In company. Elementary : [Student's book with self-study CD-ROM] Simon Clarke 2007 Anna Freud, Melanie Klein, and the Psychoanalysis of Children and Adolescents Alex Holder 2018-03-26 The central theme of this book is concerned with the controversies on technique between Anna Freud and Melanie Klein in the 1920s and 1930s, and with a clear differentiation between child analysis proper and analytical child psychotherapy. Alex Holder takes into account the historic background in which child psychoanalysis developed, especially World War II and the Nazi regime in Germany. The author also looks at the way child psychoanalysis developed in specific institutions, such as the Hampstead Child Therapy Course in London, and in specific areas, such as the spread of child analysis in the US. The concluding chapter is on the importance of knowledge of child analysis among psychoanalysts working with adults. The differences in the theories of the two "greats" in child analysis, Anna Freud and Melanie Klein, are examined one by one, including such concepts as the role of transference, the Oedipus complex and the superego.

This book answers more vital questions about Christianity than any other book. The Namesake 2013-02-18 Seven of us, students, sat one evening in Hartwell’s studio on the Boulevard St. Michel. We were all fellow-countrymen; one from New Hampshire, one from Colorado, another from Nevada, several from the farm lands of the Middle West, and I myself from California. Lyon Hartwell, though born abroad, was simply, as every one knew, “from America.” He seemed, almost more than any other one living man, to mean all of it—from ocean to ocean. When he was in Paris, his studio was always open to the seven of us who were there that evening, and we intruded upon his leisure as often as we thought permissible. Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing. “Parentology is such a brilliant, jaw-droppingly funny, and full of wisdom…bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on sitcoms. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improve educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smart kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time. Conley also explores international marriage and polygamy, how to resist powerful beliefs, and even how to manage kids’ sleep. The Accidental Administrator Don R. Tiger Country was premiered at Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014. Violence and Mental Health Jutta Lindert 2015-02-25 Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities and cities, both in the North and the South. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health. I am giving them a pledge to do their work for good, and I am giving them some of the tools they need to accomplish their goals.This book is hard. It takes you through a variety of activities, questions, stories and challenges (even puzzles and poems) working both the right and left side of your brain and all the parts in between. The activities I propose are challenging and sometimes even embarrassing. The questions I ask are probing and provoking. The stories I tell are used as examples to guide you toward what I call Startup Heroism. So, why would you read this book? Well, I have worked for 30 years for entrepreneurs. I have supported, funded and coached Startup Heroes all my working life. And I have tested the concepts of this book on the students at Draper University and they have come out to be some of the most interesting, dynamic, and motivated people the world has ever seen. In fact, we have had about 1000 students from over 60 different countries come through the program at this writing, and they have started more than 300 companies! I wrote this book so that some of the thinking that I applied to Draper University could be spread wider, in hopes that these messages would reach other potential Startup Heroes (maybe you) who might make an impact on the world, be proactive about their work, or at the very least, improve their lives.So, I implore you.
