Essentials of Accounting for Governmental and Not-for-Profit Organizations Paul Copley 2017-01-25 Copley’s Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

Handbook of Research on Big Data Storage and Visualization Techniques Sepgl, Richard S. 2018-01-05 The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries. Challenges associated with the analysis, security, sharing, storage, and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data. The Handbook of Research on Big Data Storage and Visualization Techniques is a critical scholarly resource that explores big data analytics and technologies and their role in developing a broad understanding of issues pertaining to the use of big data in multidisciplinary fields. Featuring coverage on a broad range of topics, such as architecture patterns, programming systems, and computational energy, this publication is geared towards professionals, researchers, and students seeking current research and application topics on the subject.

Loose Leaf for Auditing & Assurance Services Jay C. Thibodeau 2017-02-03 As auditors, we are trained to investigate beyond appearances to determine the underlying facts—in other words, to look beneath the surface. From the Enron and WorldCom scandals of the early 2000s to the financial crisis of 2007-2008 to present-day issues and challenges related to significant estimation uncertainty, understanding the auditor’s responsibility related to fraud, maintaining a clear perspective, probing for details, and understanding the big picture are indispensable to effective auditing. With the availability of greater levels of qualitative and quantitative information (“big data”), the need for technical skills and challenges facing today’s auditor is greater than ever. The author team of Louwers, Blay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition of Auditing & Assurance Services, supplying the necessary investigative tools for future auditors.
