Concepts of Biology Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage

found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

The Future of Nursing Institute of Medicine 2011-02-08 The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of

practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Preventing Tobacco Use Among Youth and Young Adults United States. Public Health Service. Office of the Surgeon General 2012 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT --

OVERSTOCK SALE -- Significantly reduced list price This Surgeon General's Report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco. This three volume set includes the following items: A booklet containing highlights from the 2012 Surgeon General's report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 26. This booklet provides an overview of tobacco use within this targeted age group. The second booklet is an Executive Summary with two messages. One message from for Kathleen Sebelius, Secretary of Health and Human Services and a second message from Howard Koh, Assistant Secretary of Health and contains a brief introduction to the set and summary and conclusions for each chapter contained in the final volume. The final volume contains over 800 pages of documentation, interwoven with text and data addressing the adverse health consequences of tobacco use by children and young adults. It includes research on a variety of topics, including nicotine addiction, trends in cigarette smoking among young adults, trends in smokeless tobacco use and cigar smoking over time, genetic factors in tobacco use among youth, and mass media influence on smoking to this age group to name a few. This third volume is rich with table data research findings to support the Surgeon General's concerns with America's use and tobacco. Palestine Speaks Cate Malek 2014-11-11 The occupation of the West Bank and Gaza has been one of the world's most widely reported yet least understood human rights crises for over four decades. In this oral history collection, men and women from Palestine—including a fisherman, a settlement administrator, and a marathon runner—describe in their own words how their lives have been shaped by the historic crisis. Other narrators include: ABEER, a young journalist from Gaza City who launched her career by covering bombing raids on the Gaza Strip. IBTISAM, the director of a multi-faith children's center in the West Bank whose dream of starting a similar center in Gaza has so far been hindered by border closures. GHASSAN, an Arab-Christian physics professor and activist from Bethlehem who co-founded the International Solidarity Movement.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation

Christopher B. Field 2012-05-28
This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate

events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Evaluation in Health Promotion Irving Rootman 2001
This book is the result of the WHO European Working Group on Health Promotion Evaluation which examined the current range of qualitative and quantitative evaluation methods to provide guidance to policy-makers and practitioners. It includes an extensive chapter on *Organizational Culture and Leadership* Edgar H. Schein 2010-07-16
Regarded as one of the most influential management books of all time, this fourth edition of *Leadership and Organizational Culture* transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

Learning to be Edgar Faure 1972-01-01
The State of the World's Land and Water Resources for Food and Agriculture Food and Agriculture Organization of the United Nations 2013-06-17
The State of the World's Land and Water Resources for Food and Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience

on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.

The Fourth Industrial Revolution Klaus Schwab 2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from

supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Project Management Harold Kerzner 2009-04-03 The landmark project management reference, now in a new edition Now in a Tenth Edition, this industry-leading project management "bible" aligns its streamlined approach to the latest release of the Project Management Institute's Project Management Body of Knowledge (PMI®'s PMBOK® Guide), the new mandatory source of training for the Project Management Professional (PMP®) Certification Exam. From the intricate framework of organizational behavior and structure that can determine project success to the planning, scheduling, and controlling processes vital to effective project management, the new edition thoroughly covers every key component of the subject. This Tenth Edition features: New sections on scope changes, exiting a project, collective belief, and managing virtual teams More than twenty-five case studies, including a new case on the Iridium Project covering all aspects of project

management 400 discussion questions More than 125 multiple-choice questions (PMI, PMBOK, PMP, and Project Management Professional are registered marks of the Project Management Institute, Inc.)

State of the World's Indigenous Peoples United Nations. Department of Economic and Social Affairs 2009 While indigenous peoples make up around 370 million of the world's population - some 5 per cent - they constitute around one-third of the world's 900 million extremely poor rural people. Every day, indigenous communities all over the world face issues of violence and brutality. Indigenous peoples are stewards of some of the most biologically diverse areas of the globe, and their biological and cultural wealth has allowed indigenous peoples to gather a wealth of traditional knowledge which is of immense value to all humankind. The publication discusses many of the issues addressed by the Declaration on the Rights of Indigenous Peoples and is a cooperative effort of independent experts working with the Secretariat of the Permanent Forum on Indigenous Issues. It covers poverty and well-being, culture, environment, contemporary education, health, human rights, and includes a chapter on emerging issues.

World Economic Situation and Prospects

2020 United Nations 2020-01-16 This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

Poor Economics Abhijit Banerjee 2012-03-27 The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the *Wall Street Journal*, the book offers a radical rethinking of the

economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

Homelessness, Health, and Human Needs Institute of Medicine 1988-02-01 There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

An Introduction to Sociology Anthony Giddens 2000-04-01

Diet, Nutrition, and the Prevention of Chronic Diseases World Health Organization 2003-04-22 Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke, cancer dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

National Education Technology Plan Arthur P. Hershaft 2011 Education is the key to America's economic growth and prosperity and to our ability to compete in the global economy. It is the path to higher earning power for Americans and is necessary for our democracy to work. It fosters the cross-border, cross-cultural collaboration

required to solve the most challenging problems of our time. The National Education Technology Plan 2010 calls for revolutionary transformation. Specifically, we must embrace innovation and technology which is at the core of virtually every aspect of our daily lives and work. This book explores the National Education Technology Plan which presents a model of learning powered by technology, with goals and recommendations in five essential areas: learning, assessment, teaching, infrastructure and productivity.

Global Economic Prospects, June 2021 World Bank 2021-08-03 The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

Measuring Productivity - OECD Manual Measurement of Aggregate and Industry-level Productivity Growth OECD 2001-07-16 This manual presents the theoretical foundations to productivity measurement, and discusses implementation and measurement issues.

Good Strategy/Bad Strategy Richard Rumelt 2011-06-09 When Richard Rumelt's Good Strategy/Bad Strategy was published in 2011, it immediately struck a chord, calling out as bad strategy the mish-mash of pop culture, motivational slogans and business buzz speak so often and misleadingly masquerading as the real thing. Since then, his original and pragmatic ideas have won fans around the world and continue to help readers to recognise and avoid the elements of bad strategy and adopt good,

action-oriented strategies that honestly acknowledge the challenges being faced and offer straightforward approaches to overcoming them. Strategy should not be equated with ambition, leadership, vision or planning; rather, it is coherent action backed by an argument. For Rumelt, the heart of good strategy is insight into the hidden power in any situation, and into an appropriate response - whether launching a new product, fighting a war or putting a man on the moon. Drawing on examples of the good and the bad from across all sectors and all ages, he shows how this insight can be cultivated with a wide variety of tools that lead to better thinking and better strategy, strategy that cuts through the hype and gets results.

Investing in Cultural Diversity and Intercultural Dialogue Unesco 2009-01-01 This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Political Crises, Social Conflict and Economic Development Andrés Solimano 2005-01-01 Political Crises, Social Conflict and Economic Development is a rare attempt to undertake comparative political economy analysis of the Andean region and thus represents a welcome contribution. . . It is clearly written and will engage scholars interested in Latin America from a wide range of disciplines. Jonathan di John, Journal of Agrarian Change This collection of essays on the political economy of the Andean region goes to the heart of the struggle these smaller economies face in completing crucial reforms and achieving higher growth. Andrés Solimano has brought together the best and the brightest talent from each country, the result being the most compelling analysis ever of how enclave development and a historical dependence on primary exports renders these countries distinctly Andean. As the essays argue, the political solutions and economic remedies must address this phenomenon, rather than mimicking those strategies of the larger emerging market

countries in the region. Carol Wise, University of Southern California, US The contributors to this authoritative volume analyze the impact of political crises and social conflict on economic performance in the Andean region of Latin America. The blend of theory and case studies is also relevant for understanding other complex societies in the developing world and transition economies. The book provides illuminating insights on how to understand, and survive, the complicated interactions between volatile politics, unstable democracies, violence, social inequality and uneven economic performance. Recent political economy theories are combined with valuable quantitative and qualitative information on presidential crises, breakdowns of democracy, constitutional reforms, quality of institutions, and social inequality and exclusion to understand actual country realities. Part I provides the conceptual framework and a regional perspective of the book. Part II contains five political economy country studies Bolivia, Colombia, Ecuador, Peru and Venezuela written

by leading scholars in the field and former senior policymakers, including a former President. Together, the chapters highlight the detrimental effects of political instability and social conflict on economic growth and stability, as well as the feedback effects from poor economic performance on political instability and institutional fragility. The country studies warn that narrow economic reforms that do not pay adequate attention to politics, institutions and social structures are bound to fail in bringing lasting prosperity and stability to complex societies. Examining new and rich information on episodes of political turmoil, military interventions, forced presidential resignations, constitutional reforms and social uprisings, this book will be required reading for all those interested in the interface of politics and economic development.
