**From Testing to Assessment** Clifford Hill 2014-09-19 From Testing to Assessment: English as an International Language provides a critical review of conventional and alternative approaches to the assessment of English literacy skills in various parts of the world. It presents empirical studies conducted in three major settings: in countries such as Japan and Brazil where English functions as the language of international commerce; in multilingual countries such as Nigeria and Zimbabwe where English is the national language of education and government; and in such countries as Canada, the United Kingdom and the United States where English is the dominant language. The book opens with a discussion of language assessment in relation to debates about the nature of literacy; it concludes with a discussion of policy implications, which is grounded in
literacy theory as well as in practical constraints such as available human and material resources.

The Early Years Ian Hunter 2012-05-01 In his Early Years, John is walking down a road with his German grandfather in post-war Berlin. At six years old, he moves to the UK, goes to school and finds himself challenged in various ways. When he is almost eighteen, he runs away from what purports to be home. Education eludes him for a long time. As adulthood takes over, relationships come and go. John moves overseas. He does quite well in his working life; less so personally. Depression comes and goes, as does determination and self-help. But the ultimate support comes from a surprising source, which starts a whole new story: his later years! The book, which conveys three stages to John's life, is an attempt to understand the external forces that buffeted this being. How he responded impacted himself, and inevitably others, most of whom were innocent participants in this particular journey. The fundamental assertion, however, is that the past bears heavily on the future.
