**Fair Labor Lawyer** Marlene Trestman 2020-09-02 Supreme Court advocate Bessie Margolin (1909–1996) molded modern American labor policy while creating a space for female lawyers in the nation's high courts. In this comprehensive biography, Marlene Trestman reveals the forces that shaped Margolin's remarkable journey—beginning in a New Orleans Jewish orphanage—and illuminates the public and private life of this trailblazing woman. Margolin launched her career in the early 1930s, when only 2 percent of America's attorneys were female and far fewer were Jewish or from the South. Among other numerous accomplishments, she defended the constitutionality of the New Deal's Tennessee Valley Authority, drafted rules establishing American military tribunals for Nazi war crimes, and shepherded through the courts the Fair Labor Standards Act of 1938.

Margolin culminated her government service as a champion of the Equal Pay Act of 1963. Her passion for her work and meticulous preparation resulted in an outstanding record in appellate advocacy; she prevailed in cases associated with twenty-one of her twenty-four Supreme Court arguments. Margolin shares an elite company of individuals who attained such high standing as Supreme Court advocates, and she did so when the legal world was almost entirely male.

**Magical Child** Joseph Chilton Pearce 1992-03-01 Magical Child, a classic work, profoundly questioned the current thinking on childbirth practices, parenting, and educating our children. Now its daring ideas about how Western society is damaging our children, and how we can better nurture them and ourselves, ring truer than ever. From the very instant of birth, says Joseph
Chilton Pearce, the human child has only one concern: to learn all that there is to learn about the world. This planet is the child’s playground, and nothing should interfere with a child’s play. Raised this way, the Magical Child is a happy genius, capable of anything, equipped to fulfill his amazing potential. Expanding on the ideas of internationally acclaimed child psychologist Jean Piaget, Pearce traces the growth of the mind-brain from birth to adulthood. He connects the alarming rise in autism, hyperkinetic behavior, childhood schizophrenia, and adolescent suicide to the all too common errors we make in raising and educating our children. Then he shows how we can restore the astonishing wealth of creative intelligence that is the birthright of every human being. Pearce challenged all our notions about child rearing, and in the process challenges us to re-examine ourselves. Pearce’s message is simple: it is never too late to play, for we are all magical children.

Four Hundred Souls Ibram X. Kendi 2022-02-01 #1 NEW YORK TIMES BESTSELLER • A chorus of extraordinary voices tells the epic story of the four-hundred-year journey of African Americans from 1619 to the present—edited by Ibram X. Kendi, author of How to Be an Antiracist, and Keisha N. Blain, author of Set the World on Fire. FINALIST FOR THE ANDREW CARNegie MEDAL • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post, Town & Country, Ms. magazine, BookPage, She Reads, BookRiot, Booklist • “A vital addition to [the] curriculum on race in America . . . a gateway to the solo works of all the voices in Kendi and Blain’s impressive choir.”—The Washington Post “From journalist Hannah P. Jones on Jamestown’s first slaves to historian Annette Gordon-Reed’s portrait of Sally Hemings to the seductive cadences of poets Jericho Brown and Patricia Smith, Four Hundred Souls weaves a tapestry of unspeakable suffering and unexpected transcendence.”—O: The Oprah Magazine The story begins in 1619—a year before the Mayflower—when the White Lion disgorges “some 20-and-odd Negroes” onto the shores of Virginia, inaugurating the African presence in what would become the United States. It takes us to the present, when African Americans, descendants of those on the White Lion and a thousand other routes to this country, continue a journey defined by inhuman oppression, visionary struggles, stunning achievements, and millions of ordinary lives passing through extraordinary history. Four Hundred Souls is a unique offering. No other history book in recent years has had so many distinguished editors, Ibram X. Kendi and Keisha N. Blain, have assembled ninety brilliant writers, each of whom takes on a five-year period of that four-hundred-year span. The writers explore their periods through a variety of techniques: historical essays, short stories, personal vignettes, and fiery polemics. They approach history from various perspectives: through the eyes of towering historical icons or the untold stories of ordinary people; through places, laws, and objects. While themes of resistance and struggle, of hope and reinvention, course through the book, this collection of diverse pieces from ninety different minds, reflecting ninety different perspectives, fundamentally deconstructs the idea that Africans in America are a monolith—instead it unlocks the startling range of experiences and ideas that have always existed within the community of Blackness. This is a history that illuminates our past and gives us new ways of thinking about our future, written by the most vital and essential voices of our present.

The Challenge of Crime in a Free Society United States. President’s Commission on Law Enforcement and Administration of Justice 1967 This report of the President’s Commission on Law Enforcement and Administration of Justice--established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness oftences, gun control, and technical research as an instrument for reform. Significant data were generated by the Commission’s National Survey of Criminal Victims, the first of its kind on such a scale. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission’s recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Born in segregated Fort Worth, Texas, during the Great Depression, the African-American composer and musician was zeitgeist incarnate. Steeped in the Texas blues tradition, he and jazz grew up together, so the brassy blare of big band swing gave way to bebop—a faster music for a faster, postwar world. At the luminous dawn of the Space Age and New York's 1960s counterculture, Coleman gave voice to the moment. Lauded by some, maligned by many, he forged a breakaway art sometimes called "the new thing" or "free jazz." Featuring previously unpublished photographs of Coleman and his contemporaries, this book tells the compelling story of one of America's most adventurous musicians and the sound of a changing world.

Investment Governance for Fiduciaries Michael E. Drew 2019-04-22 Governance is a word that is increasingly heard and read in modern times, be it corporate governance, global governance, or investment governance. Investment governance, the central concern of this modest volume, refers to the effective employment of resources—people, policies, processes, and systems—by an individual or governing body (the fiduciary or agent) seeking to fulfill their fiduciary duty to a principal (or beneficiary) in additional to the investment challenges. Effective investment governance is an enabler of good stewardship, and for this reason it should, in our view, be of interest to all fiduciaries, no matter the size of the pool of assets or the nature of the beneficiaries. To emphasize the importance of effective investment governance and to demonstrate its flexibility across organization type, we consider our investment governance process within three contexts: defined contribution (DC) plans, defined benefit (DB) plans, and endowments and foundations (E&Fs). Since the financial crisis of 2007–2008, the financial sector’s place in the economy and its methods and ethics have (rightly, in many cases) been under scrutiny. Coupled with this theme, the task of investment governance is of increasing importance due to the sheer weight of money, the retirement savings gap, demographic trends, regulation and activism, and rising standards of behavior based on higher expectations from those fiduciaries serve. These trends are at the same time related and self-reinforcing. Having explored the why of investment governance, we dedicate the remainder of the book to the question of how to bring it to bear as an essential component of good fiduciary practice. At this point, the reader might expect investment professionals to launch into a discussion about an investment process focused on the best way to capture returns. We resist this temptation. Instead, we contend that achieving outcomes on behalf of beneficiaries is as much about managing risks as it is about capturing returns—and we mean “risks” broadly construed, not just fluctuations in asset values. Sarah Buckley might be called a three-wave natural birth advocate. A doctor as a mother, she asks the question of how a woman and baby might have the most fulfilling birth experience with respect for the wisdom of both medical science and the human body. Using current medical and epidemiological research plus women's experiences (including her own), she demonstrates that what she calls "undisturbed
birth is almost always healthier and safer than high-technology approaches to birth. Her wise counsel on issues like breastfeeding and sleeping during postpartum helps extend the gentle birth experience into a gentle parenting relationship. The Wages of Whiteness David R. Roediger 1999 In an afterword to this new edition, Roediger discusses recent studies of whiteness and the changing face of labor itself.
