The Steam Mole Dave Freer 2021-12-11 This new steampunk adventure is a race around the world. Tim Barnabas is a submariner from the Cuttlefish, a coal fired submarine. Clara Calland is the daughter of a scientist who carries a secret formula that threatens British

Imperial power. After a daring chase across the globe, they have brought the secret to Westralia. Here, much of Australia is simply too hot to be habitable by day. People are nocturnal, living underground and working outside at night. To cross the deserts they use burrowing machines know as "steam moles."

With the Cuttlefish out of action, her crew takes jobs on these submarine-like craft. Duke Malcolm, of the Imperial Security Service, transports Clara's rebel-father to a prison in Eastern Australia, hoping to bait her into attempting a rescue. Clara looks to Tim for help, only to find he has fled a racist incident into the desert. She takes a steam mole in search of him. The two head to Eastern Australia, where they discover an invading force with plans to take Westralia. Forced to survive in the desert, they encounter the intolerance meted out to the aboriginal people. Can they save Westralia from falling under British rule? And should they?" **Post-Hindu India** Kancha Ilaiah 2009-11-17 Kancha Ilaiah, the author of

the best selling book *Why I am Not a Hindu*, pens a thought-provoking critique of Brahmanism and the caste system in India, while anticipating the death of Hinduism as a direct consequence of, what he says is, its anti-scientific and anti-nationalistic stand. This work challenges Hinduism's interpretation of history, with a virulent attack on caste politics, and also takes a refreshing look at the necessity of encouraging indigenous scientific thought for the sake of national progress. It establishes Hinduism as a `backward` religion that suppresses the latent scientific and productive potential of the Dalit-Bahujan communities. The author says this oppressive system of spiritual fascism is detrimental to both the future of

religion and the nation-state. He thus criticizes the idea of spiritual justice or varnadharma, used to justify the caste system, as rooted in spiritual inequality. On a micro-analytical level, it is based on a thorough study of the productive knowledge systems of the Dalit-Bahujan communities of Andhra Pradesh, and provides a detailed day-to-day analysis of the scientific technological processes and events at work in the life of a member of these communities. On a macro level, it shows how Hinduism fails to negotiate between faith and reason, unlike other major religions of the world. Kancha Ilaiah critiques the intellectual imagination of the dominant communities and inspires the marginalized. In the

process of doing so he crafts a work of immense socio-political interest which appeals to academics, and also to all those who are concerned about contemporary India's polity and social fabric.

of the soul is a principle that is central to understanding Islamic spirituality but despite this, relatively little has been written explicitly in the Islamic tradition regarding this discrete method of spiritual purification. This book examines the work of a scholar of this discipline, al-Hārith al-Muhāsibī, who lived and worked during the classical Islamic period under the Abbāsids.

Although al-Muhāsibī was well known for his skills in many disciplines, including the Qur'ān, Prophetic narration and scholastic theology, it is his

mastery in the field of Islamic spirituality and moral psychology for which he is best remembered. Assessing the extent to which the political, social and economic factors played a part in his life and work, Gavin Picken provides a comprehensive overview of his work and its great significance in the development of Islamic spirituality. Reconstructing his life in chronological order and providing the most comprehensive appraisal of his works to date, it explores a facet of al-Muhāsibī's teaching which as yet has not been studied, namely his understanding, concept and methodology regarding the purification of the soul within the Islamic paradigm. As such, it will be of great interest not only to researchers and students of Sufism but also to

scholars of comparative spirituality and mysticism.

Love, in Spanish Karina Halle 2014 The companion to the highly emotional, scandalous and USA Today Bestselling love story - Love, in English - is finally here! LOVE, IN SPANISH is a sequel about 60K words, told from Mateo Casalles' POV. This is not a "rehash" of LIE and is instead a whole new story about Mateo and

Vera on their quest to a happily-ever-after."She sat beside me on the bus and she changed my whole life."Successful, wealthy and absurdly handsome Spanish ex-football player Mateo Casalles seemed like he had it all. A high-society wife, an adorable little girl, and flashy apartments in Madrid and Barcelona only sweetened the deal. But there was more to Mateo than met the eye a life of uncertainty and regret that colored his black and white world. That was until Vera Miles came into his life like a shooting star. Tattooed, wild and young, Vera seemed like Mateo's polar opposite at first. But you can't choose who you fall in love with and the two lost souls did everything they could to be together, all while suffering the grave consequences. Now with

Mateo divorced and living in Madrid with Vera, there is a whole new set of challenges and setbacks facing the couple and rocking the foundation of their star-crossed relationship. Unfortunately for them, the brighter the star, the faster they burn.

*How We Reason* Philip Johnson-Laird 2008-10-23

Good reasoning can lead to success; bad reasoning can lead to catastrophe. Yet, it's not obvious how we reason, and why we make mistakes - so much of our mental life goes on outside our awareness. In recent years huge strides have been made into developing a scientific understanding of reasoning. This new book by one of the pioneers of the field, Philip Johnson-Laird, looks at the mental processes that underlie our reasoning. It

provides the most accessible account yet of the science of reasoning. We can all reason from our childhood onwards - but how? 'How we reason' outlines a bold approach to understanding reasoning. According to this approach, we don't rely on the laws of logic or probability - we reason by thinking about what's possible, we reason by seeing what is common to the possibilities. As the book shows, this approach can answer many of the questions about how we reason, and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl. It shows why our irrational fears may become psychological illnesses, why terrorists develop 'crazy' ideologies, and how we can act in order to improve our reasoning. The book ends

by looking at the role of reasoning in three extraordinary case histories: the Wright brothers' use of analogies in inventing their flyer, the cryptanalysts' deductions in breaking the German's Enigma code in World War II, and Dr. John Snow's inductive reasoning in discovering how cholera spread from one person to another. Accessible, stimulating, and controversial, How we Reason presents a bold new approach to understanding one of the most intriguing facets of being human. *Seduced by Logic* Robyn Arianrhod 2012-10-01 Newton's explanation of the natural law of universal gravity shattered the way mankind perceived the universe, and hence it was not immediately embraced. After all, how can anyone warm to a force that cannot be

seen or touched? But for two women, separated by time and space but joined in their passion for Newtonian physics, the intellectual power of that force drove them to great achievements. Brilliant, determined, and almost entirely self-taught, they dedicated their lives to explaining and disseminating Newton's discoveries. Robyn Arianrhod's *Seduced by Logic* tells the story of Emilie du Chatelet and Mary Somerville, who, despite living a century apart, were connected by their love for mathematics and their places at the heart of the most advanced scientific society of their age. When Newton published his revolutionary theory of gravity, in his monumental *Principia* of 1687, most of his Continental peers rejected it for its

reliance on physical observation and mathematical insight instead of religious or metaphysical hypotheses. But the brilliant French aristocrat and intellectual Emilie du Chatelet and some of her early eighteenth-century Enlightenment colleagues--including her lover, Voltaire--realized the *Principia* had changed everything, marking the beginning of theoretical science as a predictive, quantitative, and secular discipline. Emilie devoted herself to furthering Newton's ideas in France, and her translation of the *Principia* is still the accepted French version of this groundbreaking work. Almost a century later, in Scotland, Mary Somerville taught herself mathematics and rose from genteel poverty to become a world authority on

Newtonian physics. She was f?ted by the famous French Newtonian, Pierre Simon Laplace, whose six-volume *Celestial Mechanics* was considered the greatest intellectual achievement since the *Principia*. Laplace's work was the basis of Mary's first book, *Mechanism of the Heavens*; it is a bittersweet irony that this book, written by a woman denied entry to university because of her gender, remained an advanced university astronomy text for the next century. Combining biography, history, and popular science, *Seduced by Logic* not only reveals the fascinating story of two incredibly talented women, but also brings to life a period of dramatic political and scientific change. With lucidity and skill, Arianrhod explains the science behind the story, and explores -

through the lives of her protagonists - the intimate links between the unfolding Newtonian revolution and the development of intellectual and political liberty.

Anthony Powell's universally acclaimed epic *A Dance to the Music of Time* offers a matchless panorama of twentieth-century London. century twist: they're available only as e-books. The ninth volume, *The Military Philosophers* (1968), takes the series through the end of the war. Nick has found a place, reasonably tolerable by army standards, as an assistant liaison with foreign governments in exile. But like the rest of his countrymen, he is weary of life in uniform and looking ahead to peacetime. Until then, however, the fortunes of war continue to be unpredictable: more names are cruelly added to the bill of mortality, while other old friends and foes prosper. Widmerpool becomes dangerously entranced by the beautiful, fascinating, and vicious Pamela Flitton; and Nick's old flame Jean Duport makes a surprising reappearance. Elegiac and moving, but never

without wit and perception, this volume wraps up Powell's unsurpassed treatment of England's finest yet most costly hour.

"Anthony Powell is the best living English novelist by far. His admirers are addicts, let us face it, held in thrall by a magician."--Chicago Tribune "A book which creates a world and explores it in depth, which ponders changing relationships and values, which creates brilliantly living and diverse characters and then watches them grow and change in their milieu.

. . . Powell's world is as large and as complex as Proust's."--Elizabeth Janeway, New York Times "One of the most important works of fiction since the Second World War. . . . The novel looked, as it began, something like a comedy of manners, then

for a while, like a tragedy of manners; now like a vastly entertaining, deeply melancholy, yet somehow courageous statement about human experience."--Naomi Bliven, *New Yorker* "The most brilliant and penetrating novelist we have."--Kingsley Amis *Cold Copper* Devon Monk 2015-07-07 In the Steampunk America of the 1800's, where strange creatures, machines and magic all aim to claim some scrap of land and sky, Ceder Hunt, a cursed bounty hunter who is also a werewolf, must fight to hold on to what is left of his humanity. Sent on a mission to track down all the pieces of a deadly weapon, he lands in a town where no one is safe from the mythical creatures who hunt there. A glorious mix of steampunk, sci-fi and Western.
