Re-imagining Economic Sociology Patrik Aspers 2015 The purpose of this book is to explore new developments in the field of economic sociology. It contains cutting-edge theoretical discussions by some of the world's leading economic sociologists, with chapters on topics such as the economic convention, relational sociology, economic identity, economy and law, economic networks and institutions. The book is distinctive in a number of ways. First, it focuses on theoretical contributions, by pulling together and extending what the contributors believe to be the most important theoretical innovations within their own particular areas of the field. Second, there are contributions by leading economic sociologists from both the US and Europe, which gives the book both wider scope and appeal, while also creating the opportunity for some interesting dialogue between distinct theoretical traditions. The book will be of interest to researchers, Ph.D. students, and advanced students on both side of the Atlantic, and indispensable in advanced economic sociology courses.

Knowledge and the City Francisco Javier Carrillo 2014-08-01 This book underlines the growing importance of knowledge for the competitiveness of cities and their regions. Examining the role of knowledge - in its economic, socio-cultural, spatial and institutional forms - for urban and regional development, identifying the preconditions for innovative use of urban and regional knowledge assets and resources, and developing new methods to evaluate the performance and potential of knowledge-based urban and regional development, the book provides an in-depth and comprehensive understanding of both theoretical and practical aspects of knowledge-based development and its implications and prospects for cities and regions.

The European Union's Influence in Central Asia Olga Alinda Spaiser 2015-03-12 This study examines the role of the European Union in Central Asian affairs. The author analyzes the various ways the European Union exerts influence in a region where other global powers have dominant positions and emphasizes the Central Asian states themselves as subjects and actors.

Clean, Green and Responsible? Gabriel Eweje 2019-07-22 New Zealand and Australia are broadly considered to be countries in which sustainability and responsibility discourses are being pursued by governments and business alike, and in which incentives and initiatives are helping confront and overcome sustainability-related challenges. This book takes a closer look behind and beyond the marketing mantras of both Australia's and New Zealand's "clean and green" campaigns and, on the basis of representative examples and cases, critically evaluates the status quo. The book assesses the effectiveness of sustainability and responsibility models with a focus on the South Pacific and argues that the ways in which issues have been dealt with in this more closely defined geographical region are most likely a good indicator of how similar issues are (or soon will be) dealt with around the globe. As such, the book offers a rich source of cases on sustainability and responsibility in the business arena, a critical review, and an inspirational affirmation of responsible business practice.

Fredmund Malik 2013-04 This book describes Malik's strategic solutions for the Revolutions of the New World, which are already underway. They are part of the Great Transformation 21 which the author will address in the book. In the six parts of this book, he will first look at the dynamics of the Great Transformation 21, its inherent risks of crisis and its opportunities, as well as the labor pains that the New World is suffering. After that, he will deal with the amazingly effective cybernetic systems for strategic navigation and the strategy maps required for that, as well as the empirical quantification of businesses, both existing and yet unknown, which will help break the new territory of innovation. Finally, Malik will reveal the patterns that the tidal currents of great transformations invariably follow, as well as the economic dynamics resulting from them and the strategies required to deal with them. In the last part of the book he will describe the revolutionary new methods that enable us to master groundbreaking strategic change with great precision and unprecedented time compression - at the "speed of light", so to speak. This way, even enormous corporate growth and size can be managed and turned into true strengths, with perfect ease and using innovative approaches where conventional approaches have proven useless.
