Painted Love Hollis Clayson 2003-10-30 In this engrossing book, Hollis Clayson provides the first description and analysis of French artistic interest in women prostitutes, examining how the subject was

treated in the art of the 1870s and 1880s by such avant-garde painters as Cézanne, Degas, Manet, and Renoir, as well as by the academic and low-brow painters who were their contemporaries. Clayson not only illuminates the imagery of prostitution-with its contradictory connotations of disgust and fascination-but also tackles the issues and problems relevant to women and men in a patriarchal society. She discusses the conspicuous sexual commerce during this era and the resulting public panic about the deterioration of social life and civilized mores. She describes the system that evolved out of regulating prostitutes and the subsequent rise of clandestine prostitutes who escaped police regulation and who were condemned both for blurring social boundaries and for spreading sexual licentiousness among their moral and social superiors. Clayson argues that the subject of covert prostitution was especially attractive to vanguard painters because it exemplified the

commercialization and the ambiguity of modern life.

The Cambridge Companion to Medieval Women's Writing

Wallace David 2003-05-22 The Cambridge Companion to Medieval Women's Writing seeks to recover the lives and particular experiences of medieval women by concentrating on various kinds of texts: the texts they wrote themselves as well as texts that attempted to shape, limit, or expand their lives. The first section investigates the roles traditionally assigned to medieval women (as virgins, widows, and wives); it also considers female childhood and relations between women. The second section explores social spaces, including textuality itself: for every surviving medieval manuscript bespeaks collaborative effort. It considers women as authors, as anchoresses 'dead to the world', and as preachers and teachers in the world staking claims to authority without

entering a pulpit. The final section considers the lives and writings of remarkable women, including Marie de France, Heloise, Joan of Arc, Julian of Norwich, Margery Kempe, and female lyricists and romancers whose names are lost, but whose texts survive.

Édith Piaf David Looseley

Building in France, Building in Iron, Building in Ferroconcrete Sigfried Giedion 1995-09-01 With *Building in France, Building in Iron, Building in Ferroconcrete* (1928)—published now for the first time in English—Siegfried Giedion positioned himself as an eloquent advocate of modern architecture. This was

the first book to exalt Le Corbusier as the artistic champion of the new movement. It also spelled out many of the tenets of Modernism that are now regarded as myths, among them the impoverishment of nineteenth-century architectural thinking and practice, the contrasting vigor of engineering innovations, and the notion of Modernism as technologically preordained.

French Rococo Ébénisterie in the J. Paul Getty Museum

Gillian Wilson 2021-03-30 The first comprehensive catalogue of the Getty Museum's significant collection of French Rococo ébénisterie furniture. This catalogue focuses on French ébénisterie furniture in the Rococo style dating from 1735 to 1760. These splendid objects directly reflect the tastes of the Museum's founder, J. Paul Getty, who started collecting in this area in 1938 and continued until his death in 1976. The Museum's collection is particularly rich in examples created by the most talented cabinet masters then active in Paris, including Bernard van Risenburgh II (after 1696-ca. 1766), Jacques Dubois (1694-1763), and Jean-François Oeben (1721-1763). Working for members of the French royal family and aristocracy, these craftsmen excelled at producing veneered and marquetry pieces of furniture

(tables, cabinets, and chests of drawers) fashionable for their lavish surfaces, refined gilt-bronze mounts, and elaborate design. These objects were renowned throughout Europe at a time when Paris was considered the capital of good taste. The entry on each work comprises both a curatorial section, with description and commentary, and a conservation report, with construction diagrams. An introduction by Anne-Lise Desmas traces the collection's acquisition history, and two technical essays by Arlen Heginbotham present methodologies and findings on the analysis of gilt-bronze mounts and lacquer.

Fire in the Minds of Men James H. Billington 1980 This book traces the origins of a faith--perhaps the faith of the century. Modern revolutionaries are believers, no less committed and intense than were Christians or Muslims of an earlier era. What is new is the belief that a perfect secular order will emerge from forcible overthrow of traditional authority. This inherently implausible idea energized Europe in the nineteenth century, and became the most pronounced ideological export of the West to the rest of the world in the twentieth century. Billington is interested in revolutionaries--the innovative creators of a new tradition. His historical frame extends from the waning of the French Revolution in the late eighteenth century to the beginnings of the Russian

Revolution in the early twentieth century. The theater was Europe of the industrial era; the main stage was the journalistic offices within great cities such as Paris, Berlin, London, and St. Petersburg. Billington claims with considerable evidence that revolutionary ideologies were shaped as much by the occultism and proto-romanticism of Germany as the critical rationalism of the French Enlightenment. The conversion of social theory to political practice was essentially the work of three Russian revolutions: in 1905, March 1917, and November 1917. Events in the outer rim of the European world brought discussions about revolution out of the school rooms and press rooms of Paris and Berlin into the halls of power. Despite his hard realism about the adverse practical consequences of revolutionary dogma, Billington appreciates the identity of its best sponsors, people who preached social justice transcending traditional national, ethnic, and gender

boundaries. When this book originally appeared The New Republic hailed it as "remarkable, learned and lively," while The New Yorker noted that Billington "pays great attention to the lives and emotions of individuals and this makes his book absorbing." It is an invaluable work of history and contribution to our understanding of political life.

Parentology Dalton Conley
2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he

turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in

Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on

paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century. *¡Avancemos!*. Ana C. The Order of Things Michel Foucault 2005-08-18 When one defines "order" as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. With virtuoso showmanship, he weaves an intensely complex history of thought. He dips into literature, art, economics and even biology in *The Order of Things*, possibly one of the

most significant, yet most overlooked, works of the twentieth century. Eclipsed by his later work on power and discourse, nonetheless it was *The Order of Things* that established Foucault's reputation as an intellectual giant. Pirouetting around the outer edge of language, Foucault unsettles the surface of literary writing. In describing the limitations of our usual taxonomies, he opens the door onto a whole new system of thought, one ripe with what he calls "exotic charm".

Intellectual pyrotechnics from the master of critical thinking, this book is crucial reading for those who wish to gain insight into that odd beast called Postmodernism, and a must for any fan of Foucault.

[The Foucault Effect](#) Michel Foucault 1991-07-09 Based on Foucault's 1978 and 1979 lectures on rationalities of government, this work examines the art or activity of government and the different ways in which it has been made thinkable and practicable.

There are also contributions of

other scholars exploring modern manifestations of government.

The Wine Bible Karen MacNeil 2015-10-13 Announcing the completely revised and updated edition of *The Wine Bible*, the perennial bestselling wine book praised as “The most informative and entertaining book I’ve ever seen on the subject” (Danny Meyer), “A guide that has all the answers” (Bobby Flay), “Astounding” (Thomas Keller), and “A magnificent masterpiece of wine writing” (Kevin Zraly). Like a lively course from an expert teacher, *The Wine Bible* grounds the reader deeply in the fundamentals while layering on informative asides, tips, amusing anecdotes, definitions, glossaries, photos (all new for this edition), maps, labels, and recommended bottles. Karen MacNeil’s information comes directly through primary research; for this second edition she has tasted more than 10,000 wines and visited dozens of wine regions around the world. New to the book are wines of China, Japan, Mexico,

and Slovenia. And through it all the reader becomes ever more informed—and, because of the author’s unique voice, always entertained: “In great years Pétrus is ravishing, elegant, and rich—Ingrid Bergman in red satin.” Or, describing a Riesling: “A laser beam. A sheet of ice. A great crackling bolt of lightning.”

Diaries Real and Fictional in Twentieth-Century French Writing Sam Ferguson

2018-03-22 This volume is the first study of the diary in French writing across the twentieth century, as a genre which includes both fictional and non-fictional works. From the 1880s it became apparent to writers in France that their diaries—a supposedly private form of writing—would probably come to

be published, strongly affecting the way their readers viewed their other published works, and their very persona as an author. More than any other, Andre Gide embraced the literary potential of the diary: the first part of this book follows his experimentation with the diary in the fictional works *Les Cahiers d'Andre Walter* (1891) and *Paludes* (1895), in his diary of the composition of his great novel, *Le Journal des faux-monnayeurs* (1926), and in his monumental *Journal 1889-1939* (1939). The second part follows developments in diary-writing after the Second World War, inflected by radical changes in attitudes towards the writing subject. Raymond Queneau's works published under the pseudonym of Sally Mara (1947-1962) used the diary playfully at a time when the writing subject was condemned by the literary avant-garde. Roland Barthes's experiments with the diary (1977-1979) took it to the extremes of its formal possibilities, at the point of a return of the writing subject.

Annie Ernaux's published diaries (1993-2011) demonstrate the role of the diary in the modern field of life-writing. Throughout the century, the diary has repeatedly been used to construct an oeuvre and author, but also to call these fundamental literary concepts into question.

Chromophobia David Batchelor 2000-09 Batchelor coins the term "chromophobia"-A fear of corruption or contamination through color--in a meditation on color--in western culture. Batchelor analyzes the history of, and the motivations behind, chromophobia, from its beginnings through examples of nineteenth-century literature, twentieth-century architecture and film to Pop art, minimalism and the art and architecture of the present day. He argues that there is a tradition of resistance to colour in the West, exemplified by many attempts to purge color

from art, literature and architecture. Batchelor seeks to analyze the motivations behind chromophobia, considering the work of writers and philosophers who have used color as a significant motif, and offering new interpretations of familiar texts and works of art. *T'es Branché?* Toni Theisen 2019

Citizenship, Nationality and Ethnicity T. K. Ooman

1997-01-31 Most interpretations of ethnicity concentrate either on particular societies or on specific dimensions of 'world society'. This work takes quite a different approach, arguing that variations within and across societies are vital for understanding contemporary dilemmas of ethnicity. The author aims to develop a new analysis of the relation between the nation on the one hand, and ethnicity and citizenship on the other. Oommen conceives of the nation as a product of a fusion of territory and language. He demonstrates that neither religion nor race determines national identities.

As territory is seminal for a nation to emerge and exist, the dissociation between people and their 'homeland' makes them an ethnies. Citizenship is conceptualized both as a status to which nationals and ethnies ought to be entitled and a set of obligations, a role they are expected to play. Analyses of three historical episodes - colonialism and European expansion, Communist internationalism and the nation-state and its project of cultural unity - are examined to provide the empirical content of the argument. This book will be essential reading for second-year undergraduates and above in the areas of sociology, anthropology and cultural studies.

Teaching French as a Multicultural Language John

D. Ogden 1981 This booklet proposes to approach the teaching of French from a

multicultural perspective. The introductory section presents the reasons for recommending this orientation and the pedagogical advantages to be derived from it, emphasizing the fact that French serves as a link between several Francophone nations and their widely different cultures. Accordingly, a multicultural approach is viewed as more realistic than one that focuses solely on France, and more likely to broaden the appeal of the language as a tool for international communication. The second section offers a panorama of the Francophone regions of the world, with brief introductions to the historical and linguistic contexts into which the French language and culture were thrust, and with a list of basic readings on Francophone literature. The third section presents various activities for teaching about the cultures of the French-speaking world, arranged by level of language proficiency. The fourth section suggests ways of making or collecting instructional materials. The fifth

section, a selected bibliography and guide to resources, lists sources of print and audiovisual materials for each Francophone region, including addresses of U.S. distributors and of Francophone nations' embassies in Washington.

On Food and Cooking Harold McGee 2007-03-20 A kitchen classic for over 35 years, and hailed by Time magazine as "a minor masterpiece" when it first appeared in 1984, On Food

and Cooking is the bible which food lovers and professional chefs worldwide turn to for an understanding of where our foods come from, what exactly they're made of, and how cooking transforms them into something new and delicious. For its twentieth anniversary, Harold McGee prepared a new, fully revised and updated edition of On Food and Cooking. He has rewritten the text almost completely, expanded it by two-thirds, and commissioned more than 100 new illustrations. As compulsively readable and engaging as ever, the new On Food and Cooking provides countless eye-opening insights into food, its preparation, and its enjoyment. On Food and Cooking pioneered the translation of technical food science into cook-friendly kitchen science and helped birth the inventive culinary movement known as "molecular gastronomy." Though other books have been written about kitchen science, On Food and Cooking remains unmatched in the accuracy,

clarity, and thoroughness of its explanations, and the intriguing way in which it blends science with the historical evolution of foods and cooking techniques. Among the major themes addressed throughout the new edition are: · Traditional and modern methods of food production and their influences on food quality · The great diversity of methods by which people in different places and times have prepared the same ingredients · Tips for selecting the best ingredients and preparing them successfully ·

The particular substances that give foods their flavors, and that give us pleasure · Our evolving knowledge of the health benefits and risks of foods On Food and Cooking is an invaluable and monumental compendium of basic information about ingredients, cooking methods, and the pleasures of eating. It will delight and fascinate anyone who has ever cooked, savored, or wondered about food.
