Enteral Feeding Guidelines For Children

If you are an eligible Enteral Feeding Guidelines For Children, please provide your name, as well as your preferred method of feeding. If you require additional information, please email christine.jones@nnuh.nhs.uk.

To enable the guideline to stay relevant, it is envisaged that all of the JBDS guidelines will be updated or reviewed each year. As such these are ‘living’ documents – designed to be updated based on recently published evidence.

When Is Parenteral Nutrition Appropriate?

GUIDELINES Intravenous fluid therapy for adults in hospital

When prescribing IV fluids, remember the five Rs: resuscitation, routine maintenance, replacement, needs cannot be met by oral or enteral routes, and stop as soon as possible. • Skilled and competent healthcare professionals should prescribe and administer IV fluids and assess and monitor patients receiving IV fluids (e.g., WIC-48: Louisiana WIC Medical Request for Formula and/or Supplementary Foods and/or Fruits and/or Vegetables and/or Dairy Products and/or Nonprescription Foods, etc.).

326 Journal of Parenteral and Enteral Nutrition 41(11) 1B: Prior to initiating PN, conduct a full evaluation of the feasibility of using enteral nutrition (EN); reserve PN for clinical situations in which adequate EN is not an option.
