The Official History of the UK Strategic Nuclear Deterrent Matthew Jones 2017-05-12 Volume II of The Official History of the UK Strategic Nuclear Deterrent provides an authoritative and in-depth examination of the British government's strategic nuclear policy from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent and led a decision to preserve the Polaris programme. Labour ministers were nevertheless committed not to develop another generation of nuclear weapons beyond those in the pipeline, placing major doubts over the long-term future of the nuclear programme and collaboration with the United States. Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfill its role as a national strategic nuclear deterrent. During 1967, under heavy pressures to control defence spending, a protracted debate was conducted within Whitehall over the future of Polaris and how to respond to the evolving ABM challenge. The volume concludes with Labour's defeat at the general election of June 1970, by which time the Royal Navy had assumed the nuclear deterrent role from the RAF, and plans had already been formulated for a UK project to improve Polaris which could both ensure its continuing credibility and rejuvenate the Anglo-American nuclear relationship. This book will be of much interest to students of British politics, Cold War history, nuclear proliferation and international relations.

Crane Safety Manual for Operators - Users 1983 The House of Mirth Illustrated Edith Wharton 2021-04-28 The House of Mirth is a 1905 novel by the American author Edith Wharton. It tells the story of Lily Bart, a well-born but impoverished woman belonging to New York City's high society around the turn of the last century.[a] Wharton creates a portrait of a stunning beauty who, though raised and educated to marry well both socially and economically, is reaching her 29th year, an age when her youthful blush is drawing to a close and her marital prospects are becoming ever more limited. The House of Mirth traces Lily's slow two-year social descent from privilege to a tragically lonely existence on the margins of society. In the words of one scholar, Wharton uses Lily as an attack on "an irresponsible, grasping and morally corrupt upper class.

Surviving Democracy Chien-Yi Lu 2020 "Is democracy, in its neoliberalized form, responsible in part for bringing us to the brink of self-destruction and the policy inertia that is doing away with our chances of survival? Surviving Democracy is a practice-oriented study of how neoliberalized democracy plays in our dealings with causing, understanding, denying, and mitigating-climate change. Defining neoliberalism as the art of exclusion through inclusion, Chien-Yi Lu treats climate change as collateral damage of the neoliberal order established to ensure upward power and wealth redistribution. Highlighting the role money played in the "free" competition of ideas between Keynes and Hayek, she investigates the resulting global structure, wherein the wealthy and powerful sit above the market and democracy, and the way this structure fundamentally contradicts with honest climate mitigation. Central to the structure is neoliberal elites' leveraging of the fluid relationship between the market and the state. Merging citizen power with consumer and investor powers is therefore imperative to the success of climate action. While expediting the bursting of the carbon bubble is an obvious answer, it is the discussion of the meat bubble that brings the book full circle, linking our survival to neoliberalism, inclusion, and democracy. Surviving Democracy probes the role democracy plays in our dealings with-causing, understanding, denying, and hopefully, mitigating-climate change"--

Water Diet Learn How to Lose Weight without Dieting Water diet is really beneficial for you because it is good for your health and enables you to reduce weight. According to the research, women and men should take 91 and 125 ounces respectively per day. One should not wait for the thirsty feeling instead of this drinking water throughout the day to avoid dehydration. We can use less calorie flavored drinks instead of water as well. We must keep a water bottle with us as a reminder. The major benefit of drinking water is that it helps to burn calories. It helps in fewer intakes of calories and decreases our appetite. Usually drinking 200mL water before a meal is found to be more beneficial. Likewise, intake of water early in the morning is also effective. For the weight loss, one should take 2 liters of water throughout the day. The high caloric drinks, soda drinks should be replaced by soft water and zero calories drinks that help in weight loss.
