The Chicano Latino Literary Prize Stephanie Fatta 2008-01-01 If David is mine? Mrs. Renteria shouts out to her neighbors gathered about the dead but handsome young man found in the dry riverbed next to their homes in a Los Angeles barrio. IfDavid! Tiberio asked. IfSince when is his name David? He looks to me more like a Tiberio glanced at the man's face. IfLuis? Mrs. Renteria's neighbors call out a name of literature that better suits the mysterious corpse: Roberto, Antonio, Henry, Enrique, Miguel, Roy, Rafael. The very first winner of the Chicano / Latino Literary Prize in 1974, Ron Ariail's The Wellback uses dark humor to reflect on the appearance of a dead brown man in their midst. This landmark collection prize-winning fiction, poetry, and drama paints a historical and aesthetic panorama of Chicano and Latino letters over a twenty-five-year-period beginning in 1974 and ending in 1999. Most, but not all, of the winning entries are featured in this anthology, which also includes second- and third-place winners, as well as honorable mentions. Now entering its thirty-third year, the award has recognized a wide variety of writers, from established ones such as Juan Felipe Herrera, Michael Nava, and Helena Maria Viramontes, to those that are lesser known. Many of the pieces in this anthology are considered to be foundational texts of Chicano and Latino literature, and those that are not as widely recognized deserve more serious study and attention. Presented in chronological order, the selected writings are primarily in English, although some are written in Spanish, and others in Spanglish. Some, like Francisco X. Alarcón's poem IfRain/no/Rains, appear in both languages. IfMa rías/lass carga/siempre/conmigo/enredadías/me/ir/mi/and/ad₁h₁a₁/í/llería/ with me/ with me/ / till / rolled up / use them / as my pillow. In addition to the diverse array of authors, styles, and genres, the works included in this collection cover a wide range of themes, from more political issues of ethnic, gender, and class.

International Research on Multilingualism: Breaking with the Monolingual Perspective Eva Vetter 2019-10-22 This volume contributes to a better understanding of both psycho- and sociolinguistic levels of multilingualism and their interplay in development and use. The chapters stem from an international group of specialists in multilingualism with chapters from Austria, Canada, Germany, Hungary, Israel, Italy, Slovakia, South Africa, Spain and the United States. The chapters present a first-hand overview on research questions about talent, and multilingualism, and discuss the potential of the new research concepts and the exploration of contact phenomena such as transfer and language learning strategies in diverse language contact scenarios. Concepts covered include domestic language communities, mother tongue, germination factors and communicative competence in national contexts. Multilingual use as described and applied in the volume aims at demonstrating and current and future challenges for research on third language acquisition and multilingualism. The third languages in focus include widely and less widely used official, minority and migrant languages in institutional and/or natural contexts, including Albanian, Arabic, Basque, English, French, German, Hungarian, Italian, Romanian, Spanish, Punjabi, Russian, Turkish, and Vietnamese, thereby mapping a high variety of language constellations.

Your Road Map For Success John C. Maxwell 2002-03-31 Defining success is a difficult task. Most people equate it with wealth, power, and happiness. However, true success is not a thing you acquire or achieve. Rather, it is a journey you take your whole life long. In a refreshingly straightforward style, John Maxwell shares unique insights into what it means to be successful. And he reveals a definition that puts genuine success within your reach yet motivates you to keep striving for your dreams. I want to help you discover your personal road map for success, teach you what it means to be on the success journey, answer many of your questions, and equip you with what you'll need to change yourself and keep growing. - John C. Maxwell

Books in Print 1977 Includes authors, titles, subjects.

Community, Solidarity and Multilingualism in a Transnational Social Movement Maria Rosa Garrido Santà 2020-09-02 Community, solidarity and multilingualism in a transnational social movement presents a critical sociolinguistic ethnography of the Emmaus movement that analyses linguistic and discursive practices in two local communities in order to provide insight into solidarity discourses and transnational communication more broadly. Integrating perspectives from a range of disciplines, the monograph seeks to understand the ways in which social movements are maintained across disparate communities grounded in shared cultural repertoires and communicative practices but not necessarily a shared language. The book focuses on Emmaus, the solidarity movement that emerged in post-war France which brings formerly marginalised people together with others looking for an alternative lifestyle into live-in communities dedicated to work and social projects. The book first offers a historical overview of the Emmaus movement more generally, moving into an account of its development and spread across national and linguistic borders. The volume draws on data from two Emmaus communities in Barcelona and London to analyse the everyday communicative and discursive practices that appropriate and resignify the shared transnational movement ideas in different socio-political, economic, historical and linguistic contexts. Community, solidarity and multilingualism in a transnational social movement considers the social implications of local practices on the situated (re)production and evolution of transnational social movements more generally and will be of particular interest to students and researchers in sociolinguistics, linguistic anthropology, discourse studies, cultural studies, and sociology.

Algèbre in the Early Grades James J. Kaput 2017-09-25 This volume is the first to offer a comprehensive, research-based, multi-faceted look at issues in early algebra. In recent years, the National Council for Teachers of Mathematics has recommended that algebra become a strand flowing through the K-12 curriculum, and the 2013 RAND Mathematics Study Panel has recommended that algebra be “the initial topical choice for focused and coordinated research and development [in K-12 mathematics].” This book provides a rationale for a stronger and more sustained approach to algebra in school, as well as concrete examples of how algebraic reasoning may be developed in the early grades. It is organized around three themes: The Nature of Early Algebra Students’ Capacity for Algebraic Thinking Issues of Implementation: Taking Early Algebra to the Classrooms. The contributors to this landmark volume have been at the forefront of an effort to integrate algebra into the existing early grades mathematics curriculum. They include scholars who have been developing the conceptual foundations for such changes as well as researchers and developers who have led empirical investigations in school settings. Algebra in the Early Grades aims to bridge the worlds of research, practice, design, and theory for educators, researchers, students, policy makers, and curriculum developers in mathematics education.

The Reading Zone, 2nd Edition Nanicie Atelew 2016-11-16 Long an advocate of frequent, voluminous reading in schools, the author draws on evidence gathered in twenty years of classroom teaching to make the case for reading workshop more powerful than ever. The book establishes the top ten conditions for making engaged classroom reading possible for students at all levels and provides the practical support and structures necessary for achieving them.

NeuroWisdom Mark Robert Waldman 2017-01-31 Perfect for readers of How God Changes Your Brain, two researchers present over thirty brain exercises to help readers generate happiness and success, in business and in life. “This remarkable book translates state-of-the art neuroscience into practical techniques that rapidly promote personal transformation. If you want to double your happiness and your income, start using these powerful brain-changing exercises today!” —John Assaraf, New York Times bestselling author and CEO of NeuroGym. Adapted from a business school course they created for professionals, bestselling author Mark Waldman and Chris Manning present simple brain exercises, based on the latest neuroscience research, to guide readers to improvement in all parts of life, from work to home, from how we think to how we feel. Their promise is to help people create more “wealth” in their lives, defined as the combination of money, happiness, and success. Using the latest research studied by two experts in their field, the book presents both the scientific background and sets of “NeuroWisdom” exercises that will help people reduce neurological stress and increase happiness, motivation, and productivity. The “worry” centers of the brain are turned off and the optimism circuits are turned on. Work becomes more pleasurable and creativity is increased, enabling the brain to anticipate and solve problems more efficiently. From the cutting edge of brain science to real-world solutions, these exercises help readers gain the wisdom that leads to greater fulfillment.
