Academic Literacy Development Laura-Mihaela Muresan 2021-03-11 This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Cambridge International AS and A Level Economics Second Edition Peter Smith 2021-05-28 Endorsed by Cambridge International to support the full syllabus for examination from 2023. Build strong subject knowledge and skills and an international outlook with author guidance and in-depth coverage of the revised Cambridge International AS & A Level Economics syllabus (9708). - Understand how the key concepts relate to real-life contexts with numerous case studies and examples from economies around the world. - Build confidence with opportunities to check understanding and tackle exam-style questions. - Ensure a thorough understanding with synoptic links that encourage students to apply their knowledge across different elements of the course. - Master the vocabulary needed to critically assess with key terms and concepts defined throughout, especially helpful for those whose first language is not English. - Develop quantitative skills with opportunities to interpret data throughout. - Maximise potential with study tips in each chapter that cover tricky concepts and provide advice on how to apply skills.

Dr Korczak's Example David Greig 2004-05 Set in the final, numbered, days of an orphanage in the Warsaw ghetto in 1942, this play is based on real events. It's 'alienation' device of depicting its characters through the use of dolls, further enhances our painful feeling of powerlessness. Yet, in spite of its tragic outcome, it leaves us uplifted by the power of love.

Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.

Tourism and Hospitality Studies Irfan Yazicioglu 2020-12-16 This book discusses "tourism and hospitality" from different perspectives and disciplines. In addition, this book, considering the tourism and hotel management terminology, is expected to be a source book for the theoretical and practical scientific studies in the fields which is in close relationship such as gastronomy, recreation and marketing.

U.G.C.-NET/JRF/SET Teaching & Research Aptitude (General Paper-I) Dr. Lal 2010-09

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

IB Economics Answer Book (Tried & Tested) Standard & Higher Level Dipak Khimji 2016-04-15 Tried and tested at the International School of Geneva, this answer book to the IB Economics Workbook (tried & tested) provides all the answers to all of the questions, including evaluation. Some of these questions were used in the PISA 2000, 2003 and 2006 surveys and others were used in developing and trying out the assessment.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Contemporary Economic Issues H. Wolf 2016-07-27 This volume contains chapters on a range of topics which include economic methodology in macroeconomics, central bank independence, policy signalling, public policy as second best analysis, the determinants of economic growth, a continuum approach to unemployment policy, and pensions. The volume dispels the notion that these are largely unrelated issues and illustrates the merger process which is taking place between hitherto rather separate economic sub-disciplines. They move the focus of attention and challenge received wisdom.

Learning for Success : Skills and Strategies for Canadian Students Joan Fleet 1990 This book presents a comprehensive, systematic approach to the development of learning strategies.

A Taxonomy for Learning, Teaching, and Assessing Benjamin Samuel Bloom 2001 This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Bulletin of the Atomic Scientists 1988-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Public Examinations Examined Thomas Kellaghan 2019-11-19 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog.?" Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings.?" Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.?" Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Pitman's Journal of Commercial Education 1915

Cape Economics Dave Ramsingh 2017-02-09 This CAPE Economics Multiple Choice Practice book is an invaluable exam preparation aid for CAPE Economics students. This book provides excellent practice for the multiple choice questions from Paper 1 of the CAPE examination, and has been specially written to help CAPE Economics students improve their Paper 1 exam score.

Mastering Import and Export Management Thomas Cook 2012-03-21 With billions of dollars generated annually, importing and exporting is a potentially lucrative arena for growth—and a bewildering tangle of rules and regulations. Packed with hundreds of cost-effective strategies, ready-to-use forms, and valuable checklists, the second edition of Mastering Import & Export Management explains how to efficiently—and legally—navigate the complex world of international trade. From the big picture of pinpointing the best markets to the nitty-gritty of packing a container, this sweeping guide examines how to spot potential risks, apply quality control procedures, prepare documentation accurately, and more. This revised and updated edition addresses how best to handle recent crises like the earthquakes and tsunami in Japan, the economic downturn, or political instability in countries like Egypt, Tunisia, Bahrain, and Libya. It also covers every new compliance and security regulation, as well as evolving best practices, including: • C-TPAT guidelines • Incoterms • In-house compliance programs • Freight cost-reduction tips • Beefed-up TSA regulations • Improved technology options • President Obama's new export initiatives. It's an indispensable resource for today's complex and changing global marketplace.
