mehrdad Ehsani 2018-02-02 "This book is an introduction to automotive technology, with specific reference to battery electric, hybrid electric, and fuel cell electric vehicles. It could serve electrical engineers who need to know more about automobiles or automotive engineers who need to know about electrical propulsion systems. For example, this reviewer, who is a specialist in electric machinery, could use this book to better understand the automobiles for which the reviewer is designing electric drive motors. An automotive engineer, on the other hand, might use it to better understand the nature of motors and electric storage systems for application in automobiles, trucks or motorcycles. The early chapters of the book are accessible to technically literate people who need to know something about cars. While the first chapter is historical in nature, the second chapter is a good introduction to automobiles, including dynamics of propulsion and braking. The third chapter discusses, in some detail, spark ignition and compression ignition (Diesel) engines. The fourth chapter discusses the nature of transmission systems." —James Kirtley, Massachusetts Institute of Technology, USA "The third edition covers extensive topics in modern electric, hybrid electric, and fuel cell vehicles, in which the profound knowledge, mathematical modeling, simulations, and control are clearly presented. Featured with design of various vehicle drivetrains, as well as a multi-objective optimization software, it is an estimable work to meet the needs of automotive industry." —Haiyan Henry Zhang, Purdue University, USA "The extensive combined experience of the authors have produced an extensive volume covering a broad range but detailed topics on the principles, design and architectures of Modern Electric, Hybrid Electric, and Fuel Cell Vehicles in a well-structured, clear and concise manner. The volume offers a complete overview of technologies, their selection, integration & control, as well as an interesting Technical Overview of the Toyota Prius. The technical chapters are complemented with example problems and user guides to assist the reader in practical calculations through the use of common scientific computing packages. It will be of interest mainly to research postgraduates working in this field as well as established academic researchers, industrial R&D engineers and allied professionals." —Christopher Donaghy-Sparg, Durham University, United Kingdom The book deals with the fundamentals, theoretical bases, and design methodologies of conventional internal combustion engine (ICE) vehicles, electric vehicles (EVs), hybrid electric vehicles (HEVs), and fuel cell vehicles (FCVs). The design methodology is described in mathematical terms, step-by-step, and the topics are approached from the overall drive train system, not just individual components. Furthermore, in explaining the design methodology of each drive train, design examples are presented with simulation results. All the chapters have been updated, and two new chapters on Mild Hybrids and Optimal Sizing and Dimensioning and Control are also included • Chapters updated throughout the text. • New homework problems, solutions, and examples. • Includes two new chapters. • Features accompanying MATLAB software.

Towards the Elimination of Rabies in Eurasia Betty Dodet 2008 This volume presents the proceedings of the second conference on rabies organized by the World Organisation for Animal Health in collaboration with the World Health Organization and the European Union in May 2007. Up-to-date information on rabies epidemiology in humans and animals throughout Europe, The Middle East and Asia, and the most recent data on rabies virus and its structure, as well as the basic mechanisms of rabies infection are included here. Experts in the field present their experience and opinions on the prevention and control of rabies in dogs, wildlife including bats, and the most recent developments in rabies prevention and management in humans. Further presentations address advances in technology, diagnosis and vaccine development. To conclude, resolutions and recommendations are given in English, French and Russian for the elimination of rabies not only in Europe and Asia, but also the rest of the world. This book is highly valuable to regulatory veterinary services, public health services, medical and veterinary practitioners, scientists and researchers interested in combating this neglected disease, which kills more than 50,000 persons annually, mainly children. Rabies elimination is at hand, through a 'One Health' strategic collaboration between veterinary and human health authorities, political will and community involvement, and application of the knowledge gained from this volume.

Mechanization of Horticulture Suresh Chander Mandhar 2014-01-01 "The Book entitled " Mechanization of Horticulture" deals with different operations for production and post-harvest processing and management of horticultural crops and commodities. This book is essentially a Monograph which has been divided into 16 chapters. Chapters I and II summaries the current horticultural scenario as well as status of agricultural mechanization in india. Chapter III through XII deal with various operations, viz. seed bed preparation, planting, nursery raising, soil working tools transplanting of seedlings weeding and mulching, pruning, spraying and harvesting. Information regarding different types of equipment available in India and abroad has been included in these chapters. The last three chapters viz. chapters XIII through XVI deal with packaging of horticultural produce post harvest management and storage, green house design and construction as well as irrigation systems. Thus, it will serve as a useful reference book for teachers, researchers, extension workers, farmers, students as well as other state holder."

Weapon Systems Handbook 2020-05-03 July 2019 Printed in BLACK AND WHITE The Army's Weapon Systems Handbook was updated in July 2019, but is still titled "Weapon Systems Handbook 2018." We are printing this in black and white to keep the price low. It presents many of the acquisition programs currently fielded or in development. The U.S. Army Acquisition Corps, with its 36,000 professionals, bears a unique responsibility for the oversight and systems management of the Army's acquisition lifecycle. With responsibility for hundreds of acquisition programs, civilian and military professionals collectively oversee research, development and acquisition activities totaling more than \$20 billion in Fiscal Year 2016 alone. Why buy a book you can download for free? We print this so you don't have to. We at 4th Watch Publishing are former

government employees, so we know how government employees actually use the standards. When a new standard is released, somebody has to print it, punch holes and put it in a 3-ring binder. While this is not a big deal for a 5 or 10-page document, many DoD documents are over 400 pages and printing a large document is a time-consuming effort. So, a person that's paid \$25 an hour is spending hours simply printing out the tools needed to do the job. That's time that could be better spent doing mission. We publish these documents so you can focus on what you are there for. It's much more cost-effective to just order the latest version from Amazon.com. An Innocent Abroad J. Hillis Miller 2015-11-30 Since 1988, J. Hillis Miller has traveled to China to lecture on literary theory, especially the role of globalization in literary theory. Over time, he has assisted in the development of distinctively Chinese forms of literary theory, Comparative Literature, and World Literature. The fifteen lectures gathered in *An Innocent Abroad* span both time and geographic location, reflecting his work at universities across China for more than twenty-five years. More important, they reflect the evolution of Miller's thinking and of the lectures' contexts in China as these have markedly changed over the years, especially on either side of Tiananmen Square and in light of China's economic growth and technological change. A foreword by the leading theorist Fredric Jameson provides additional context.
