**The Users of Accounting Information and their Needs. An Introduction to Accounting and its Branches** Musbau Kolawole Kayode 2015-10-15 Seminar paper from the year 2015 in the subject Business economics - Banking, Stock Exchanges, Insurance, Accounting, grade: A, Atlantic International University (School of Buisness and Economics), course: Ph.D Accounting, language: English, abstract: The objective of this paper is to justify the existence of the accounting function as a significant and integral requirement of each organization and
institution as well as its purpose in the current society we live in today. This entails the analysis of the users of accounting information, the various branches of accounting and the relevance of this information to various stakeholders in the society that surround and support organizations and institutions. Accounting, in itself is a fundamental part of the information systems of organizations today. This is because there are various parties in the society that need this information apart from the managers and owners of the organizations and institutions. Furthermore, accounting is now regarded as a service function of organizations and the society in general. This is because as an informative function of organizations, it enables various users to make relevant and valid decisions of an economic and financial viewpoint.

Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter
resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book’s focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.
