Medical Anthropology Andrea S. Wiley 2009 Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this highest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high school level familiarity with human biology and anthropology. The authors present first basic biological information on a particular health condition and then expand their analysis to include evolutionary, cultural, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Photoelectrochemical Hydrogen Production Roel van de Krol 2011-11-19 Photoelectrochemical Hydrogen Production describes the principles and materials challenges for the conversion of sunlight into hydrogen water splitting at a semiconductor electrode. Readers will find an analysis of the solid state properties and materials requirements for semiconducting photo-electrodes, a detailed description of the semiconductor/electrolyte interface, in addition to the photo-electrochemical (PEC) cell. Experimental techniques to investigate both materials and PEC device performance are outlined, followed by an overview of the current state-of-the-art in PEC materials and devices, and combinatorial approaches towards the development of new materials. Finally, the economic and business perspectives of PEC devices are discussed, and promising future directions indicated. Photoelectrochemical Hydrogen Production is a one-stop resource for scientists, students and R&D practitioners starting in this field, providing both the theoretical background as well as useful practical information on photoelectrochemical measurement techniques. Experts in the field benefit from the chapters on current state-of-the-art materials/devices and future directions.

Direct From Dell Michael Dell 2018-09-21 At nineteen, Michael Dell started his company as a freshman at the University of Texas with $1,000 and has since built an industry powerhouse. As Dell journeys through his childhood adventures, ups and downs, and mistakes made along the way, he reflects on invaluable lessons learned. Michael Dell’s revolutionary insight has allowed him to persevere against all odds, and Direct From Dell contains valuable information for any business leader. His strategies will show you effective ways to grow your business and will help you save time on costly mistakes by following his direct model for success.

The Official History of the UK Strategic Nuclear Deterrent Matthew Jones 2017-05-12 Volume II of The Official History of the UK Strategic Nuclear Deterrent provides an authoritative and in-depth examination of the British government’s strategic nuclear programme from 1964 to 1970. Written with full access to the UK documentary record, Volume II examines the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having decided to preserve the controversies that developed over nuclear policy following the arrival in office of a Labour government led by Harold Wilson in October 1964 that openly questioned the independence of the deterrent. Having decided to preserve the strategic nuclear policy of Britain, Defence planners also became increasingly concerned that the deployment of Soviet anti-ballistic missile (ABM) defences around Moscow threatened to undermine the ability of Polaris to fulfil its role as a independent of the deterrent policy of Britain.
