The Many Panics of 1837. Jessica M. Lepley 2013-09-16 In the spring of 1837, people panicked as financial and economic uncertainty spread within and between New York, New Orleans and London. Although the period of panic would dramatically influence political, cultural and social history, those who panicked sought to erase from history their experiences of one of America’s worst early financial crises. The Many Panics of 1837 reconstructs this period in order to make arguments about the national boundaries of history, the role of information in the economy, the personal and local nature of national and international events, the origins and dissemination of economic ideas, and most importantly, what actually happened in 1837. This riveting transatlantic cultural history, based on archival research on two continents, reveals how people transformed their experiences of financial crisis into the ‘Panic of 1837’, a single event that would serve as a turning point in American history and an early inspiration for business cycle theory.

The Man in the High Castle. Philip K. Dick 2011 In a classic work of alternate history, the United States of America is the greatest of all human adventures,” begins Paul Johnson’s remarkable new American history. “No other national story holds such tremendous lessons, for the American people themselves and for the rest of the world.” Johnson’s history is a fascinating primer on the essence of one of history’s greatest weapons and the ultimate power trip. From the internationally bestselling author of The 48 Laws of Power, Mastery, and The 33 Strategies Of War.

Woman, Work, and Clothes in the Eighteenth-Century Novel, Chloe Wigston Smith 2013-03-13 This groundbreaking study examines the vexed and unstable relations between the eighteenth-century novel and the material world. Rather than exploring dress’s transformative potential, it charts the novel’s vibrant engagement with ordinary clothes in its bid to establish new ways of articulating identity and market itself as a durable genre. In a world in which print culture and textile manufacturing traded technologies, and paper was made of rags, the novel, by contrast, resisted the rhetorical and aesthetic links between dress and expression, style and sentiment. Chloe Wigston Smith shows how fiction exploited women’s work with clothing — through stealing, sex work, service, stitching, and the stage — in order to revise and reshape material culture within its pages. Her book explores a diverse group of authors, including Jane Barker, Jonathan Swift, Daniel Defoe, Eliza Haywood, Samuel Richardson, Henry Fielding, Charlotte Lennox, John Cleland, Frances Burney and Mary Robinson. The Infantry Rifle Platoon and Squad (FM 3-21.8 / 7-8) Department of the Army 2015-12-31 This field manual provides doctrinal framework for how infantry rifle platoons and squads fight. The Way We Live Now Anthony Trollope 1875 Annotation Containing three plays from the apex of Chekhov’s dramatic achievement - The Cherry Orchard, Three Sisters and The Seagull translated by Constance Garnett. Parentology: Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing. “Parentology is brilliant, jaw-droppingly funny, and full of wisdom…bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on time-worn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Managerial Accounting (16th Edition) Ray H. Garrison 2020 Margaret Sexton 2018-11-08 Self-taught photographer Hugh Mangum was born in 1887 in Durham, North Carolina, as its burgeoning tobacco economy put the frontier-like boomtown on the map. As an itinerant portraitist working primarily in North Carolina and Virginia during the rise of Jim Crow, Mangum welcomed into his temporary studios a clientele that was both racially and economically diverse. After his death in 1922, his glass plate negatives remained stored in his darkroom, a tobacco barn, for fifty years. Slated for demolition in the 1970s, the barn was saved at the last moment—and with it, this surprising and unparalleled document of life at the turn of the twentieth-century, a turbulent time in the history of the American South. Hugh Mangum’s multiple-image, glass plate negatives reveal the open-door policy of his studio to show us lives marked both by notable affluence and hard work, all imbued with a strong sense of individuality, self-creation, and often joy. Seen and experienced in the present, the portraits hint at unexpected relationships and histories and also confirm how historical photographs have the power to subvert familiar narratives. Mangum’s photographs are not only images; they are objects that have survived a history of their own and exist within the larger political and cultural history of the American South, demonstrating the unpredictable allure that often characterizes the best art—its ability over time to evolve with and absorb life and meaning beyond the intentions or expectations of the artist. Shandygaff: Christopher Morley 1918 Death in Kew Gardens: Jennifer Ashley 2019-06-04 From the New York Times bestselling author of Scandal Above Stairs Kat Holloway steps out from beneath the stairs and into international intrigue, where murder and stolen treasure lurk among the upper echelons of Victorian London. In return for a random act of kindness, scholar Li Bai Chang presents young cook Kat Holloway with a rare and precious gift—a box of tea. Kat thinks no more of her unusual visitor until two days later when the kitchen erupts with the news that Lady Cynthia’s next-door neighbor has been murdered. Known about London as an “Old China Hand,” the victim claimed to be an expert in the language and customs of China, acting as intermediary for merchants and government officials. But Sir Jacob’s dealings were not what they seemed, and when the authorities accuse Mr. Li of the crime, Kat and Daniel find themselves embroiled in a world of deadly secrets that reach from the gilded homes of Mayfair to the beautiful wonder of Kew Gardens.

Giorgio Riello 2019-01-31 This is the first global history of dress regulation and its place in broader debates around how human life and societies should be visualised and materialised. Sumptuary laws were a tool on the part of states to regulate not only manufacturing systems and moral economies via the medium of expenditure and consumption of clothing but also banquets, festivities and funerals. Leading scholars on Asian, Latin American, Ottoman and European history shed new light on how and why items of dress became key aspirational goods across society, how they were lobbied for and marketed, and whether or not sumptuary laws were implemented by cities, states and empires to restrict or channel trade and consumption. Their findings reveal the significance of sumptuary laws in medieval and early modern societies as a site of contestation between individuals and states and how dress as an expression of identity developed as a modern human right.
