Quest for Economic Empire Volker R. Berghahn
1996 German unification evoked ambivalent reactions outside its borders: it revived disquieting memories of attempts by German big business during the two world wars to build an economic empire in Europe in conjunction with the military and the government bureaucracy. But there are also high hopes that German finance and industry will serve as the engine of reconstruction in eastern Europe, just as it played this role in the postwar unification of western Europe.

Explorer's Guide Hudson Valley & Catskill Mountains: Includes Saratoga Springs & Albany (Seventh Edition) (Explorer's Complete) Joanne Michaels 2009-05-04 "Many guides claim to be 'insider' takes on travel, but few deliver truly out-of-the-ordinary info. This one does . . . many listings will surprise even natives."—New York Daily News Rich with historical and cultural attractions, the Hudson Valley and Catskills area will be celebrating its 400th anniversary in 2009. The region will commemorate Henry Hudson’s sail up the river, Robert Fulton’s first successful commercial steamship operation, and many more nationally significant events. The region is also a treasure trove for travelers seeking outdoor recreation, five-star dining, cozy bed & breakfasts or comfy inns, as well as galleries, antiques shops, wineries, farm stands, and places to hike, kayak, and canoe. In this completely revised seventh edition, author Joanne Michaels, the most respected travel writer in the region, includes hundreds of places to dine and stay, along with a wealth of information about things to see and do—all within driving distance of New York City, Boston, and beyond. With detailed maps and hundreds of honest
reviews about accommodations, eateries, and activities that will appeal to both affluent travelers and those seeking special value, Michaels’s advice will aid in planning an unforgettable trip.

Eccentric California Jan Friedman 2005 Jan Friedman"s Eccentric America proved that the most unlikely events and landmarks could become tourist attractions. This new title is dedicated to the sheer lunacy of California and its citizens, covering the biggest, the best, the wackiest and weirdest of the state"s people and places. From art-car and golf-
cart parades to the Valentine"s Day Sex Tour at the San Francisco Zoo; from a festival that moons Amtrak to a town with its own language; from obsessed collectors of Pez, yo-yos, and bananas to kitschy theme motels and a man who built a three-story mountain out of hay, adobe, and old paint. Eccentric California takes an in-depth look at one very peculiar place. This guide features:

*Scientific American* 1900 Monthly magazine devoted to topics of general scientific interest.

*Motorized Obsessions* Paul R. Josephson 2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of
the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The Oil Man and the Sea Arno Kopecky 2013-10-19
A sailing trip along the proposed Northern Gateway marine route with a fresh new voice in non-fiction. With oil and gas behemoth Enbridge Inc.'s Northern Gateway proposal nearing approval, supertankers loaded with two million barrels of oil may soon be plying the waters from northern British Columbia down the wild Pacific Coast. This region is home to the largest tract of temperate rainforest on earth, First Nations who have lived there for millennia, and some of the world's most biodiverse waters—one spill is all it will take to erase ten thousand years of evolution. Arno
Kopecky and his companions travel aboard a forty-one-foot sailboat exploring the pristine route—a profoundly volatile marine environment that registered 1,275 marine vessel incidents—mechanical failures, collisions, explosions, groundings, and sinkings—between 1999 and 2009 alone. Neither Kopecky nor the boat’s owner have ever sailed before, yet they brave these waters alone when their captain leaves them part way through the journey. Written with Kopecky’s quick humor and deft touch, this is a rich evocation of a mythic place and the ecology, culture, and history of a legendary region with a knife at its throat.

Comm Check... Michael Cabbage 2009-12-01 On February 1, 2003, the unthinkable happened. The space shuttle Columbia disintegrated 37 miles above Texas, seven brave astronauts were killed and America’s space program, always an eyeblink from disaster, suffered its second catastrophic in-flight failure. Unlike the Challenger disaster 17 years earlier, Columbia’s destruction left the nation one failure away from the potential abandonment of human space exploration. Media coverage in the immediate aftermath focused on the possible cause of the disaster, and on the nation’s grief. But the full human story, and the shocking details of NASA’s crucial mistakes, have never been told -- until now.

Based on dozens of exclusive interviews, never-before-published documents and recordings of key meetings obtained by the authors, Comm Check takes the reader inside the conference rooms and offices where NASA’s best and brightest managed the nation’s multi-billion-dollar shuttle program -- and where they failed to recognize the signs of an
impending disaster. It is the story of a space program pushed to the brink of failure by relentless political pressure, shrinking budgets and flawed decision making. The independent investigation into the disaster uncovered why Columbia broke apart in the sky above Texas. Comm Check brings that story to life with the human drama behind the tragedy. Michael Cabbage and William Harwood, two of America’s most respected space journalists, are veterans of all but a handful of NASA’s 113 shuttle missions. Tapping a network of sources and bringing a combined three decades of experience to bear, the authors provide a rare glimpse into NASA’s inner circles, chronicling the agency’s most devastating failure and the challenges that face NASA as it struggles to return America to space.

The Waiting Booth Brinda Berry 2014-10-17 A missing boy, government agents, an interdimensional portal... Mia has one goal for her senior year at Whispering Woods High—find her missing older brother. But when her science project reveals a portal into another dimension, she learns that travelers are moving in and out of her woods in the most alarming way and government agents Regulus and Arizona are policing their immigration. Mia’s drawn to the mysterious, aloof Regulus, but it’s no time for a crush. She needs to find out what they know about her brother, while the agents fight to save the world from viral contamination. But when Regulus reveals that he knows Mia’s secrets, she begins to wonder if there’s more going on than she thought...and if she was wrong to trust him...
