Physical Studies of Minor Planets Tom Gehrels 1971 ... Some papers and discussions included in this book even though they were not presented at the meeting. In some respects, therefore, the book is independent of the colloquium. Several papers had been invited long beforehand with the request to publish them as review papers. The lack of a modern textbook on minor planets is keenly felt, and the proceedings of this meeting, with these additions, should provide a good real fuel that the fossil fuels are. In Mortal Combat John Toland 2016-05-31 A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of The Rising Sun and Infamy. Resurrecting Bertha Rob Siegel 2019-09-15 To most people, cars are just appliances to be disposed of when they rust, become unreliable, or are outgrown. But to car people, it’s different. Cars are like photographs that occupy physical space. They hold aromas that trigger memories, and remind us of who we once were. In addition, to some people, the relationship with the car itself is a real thing. Many enthusiasts pine for the cars of their youth, regret that they ever let them go, and yearn and search for them the way people do with old lovers, hoping to find them and rekindle that old spark. In Resurrecting Bertha, Rob Siegel assures you that the car people really do exists, and embarks on this journey himself. Writing in his trademark Hack Mechanic voice that’s enthralled readers for 35 years, Rob describes his original eight-year relationship with his highly-modified 1975 BMW 2002 “Bertha,” selling the car to a dear friend, its 26 years of storage, and buying it back in a weak whisky-soaked moment that he knew he’d regret when he raises the long-closed garage door and comes face-to-face with the badly deteriorated car. The book details the steps Rob went through to get the car running, then driving, then sufficiently sorted to make a 2000-mile drive, and how the reconnection with the car was so much deeper than he expected. Resurrecting Bertha is about more than just the nuts and bolts; it’s about deciding what’s important, the joy of doing good, and how, if you do it right, not only can you go home again, but you can do so in the same car.

School Psychology and Social Justice David Shriberg 2013-01-17 School psychology practice does not exist in a vacuum and is not value-neutral. Culled from years of experience by experts working in a vast array of applied environments and appropriate both for practitioners and for graduate courses in multicultural school psychology and/or the role and function of school psychologists, this book takes a critical approach to the utilization of school psychologists and the functions through the lens of social justice. Utilizing case examples and concrete suggestions, a critical yet hopeful vision of ways in which school psychologists can work to achieve positive outcomes for students, families, schools, and society is provided.

The Economics of Austerity Suzanne J. Konzelmann 2014 Through her judicious selection of previously published material, Dr Konzelmann investigates the key social, political and financial developments that have shaped the evolution of austerity economics. These include the early classical debates, the politicization of austerity, the Keynesian challenge to existing thought and the revival of pre-Keynesian "Neo-Liberal" ideas during the 1970s. Discussion of the radical changes to economic thought and policy in the decades before the 2007-8 financial crisis and the key dimensions of the post 2007-8 debate bring the account right up to the present day.

He is a product of the savage world he was raised in and prides himself on being cold and cruel. Then someone new to his town catches his eye, someone different than everyone else. Without knowing why he starts to silently stalk him, unaware of where it will lead him.

Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what’s needed to resurrect long-dead air conditioners: cassettes, cards, or even the basic steps for a/c repair. With a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold. A wealth of material that draws from Rob's BMW experience (with specifications for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Whether a/E a/c enters the Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser, the evaporator, experimental a/c, a parallel-flow condenser, and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system, troubleshooting, and other things that heat up the cabin.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom.bound to change your thinking about parenting and its consequences." The book is an engaging and accessible guide to parenthood that is as relevant today as ever. Whether you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blowzed nerd, needed childrearing...
advice, he turned to scientific research to make the big decisions. In
Parentology, Conley hilariously reports the results of those experiments, from
bribing his kids to do math (since studies show conditional cash transfers
improved educational and health outcomes for kids) to teaching them impulse
control by giving them weird names (because evidence shows kids with unique names
learn not to react when their peers tease them) to getting a vasectomy (because
fewer kids in a family mean smarter kids). Conley encourages parents to draw on
the latest data to rear children, if only because that level of engagement with
kids will produce solid and happy ones. Ultimately these experiments are very
loving, and the outcomes are redemptive—even when Conley's sassy kids show him the
limits of his profession. Parentology teaches you everything you need to know
about the latest literature on parenting—with lessons that go down easy. You'll be
laughing and learning at the same time.
