The Vacuum Cleaner Carroll Gantz 2012-09-26 House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

The Practical Mechanic’s Journal 1866 Laboratory Techniques in Thrombosis - A Manual J. Jespersen 2000-06-30 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures. This completely revised new edition combines the strengths of the first edition with new and useful features. Laboratory Techniques in Thrombosis - A Manual still gives detailed descriptions of the recommended assays and their alternatives. However, the manual now has a broader scope because it is no longer limited by the frontiers of ECAT. Experts all over the world have contributed to this edition. Furthermore, new assays have been introduced, improvements have been suggested for other assays, while a few others have become redundant or no longer available. The list of manufacturers is fully updated and a list of the recommended nomenclature of quantities in thrombosis and haemostasis is new to this edition, further facilitating the use of this manual. Laboratory Techniques in Thrombosis - A Manual will contribute to furthering the much needed harmonization and standardization of tests within the field and should have a place in all working haemostasis laboratories.
