Symbiotic Interaction

Luciano Gamberini

2020-10-08

This book constitutes the proceedings of the 5th International Workshop on Symbiotic Interaction, Symbiotic 2020, held in Padua, Italy, in October 2020. The 12 full papers and 3 short papers presented in this volume were carefully reviewed and selected from 23 submissions. The idea of symbiotic systems put forward in this workshop capitalizes on the complexity and flexibility to identify and design the interdependent and co-evolved psycho-physiological states and thereby enhancing human-computer interaction (HCI). The papers present an overview of the symbiotic relationships between humans and computers with emphasis on human-computer interaction, learning, adaptive systems, implicit input data, physiological computing and BCI, but also on understanding the nature of the interdependence and agency between computers and humans. This workshop is the first to publish papers focused on symbiotic human-computer interaction, pursuant to a Creative Commons license permitting commercial use. All rights not granted elsewhere.

**Global Tax Fairness** Thomas Pogge 2016-02-04 This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.
