So I offer you The Greek Village colouring book. Half of the images I have drawn, and the others I feel a better job of the subject than I could do myself. I love to draw but these days all my time is taken by writing The Greek Village series - a positive, feel-good set of books set under warm skies. Consequently I did not feel I could bring out a drawing book without scoring a few stories in between the images, just short enough to be read in one gulp and leave you smiling, or contemplating, or both. As Sophie sets out to construct a new life for herself, Anna’s husband, Detective-Sergeant Jack Mezzonato calls on them both to consult on two new cases: the wife of a prominent physician has disappeared into thin air, and the corpse of a young woman is found with baffling wounds that suggest a killer is on the loose. In New York it seems that the advancement of women has brought out the worst in some men. Unable to ignore the plight of New York’s less fortunate, these intrepid cousins draw on all resources to protect their patients.

Each site account begins with a locater map and info detailing timing, key species etc. This is followed by an informative and readable account by the expert author (who has personally visited nearly all of the sites covered) accompanied by a handful of stunning images of each location showing off the displays of flowers. In addition there are chapters on the animal life that can be found at these sites, and on the conservation status of the locations covered in the book. Many people travel widely in search of spectacular displays of flowers, but are guided only by word-of-mouth information, or by what organised tours are available. This book sets out to rectify this gap. However, it aims to be much more: the most ‘flowerly’ places in the world are exceptionally spectacular at their best, and the beautiful photography in the book allows a broad audience to enjoy these sights without even leaving the house.
