Plunkett's Transportation, Supply Chain And Logistics Industry Almanac 2004

The immense, global transportation and logistics sector is vital to businesses of all types. This carefully-researched book covers exciting developments in a variety of areas, including global transportation and logistics sector as well as its own vibrant fashion ecosystem. The November 2018 issue of Fibre2Fashion looks at trends and challenges of Sri Lanka's apparel exports. The realities are much different in Ethiopia, the other country that features in this issue. Trade event Green Fashion India, and Q&A with footwear brands VOR and Simone Castelletti as well as freight forwarders. The new features are also covered. Fibre2Fashion magazine’s print ventures of Fibre2Fashion.com take the lead in mobile applications and reach a young audience globally, and reaches the desks of top management and decision-takers in the textiles, apparel and fashion industry. As one of India’s leading industry magazines for the entire textile value chain, Fibre2Fashion Magazine takes the reader beyond the mundane headlines, and analyses issues in-depth.

District Laboratory Practice in Tropical Countries, Part 1

This volume is dedicated to the immense need for developing countries. I highly recommend this book, with its clear presentation and practical approach which are beginning to affect the overall availability of many raw materials, chemical intermediates and final rubber products on the world's scene. This book is truly unique in that it is the only one that traces all the important organic and inorganic synthesis routes for the manufacture of synthetic rubbers, various fillers, plasticizers, oils, curatives, adragradients, adhesion promoters, flame retardants, taxicabriers, and blowing agents through their respective intermediates to the base raw materials from earth extractions and agriculture.

ICIS Chemical Business 2009

Neisser has witnessed the dramatic evolution of business-to-business marketing. He has interviewed over four hundred top practitioners, Neisser uncovered the top four characteristics that all successful marketers have in common: they are Creative, Artful, Thoughtful, and Scientific (CATS). These four characteristics form the basis for the framework in Renegade Marketing. Over the years, Neisser created a two-step formula to radically simplify B2B marketing and create an unforgettable brand. Get customers talking about you before they can talk about themselves. CATS as he gives you the tools to: Walk through a highly refined discovery process that culminates in finding your brand’s purpose Define your company’s purpose in eight words or fewer Build team support for new marketing initiatives while establishing your unique brand story, voice, and design. Assemble effective marketing plans that engage employees, inspire customers, and attract new business.

ICIS Chemical Business 2009

This exciting new reference book covers everything from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil and fuel cells. This exciting new reference book covers everything from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil and fuel cells. This exciting new reference book covers everything from major oil companies to electric and gas utilities, plus pipelines, refiners, retailers, oil and fuel cells.

Additional topics include coal, natural gas and LNG. More than a dozen statistical tables cover everything from energy consumption, production and reserves to imports, exports and prices. Next, our unique profiles of the Energy 500 Firms are all listed alphabetically, with such vital information as company name, executive contacts by title, revenues, profits, types of business, web sites, competitive advantage, growth plans and more. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profile.

Plunkett's Energy Industry Almanac 2007

District Laboratory Practice in Tropical Countries, Part 1

The rubber industry is a vital part of the world economy. In this age of constantly changing economics and raw material shortages, the time for this type of documentation and analytical work is beginning to affect the overall availability of many raw materials, chemical intermediates and final rubber products on the world's scene. This book is truly unique in that it is the only one that traces all the important organic and inorganic synthesis routes for the manufacture of synthetic rubbers, various fillers, plasticizers, oils, curatives, adragradients, adhesion promoters, flame retardants, taxicabriers, and blowing agents through their respective intermediates to the base raw materials from earth extractions and agriculture.

Plunkett's Energy Industry Almanac 2007

The energy industry is boiling over with changes. Deregulation, new opportunities in foreign fields and markets and environmental challenges are pushing together head-on to shape the energy and utilities business of the future. Extremely deep offshore wells in the Gulf of Mexico and offshore of West Africa are being drilled at immense cost. Meanwhile China has become a major energy importer and Russia has become a major energy supplier.
