_Electric California_ Jan Friedman 2005

Jan Friedman's _Eccentric America_ proved that the most unlikely events and landmarks could become tourist attractions. This new title is dedicated to the sheer lunacy of California and its citizens, covering the biggest, the best, the wackiest and weirdest of the state's people and places. From art-car and golf-cart parades to the Valentine's Day Sex Tour at the San Francisco Zoo; from a festival that moons Amtrak to a town with its own language; from obsessed collectors of Pez, yo-yos, and bananas to kitschy theme motels and a man who built a three-story mountain out of hay, adobe, and old paint. Eccentric California takes an in-depth look...
at one very peculiar place. This guide features:

The Oil Man and the Sea

Arno Kopecky

2013-10-19

A sailing trip along the proposed Northern Gateway marine route with a fresh new voice in non-fiction. With oil and gas behemoth Enbridge Inc.’s Northern Gateway proposal nearing approval, supertankers loaded with two million barrels of oil may soon be plying the waters from northern British Columbia down the wild Pacific Coast. This region is home to the largest tract of temperate rainforest on earth, First Nations who have lived there for millennia, and some of the world’s most biodiverse waters—one spill is all it will take to erase ten thousand years of evolution. Arno Kopecky and his companions travel aboard a forty-one-foot sailboat exploring the pristine route—a profoundly volatile marine environment that registered 1,275 marine vessel incidents—mechanical failures, collisions, explosions, groundings, and sinkings—between 1999 and 2009 alone. Neither Kopecky nor the boat’s owner have ever sailed before, yet they brave these waters alone when their captain leaves them part way through the journey. Written with Kopecky’s quick humor and deft touch, this is a rich
evocation of a mythic place and the ecology, culture, and history of a legendary region with a knife at its throat.

February 1, 2003, the unthinkable happened. The space shuttle Columbia disintegrated 37 miles above Texas, seven brave astronauts were killed and America's space program, always an eyelink from disaster, suffered its second catastrophic in-flight failure. Unlike the Challenger disaster 17 years earlier, Columbia's destruction left the nation one failure away from the potential abandonment of human space exploration. Media coverage in the immediate aftermath focused on the possible cause of the disaster, and on the nation's grief. But the full human story, and the shocking details of NASA's crucial mistakes, have never been told -- until now. Based on dozens of exclusive interviews, never-before-published documents and recordings of key meetings obtained by the authors, Comm Check takes the reader inside the conference rooms and offices where NASA's best and brightest managed the nation's multi-billion-dollar shuttle program -- and where they...
failed to recognize the signs of an impending disaster. It is the story of a space program pushed to the brink of failure by relentless political pressure, shrinking budgets and flawed decision making. The independent investigation into the disaster uncovered why Columbia broke apart in the sky above Texas. Comm Check brings that story to life with the human drama behind the tragedy. Michael Cabbage and William Harwood, two of America's most respected space journalists, are veterans of all but a handful of NASA's 113 shuttle missions. Tapping a network of sources and bringing a combined three decades of experience to bear, the authors provide a rare glimpse into NASA's inner circles, chronicling the agency's most devastating failure and the challenges that face NASA as it struggles to return America to space.

Quest for Economic Empire
Volker R. Berghahn 1996

German unification evoked ambivalent reactions outside its borders: it revived disquieting memories of attempts by German big business during the two world wars to build an economic empire in Europe in conjunction with the military and the government bureaucracy. But there are also high hopes.
that German finance and industry will serve as the engine of reconstruction in eastern Europe, just as it played this role in the postwar unification of western Europe.
