Practice Guideline for the Treatment of Patients with Schizophrenia American Psychiatric Association 1997 Developed by experts on schizophrenia and exhaustively and exhaustively by APA members, the "American Psychiatric Association Practice Guideline for the Treatment of Patients with Schizophrenia" provides therapists with a set of patient care strategies that will aid their clinical decision making. The guideline describes the best and most appropriate treatments available for persons with schizophrenia, including psychopharmacological treatments, ICT, and psychosocial and community-based interventions. It delineates the process of treatment planning and identifies areas in which research may improve our understanding of this condition. This guideline has also helped managed care organizations develop more scientifically based and clinically sensitive criteria for the utilization and reimbursement of psychiatric services. Armed with these guidelines, clinicians can improve the care of their patients with schizophrenia and enable them to lead happier and more productive lives.

Preventing Tobacco Use Among Young and Young Adults United States. Public Health Service. Office of the Surgeon General. The Surgeon General's Report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco. This volume also includes the following items: A report containing highlights from the 2012 Surgeon General's report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 26. This booklet provides an overview of tobacco use within this targeted age group. The second booklet is an Executive Summary with two messages. One message is from Karen Sebelius, Secretary of Health and Human Services and a second message from Howard Koh, Assistant Secretary of Health and Human Services. This report highlights the findings contained in the final volume. The final volume contains over 800 pages of documentation, interwoven with text and data addressing the adverse health consequences of tobacco use. Tobacco is a leading cause of death, disease, and disability in the United States. Tobacco use is a major contributor to a number of health problems, including lung cancer, heart disease, stroke, and other chronic diseases. The use of tobacco products among young people is a critical public health issue. The Surgeon General's report, "Preventing Tobacco Use Among Young and Young Adults," provides a comprehensive overview of the findings and recommendations of this report.

Freedom in the World 2015-2016 reveals the continuing challenges of freedom in the world today. The Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The report ranks all countries in the world based on key indicators of political rights and civil liberties. This year, we see a continued decline in freedom around the world, as the world's most prominent leaders, and arguably the movement's founder, Lucian L. Leape, MD. Covering the growth of the field from its origins in the late 1960s and early 1970s to the present, the editors include a variety of professionals who have contributed to the development of systems thinking. The Art of Software Security Assessment Mark Dowd 2006-11-20 The Definitive Insider's Guide to Auditing Software Security Mark Dowd and Anthony Voss. The authors are leading security consultants and researchers who have personally uncovered vulnerabilities in applications and systems that would cause employees to stare at each other in disbelief. They know the power of a vulnerability and how it can dramatically alter the course of events. This book introduces a start-to-finish methodology for "ripping apart" applications to reveal even previously undetected vulnerabilities. The authors cover a full range of software vulnerabilities in both UNIX/Linux and Windows environments. It demonstrates how to audit application security in all sizes and functions, including network and Web software. Moreover, it teaches how to employ software frameworks and audit tools and the related software for analyzing vulnerabilities. The book is packed with case studies, examples, and clear, concise explanations that help you identify and audit software security vulnerabilities. The book includes coverage of modern application vulnerabilities, including code auditing: theory, practice, proven methodologies, and secrets of the trade - Bridging the gap between secure software development and network security, including software application lifecycles - Software testing and operational review - Identifying vulnerabilities related to memory management, data types, and malformed data - UNIX/Linux software vulnerabilities: code auditing, fuzzing, network security, and operational security - Auditing interprocess communication, synchronization, and state - Evaluating network software - IP packets, firewalls, and stateful firewalls. Overview: MELQO UNESCO 2017-08-14 The Measuring Early Learning Quality and Outcomes (MELQO) initiative began in 2014 as a response to international calls to strengthen early childhood development (ECD) policies and practices for high- and middle-income countries (HICs). The initiative aims to ensure that preschool education is accessible to all children, regardless of their background, and to provide high-quality programs that are designed to meet the needs of children from diverse backgrounds. As a result, the initiative has developed a comprehensive approach to measuring ECD, which includes a set of tools to create a consistent framework for measuring ECD outcomes in different contexts. The MELQO framework includes indicators that are directly related to children's learning outcomes and development, and that can be used to assess the quality of preschool programs and services. The framework also includes indicators that are related to the context in which preschool education is delivered, such as the availability of resources and the quality of teacher training. The MELQO framework is designed to be flexible and adaptable, allowing countries to tailor the indicators to their specific needs and priorities. In 2017, the MELQO initiative was expanded to include low- and middle-income countries (LMICs), with the aim of providing a common standard for measuring early childhood learning and development in LMICs. The MELQO framework is designed to be used by governments, educators, and other stakeholders to assess the quality of preschool programs and services, and to inform policy decisions and program improvements. The MELQO framework is also designed to be used by researchers and organizations that work in the field of early childhood development, to assess the effectiveness of policies and programs, and to evaluate the impact of interventions.
