Whitecotton 2e will engage and motivate students by presenting accounting in the context of real, recognizable companies like Apple, Starbucks, and California Pizza Kitchen, then integrate those companies throughout the chapters. This will allow students to see accounting information being used to make real business decisions in companies that are part of their lives, helping them connect their learning to the real world. Loose Leaf Version of Managerial Accounting for Managers with Connect Access Card Peter Brewer 2012-11-13 Managerial Accounting for Managers, 3rd edition by Noreen/Brewer/Garrison is based on the market-leading managerial accounting solution, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen solution presents integrated and proven solutions designed to help attain course goals of student readiness, comprehension of content, and application of key concepts in the managerial accounting course, while addressing the needs of instructors who do not wish to teach the financial accounting-oriented content that is included in the Garrison solution. Of the three programs in the Garrison franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting topics. Managerial Accounting for Managers 3e is geared towards professors who love Garrison’s market-leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making. McGraw-Hill’s Connect Plus Accounting offers a complete digital solution combines all the great features of Connect Accounting, along with access to an online version of Managerial Accounting for Managers 3e, so that students can easily refer back to the text for review and guidance. This media rich eBook links directly to tutorials and online resources and offers additional functionality like taking notes and highlighting key passages for reviewing later. Contained within Connect Plus Accounting is McGraw-Hill’s adaptive learning system, LearnSmart, which is designed to help students learn faster, study more efficiently, and retain more knowledge for greater success. In addition, Interactive Presentations deliver learning objectives in an interactive environment, giving students access to course-critical content anytime, anywhere. Robert Ramsay 2011-11-09  
As we begin the new year, this title is currently the most up-to-date auditing textbook on the market, covering all of the latest pronouncements and developments. Through the book’s unique process in twelve concise chapters, with eight flexible, independent modules, designed to be integrated into the course entirely at the instructor’s discretion. Perhaps most importantly, this title is the only book on the market to fully integrate the Codification of the New Clarity Standards (including new section #’s) issued by the Auditing Standards Board. As these standards will be effective for year-end audits after December 15, 2012, they will be covered on the CPA exam beginning in July 2013, when many current students will be taking the CPA exam after completing 150 hours of coursework. In addition, the Louwers book also brings the real world into the classroom through the addition of extensive Auditing Insights involving real issues facing today’s professionals as well as the updated Apollo Shoes Casebook, the only stand-alone fraud audit case on the market (available on the book’s website, www.mhhe.com/louwers5e). Throughout the revised text, the Louwers author team has updated each chapter to include the latest pronouncements, technology, and case material for your auditing classes: This edition has fully integrated the eight new standards adopted by the PCAOB.

And, most importantly, the risk assessment chapter was restructured to incorporate the exacting risk assessment process as outlined in the new PCAOB risk standards. The book has fully integrated the latest updates from the International Standards of Auditing (ISAs) and the Auditing Standards Board (ASB). Each chapter now begins with a list of ISAs and ASBs that are covered from the Codification of Statements on Auditing Standards published by the AICPA and the list of PCAOB Auditing Standards covered in that chapter. This edition incorporates the major changes to the structure and the content of the auditing section of the CPA examination for 2011 and has been designed to provide multiple opportunities for students to practice questions that they will encounter on the CPA exam. Each chapter has an abundance of multiple choice questions. In addition, to provide experience with the task-based exam approach, Kaplan CPA Simulations are included in the text problem material and are also accessible at www.mhhe.com/louwers5e.

These multiple choice questions and simulations allow the student to gain skills and pick up additional knowledge for success on the CPA Examination. The education version of ACL software is included free with the book. Exercises for use with the ACL software are available on the book’s website. The book is also fully integrated with McGraw-Hill’s ConnectTM Accounting The next evolution in online homework management and assessment, McGraw-Hill’s ConnectTM Accounting is an online assignment and assessment solution that connects you with the tools and resources you’ll need to achieve success: Access to end-of-chapter material that provides immediate feedback and reports directly to your instructor’s reports. Loose Leaf for Introductory Financial Accounting for Business Thomas P Edmonds 2018-03-01 Learning Financial Accounting can often feel like learning a foreign language to students, in particular when taught on before core concepts are truly mastered. Introductory Financial Accounting for Business is an innovative approach that emphasizes critical thinking over therote memorization of terms, such as “debits” and “credits”. The sequential learning model employed by the authors helps students see the bottom-line consequences of financial statements as it relates to the overall business, better preparing them for careers as accountants, entrepreneurs, and decision-makers. The authors focus initially on conceptual underpinnings -- the reasons why we approach procedures
the way we do – rather than confusing students by front-loading the material with over-complicated details. Author Chris Edmonds has also created a highly popular and widely used series of video lectures, which engage students by clearly and charismatically going over each learning objective in a conversational style. These videos help reinforce important lessons and are always available for review. By developing this stronger foundation, students understand Accounting ideas more broadly and are able to ultimately learn procedural applications more quickly and accurately. With a straightforward writing style and highly engaging video lectures, this dynamic author team leads students down a streamlined learning path focused on critical thinking, clarity of concept, and applicability of material to the real world.
