Did you know . . . -Training at a vocational school, college, or university is increasingly important for getting a job as a travel agent? -A physician assistant’s working conditions can vary from regular hours in an office setting to long periods of standing in an operating room? -Accountants and auditors, budget officers, credit analysts, loan officers, and underwriters have training and skills similar to those of financial managers? -Boilermakers often use potentially dangerous equipment, such as acetylene torches and power grinders, handle heavy parts, and work on ladders or on top of large vessels?

**Boiler Operator's Handbook, Second Edition** P.E. Heselton 2020-11-26 This book was written specifically for boiler plan operators and supervisors who want to learn how to lower plant operating costs, as well as how to operate plants of all types and sizes more wisely. It is newly revised with guidelines for HRSGs, combined cycle systems, and environmental effects of boiler operation. Also included is a new chapter on refrigeration systems that addresses the environmental effects of inadvertent and intentional discharges of refrigerants. Going beyond the basics of "keeping the pressure up," the author explains in clear terms how to set effective priorities to ensure optimal plant operation, including ensuring safety and continuity of operations, preventing damage, managing environmental impact, training replacement plant operators, logging and preserving historical data, and operating the plant economically.
