Eat Drink Vote Marion Nestle 2013-09-03 What's wrong with the US food system? Why is half the world starving while the other half battles obesity? Who decides our food issues, and why can't we do better with labeling, safety, or school food? These are complex questions that are hard to answer in an engaging way for a broad audience. But everybody eats, and food politics affects us all. Marion Nestle, whom Michael Pollan ranked as the #2 most powerful foodie in America (after Michelle Obama) in Forbes, has always used cartoons in her public presentations to communicate how politics—shaped by government, corporate marketing, economics, and geography—influences food choice. Cartoons do more than entertain; the best get right to the core of complicated concepts and powerfully convey what might otherwise take pages to explain. In Eat Drink Vote, Nestle teams up with The Cartoonist Group syndicate to present more than 250 of her favorite cartoons on issues ranging from dietary advice to genetic engineering to childhood obesity. Using the cartoons as illustration and commentary, she engagingly summarizes some of today's most pressing issues in food politics. While encouraging readers to vote with their forks for healthier diets, this book insists that it's also necessary to vote with votes to make it easier for everyone to make healthier dietary choices.

Renegade Marketing Drew Neisser 2021-10-05 Marketing has become ridiculously complicated, but yours doesn't have to be. With decades of hands-on experience, expert strategist and writer Drew Neisser has witnessed the dramatic evolution of business-to-business marketing. Working alongside giant brands like IBM, as well as startups and mid-size companies, and interviewing over four hundred top practitioners, Neisser uncovered the top four characteristics that all successful marketers have in common: they are Courageous, Artful, Thoughtful, and Scientific (CATS). These four characteristics form the basis for the framework in Renegade Marketing. Over the years, Neisser created a twelve-step formula to radically simplify B2B marketing and build an unbeatable brand. In his book, he shares the stories of marketing CATS as he gives you the tools to: Walk through a highly refined discovery process that culminates in finding your brand's purpose Define your company's purpose in eight words or fewer Build team support for new marketing initiatives while establishing your unique brand story, voice, and design Assemble effective marketing plans that engage employees, inspire customers, and attract new business Drive perpetual growth by creating a culture with metrics, marketing technology, and experimentation

District Laboratory Practice in Tropical Countries, Part 1 Monica Cheesbrough 2005-09-08 This new edition includes an update on HIV disease/AIDS, recently developed HIV rapid tests to diagnose HIV infection and screen donor blood, and current information on antiretroviral drugs and the laboratory monitoring of antiretroviral therapy. Information on the epidemiology and laboratory investigation of other pathogens has also been brought up to date. Several new, rapid, simple to perform immunochromatographic tests to assist in the diagnosis of infectious diseases are described, including those for brucellosis, cholera, dengue, leptospirosis, syphilis and hepatitis. Recently developed IgM antibody tests to investigate typhoid fever are also described. The new classification of salmonellae has been introduced. Details of manufacturers and suppliers now include website information and e-mail addresses. The haematology and blood transfusion chapters have been updated, including a review of haemoglobin measurement methods in consideration of the high prevalence of anaemia in developing countries. "The volume is packed with much valuable information, which is presented in a format that is readily readable. There are ample clear illustrations, tables and photographs to render the various information easy to digest. The authors have succeeded in producing a work that will fulfil an important need for developing countries. I highly recommend this book, with its Part I counterpart, to anyone with an interest in the practice of laboratory medicine." Pathology "...District Laboratory Practice in Tropical Countries sets the gold standard, and is an essential read and reference for anyone engaged in clinical laboratory practice in the tropics." Phase Diagrams and Thermodynamic Modeling of Solutions Arthur D. Pelton 2018-09-19 Phase Diagrams and Thermodynamic Modeling of Solutions provides readers with an understanding of thermodynamics and phase equilibria that is required to make full and efficient use of these tools. The book systematically discusses phase diagrams of all types, the thermodynamics behind them, their calculations from thermodynamic databases, and the structural models of solutions used in the development of these databases. Featuring examples from a wide range of systems including metals, salts, ceramics, refractories, and concentrated aqueous solutions, Phase Diagrams and Thermodynamic Modeling of Solutions is a vital resource for researchers and developers in materials science, metallurgy, combustion and energy, corrosion engineering, environmental engineering, geology, glass technology, nuclear engineering, and other fields of inorganic chemical and materials science and engineering. Additionally, experts involved in developing thermodynamic databases will find a comprehensive reference text of current solution models. Presents a rigorous and complete development of thermodynamics for readers who already have a basic understanding of chemical thermodynamics Provides an in-depth understanding of phase equilibria Includes information that can be used as a text for graduate courses on thermodynamics and phase diagrams, or on solution modeling Covers several types of phase diagrams (paraequilibrium, solidus projections, first-melting projections, Scheil diagrams, enthalpy diagrams), and more

Raw Materials Supply Chain for Rubber Products John S. Dick 2014-06-30 The rubber industry is a vital part of the world economy. In this age of constantly changing economics and raw material "shortages of the week," this book should help the reader understand the overall technical and economic problems that are emerging which are beginning to affect the overall availability of many raw materials, chemical intermediates and final rubber products on the world scene. This book is truly unique in that it is the only one that traces all the important organic and inorganic synthesis routes for the manufacture of synthetic rubbers, various fillers, plasticizers, oils, curatives, antidegradants, adhesion promoters, flame retardants, tackifiers, and blowing agents through their respective intermediates to the base raw materials from earth extractions and agriculture.

Fibre2Fashion - Textile Magazine - November 2018 Fibre2Fashion 2018-11-01 Sri Lanka, as an apparel exporting country, stands out on two counts. First, the apparel export sector is virtually synonymous with quality. The second aspect is its own vibrant fashion ecosystem. The November 2018 issue of Fibre2Fashion looks at trends and challenges of Sri Lanka’s apparel exports. The realities are much different in Ethiopia, the other country that features in this issue. Trade event Green Fashion India, and Q&A with footwear brands VOR and Simone Castelletti as well as other regular features are also covered. Fibre2Fashion magazine—the print venture of Fibre2Fashion.com since 2011—is circulated among a carefully-chosen target audience globally, and reaches the desks of top management and decision-makers in the textiles, apparel and fashion industry. As one of India’s leading industry magazines for the entire textile value chain, Fibre2Fashion Magazine takes the reader beyond the mundane headlines, and analyses issues in-depth.

Plunkett's Energy Industry Almanac 2006 Jack W. Plunkett 2005

The energy industry is boiling over with changes. Deregulation, new opportunities in foreign fields and markets and environmental challenges are rushing together head-on to shape the energy and utilities business of the future. Extremely deep offshore wells in the Gulf of Mexico and offshore of West Africa are being drilled at immense cost. Meanwhile China has become a major energy importer and Russia has become a major exporter. In the U.S., Europe and Japan, renewable and alternative energy sources are developing quickly, including big breakthroughs in wind power and fuel cells. This exciting new reference book covers everything from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil field services and engineering. Petroleum topics include upstream and downstream. Additional topics include coal, natural gas and LNG. More than a dozen statistical tables cover everything from energy consumption, production and reserves to imports, exports and prices. Next, our unique profiles of the Energy 500 Firms are also included, with such vital details as executive contacts by title, revenues, profits, types of business, web sites, competitive advantage, growth plans and more. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.
