**Developing Creativity in Higher Education** Norman Jackson 2006-11-22 Graduates face a world of complexity and diversity, demanding flexibility, adaptability, self-reliance and innovation, but while the development of creativity is embedded in the English National Curriculum and in workplace training, the higher education sector has yet to fully recognise its importance. This book highlights how pressures such as quality assurance, peer review systems, demands for greater efficiency and increased research output are effectively discouraging innovation and creativity in higher education. It makes a bold case for the integration of creativity in higher education, drawing together contributors and research from around the world and explores valuable lessons learnt from those working in schools and professional organisations. Offering a wealth of advice on how to foster creativity on an individual and an institutional level, this book encourages learners to engage with the ideas and practice involved in helping students to be creative in all areas of their study.

Factors contributing to academic performance of students in a Junior High School Anthony Abaidoo 2018-11-22 Bachelor Thesis from the year 2018 in the subject Pedagogy - School System, Educational and School Politics, grade: 5 (GHA-System), University of Education (Distance Learning), course: Post Graduate Diploma in Education, language: English, abstract: Students’ academic performance is a key feature in education. This study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of Junior High Students (JHS) in a Basic School which is in the Gomo-East District in the Central Region of Ghana. The mixed and descriptive research design was used and a sample size of 87 respondents (79 students and 8 teachers) were selected through random sampling technique. The findings revealed that the average academic performance (47.0%) of the JHS students in the Basic School is weak and their performance in Mathematics (average score of 31.40%) and English Language (average score of 39.90%) is a fail. It was noticed that student factors that contribute to an improvement in academic performance include; regular studying, self-motivation, punctuality and regular class attendance, hard-work and interest in a subject. The teacher factors were completion of syllabus, use of TLM’s, frequent feedback to students and given students special attention. Per the findings, parent factors which was very key was parent showing concern in their children’s academics and providing them their academic needs. School factors that were significant included availability of text books and TLM’s. The study also found that parent level of education and gender has a positive relationship with academic performance but it’s insignificant. However, age has a positive significant (5% significance level) relationship with academic performance. Based on findings, the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance. Again, the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days.

The **Impacts of Language and Literacy Policy on Teaching Practices in Ghana** Philomena Osseo-Asare 2021-03-16 This text critically examines changes in Ghanaian language and literacy policy following independence in 1957 to consider its impacts on early literacy teaching. By adopting a postcolonial theoretical perspective, the text interrogates the logic behind policy changes which have prioritised English in favour of other official and vernacular languages to inform policy formulation. It is based on papers presented at the Third International Conference of the European Science Education Research Association (Thessaloniki, Greece, August 2001). 

The book is based on the research conducted by the editor and is intended for researchers, policymakers, and practitioners. It offers an in-depth analysis of the impacts of language and literacy policies on teaching practices in Ghana, and provides insights into how these policies can be improved. It is a valuable contribution to the field of Science Education in Ghana.

**Teaching for Experiential Learning** Scott D. Wurdinger 2009-12-16 This book describes how to change the way in which educators conduct business in the classroom. Our current educational systems lack ways to reach today's learners in relevant, meaningful ways. The five approaches in this book inspire and motivate students to learn. The authors provide in-depth descriptions into these overlapping approaches for experiential learning: active learning, problem-based learning, project-based learning, service learning, and place-based education. Each of these five approaches includes an element of student involvement and attempts to engage students in solving problems. The chapters are presented in a consistent, easy-to-read format that provides descriptions, history, research, ways to use the approach, and resources. This book will help educators transform students into dynamic learning environments.

**Training Complex Cognitive Skills Jeroen J. G. van Merrienboer 1997** LYSISTRATA (Annotated) Aristophanes 2021-10-17 Lysistrata is the greatest work by Aristophanes. This blank and rash statement is made that it may be rejected. But first let it be understood that I do not mean it is a better written work than the Birds or the Frogs, or that (to descend to the scale of values that will be naturally imputed to me) it has any more appeal to the collectors of "curious literature" than the Ecclesiazusae or the Thesmophoriazusae. On the mere grounds of taste I can see at an absolutely equal rate of case made out for the Birds. That brightly plumaged fantasy has an aerial wit and colour all its own.

**Student Engagement and Achievement in American Secondary Schools** Fred M. Newmann 1992 In 1985 the federal government funded two 5-year centres to conduct research on effective schools. Student Engagement and Achievement in American Secondary Schools presents the findings of one of these studies, as carried out by the National Center of Effective Secondary Schools located at the University of Wisconsin-Madison. Editor Fred M. Newmann and the other contributors to this study examine existing research, detail their own findings, and propose concrete strategies for improving students' achievement in secondary schools.

**Transformative Research and Evaluation** Donna M. Mertens 2008-10-29 From distinguished scholar Donna M. Mertens, this core book provides a framework for making methodological decisions and conducting research and evaluations that promote social justice. The transformative paradigm has emerged from - and guides - a broad range of social and behavioral science research projects with communities that have been pushed to the margins, such as ethnic, racial, and sexual minority group members and children and adults with disabilities. Mertens shows how to formulate research questions based on community needs, develop researcher-community partnerships grounded in trust and respect, and skillfully apply quantitative, qualitative, and mixed-methods data collection strategies. Practical aspects of analyzing and reporting results are addressed, and numerous sample studies are presented. An ideal core book for graduate courses, or practitioner resource, the book includes: Commentary on the sample studies that explains what makes them transformative. Explanations of key concepts related to oppression, social justice, and the role of research and evaluation. Questions for Thought to stimulate critical self-reflection and discussion. Advance chapter organizers and chapter summaries. The book is intended for graduate students in psychology, education, social work, sociology, and nursing, as well as practicing researchers and program evaluators. It will serve as a core book or supplement in Research Methods, Program Evaluation, and Community Psychology courses.

**Beyond Growth** Herman E. Daly 2014-09-30 "Daly is turning economics inside out by putting the earth and its diminishing natural resources at the center of the field... a kind of reverse Copernican revolution in economics." --Ute Reader "Considered by most to be the dean of ecological economics, Herman E. Daly elegantly topples many shibboleths in Beyond Growth. Daly challenges the conventional notion that growth is always good, and he buck environmental orthodoxy, arguing that the current focus on 'sustainable development' is misguided and that the phrase itself has become meaningless." --Mother Jones 'In Beyond Growth, ... [Daly] derides the concept of 'sustainable growth' as an oxymoron. ... Calling Mr. Daly 'an unsung hero,' Robert Goodland, the World Bank's top environmental adviser, says, 'He has been a voice crying in the wilderness.'" --G. Pascal Zachary, The Wall Street Journal "A new book by that most far-seeing and heretical of economists, Herman Daly. For 25 years now, Daly has been thinking through a new economics for the wealth of nature, the value of community and the necessity for morality." --David H. Montgomery, Los Angeles Times "For Fiscal 2011, Herman Daly has no peer among contemporary economists... Beyond Growth is essential reading." --David W. Orr, Oberlin College "There is no more basic ethical question than the one Herman Daly is asking." --Hai Kahn, The San Jose Mercury News "Daly's critiques of economic orthodoxy... deliver a powerful and much-needed jolt to conventional thinking." --Karen Pennar, Business Week Named one of a hundred "visionaries who could change your life" by the Utne Reader, Herman Daly is the recipient of many awards, including a Grawemeyer Award, the Heineken Prize for environmental science, and the "Alternative Nobel Prize," the Right Livelihood Award. He is professor at the University of Maryland's School of Public Affairs, and coauthor with John Cobb, Jr., of For the Common Good.

A *Junior Graphic* Mavis Kitcher (Mrs) 2014-03-12 The Undoing Project: A Friendship that Changed Our Minds Michael Lewis 2016-12-06 "Brilliant... Lewis has given us a spectacular account of two great men who faced up to uncertainty and the limits of human reason."--William Easterly, Wall Street Journal Forty years ago, Israeli psychologists Daniel Kahneman and Amos Tversky wrote a series of breathtakingly original papers that invented the field of behavioral economics. One of the greatest partnerships in the history of science, Kahneman and Tversky’s extraordinary friendship incited a revolution in Big Data studies, advanced evidence-based medicine, led to a new approach to government regulation, and made much of Michael Lewis’s own work possible. In The Undoing Project, Lewis shows how their Nobel Prize-winning theory of the mind altered our perception of reality.

Cheating in College

Donald L. McCabe 2012-09-11

Today's students are tomorrow's leaders, and the college years are a critical period for their development of ethical standards. Cheating in College explores how and why students cheat and what policies, practices, and participation may be useful in promoting academic integrity and reducing cheating. The authors investigate trends over time, including internet-based cheating. They consider personal and situational explanations, such as the culture of groups in which dishonesty is more common (such as business majors) and social settings that support cheating (such as fraternities and sororities). Faculty and administrators are increasing their efforts to promote academic honesty among students. Orientation and training sessions, information on college and university websites, student handbooks that describe codes of conduct, honor codes, and course syllabi all define cheating and establish the consequences. Based on the authors' multiyear, multisite surveys, Cheating in College quantifies and analyzes student cheating to demonstrate why academic integrity is important and to describe the cultural efforts that are effective in restoring it. -- Gary Pavela, Syracuse University

Effective Teaching Methods

Gary D. Borich 2013-05-22

Parentology

Dalton Conley 2014-03-18

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley humorously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
