Whatever Happened to the Music Teacher? Donald J. Savoie 2013-03-01 Thirty years ago,
Anglo-American politicians set out to make the public sector look like the private sector. These reforms continue today, ultimately seeking to empower elected officials to shape policies and pushing public servants to manage operations in the same manner as their private-sector counterparts. In Whatever Happened to the Music Teacher?, Donald Savoie provides a nuanced account of how the Canadian federal government makes decisions. Savoie argues that the traditional role of public servants advising governments on policy has been turned on its head, and that evidence-based policy making is no longer valued as it once was. Policy making has become a matter of opinion, Google searches, focus groups, and public opinion surveys, where a well-connected lobbyist can provide any answers politicians wish to hear. As a result, public servants have lost their way and are uncertain about how they should assess management performance, how they should generate policy advice, how they should work with their political leaders, and how they should speak truth to political power - even within their own departments. Savoie demonstrates how recent management reforms in government have caused a steep rise in the overhead cost of government, as well as how the notion that public administration could be made to operate like the private sector has been misguided and costly to taxpayers. Abandoning "textbook" discussions of government and public service, Whatever Happened to the Music Teacher? Is a realistic portrayal of how policy decisions are made and how actors and institutions interact with one another and exposes the complexities, contradictions present in Canadian politics and governance.
PTSD Compensation and Military Service

The scars of war take many forms: the limb lost, the illness brought on by a battlefield exposure, and, for some, the psychological toll of encountering an extremely traumatic event. PTSD Compensation and Military Service presents a thorough assessment of how the U.S. Department of Veterans Affairs evaluates veterans with possible posttraumatic stress disorder and determines the level of disability support to which they are entitled. The book presents a history of mental health disability compensation of military personnel and reviews the current compensation and pension examination procedure and disability determination methodology. It offers a number of recommendations for changes that would improve the fairness, consistency, and scientific foundation of this vital program. This book will be of interest and importance to policy makers, veterans affairs groups, the armed forces, health care organizations, and veterans themselves.

The Law Times

Consolidated table of cases for Vols. 1-48, in v. 49.

Public sector reform has moved on apace since the first of the Commonwealth Profile Series was launched in 1995 when the principles of New Public Management (NPM) were in an
early stage of adoption.
