students majoring in computer science and engineering, graduate students in all engineering departments, and software engineers and researchers in academic and industrial fields. To obtain instructor materials please send an email to pressbooks@ieee.org. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook.

The National Short Line Railroad Database Project, 1996-1997 Trent Byberg 1997

The USB Flash Drive Database Project 2003-01-28 Trent Byberg 2003

EXPERT DATABASE SYSTEMS PRACTICE PAKAJA 2005 is an excellent introduction to database systems and technologies. As the database has evolved into a product competitive with proprietary counterparts like Oracle and IBM DB2, MySQL has found favor with large scale corporate users who require high-powered features and performance. Expert DATABASE SYSTEMS PRACTICE PAKAJA 1997 is the first book to dive deep into the MySQL architecture, showing users how to make the most of the database through creation of custom indexes, optimization of MySQL's query execution, and management of MySQL's transactions. The book will interest users deploying MySQL in high-traffic environments and in situations requiring minimal resource allocation.
