Principle and Practice of Fertilization Rejuvenation (Joules Danner 2011-03-02) The fertility specialist provides patients with care when they are interested in starting or expanding their family. The use of methods and technologies for the treatment of infertility and menopause is driven by increasing numbers of older women who are interested in pregnancy. This chapter provides an overview of the biological and technological principles underlying infertility and the treatment of male and female infertility, as well as the management of common gynecological conditions affecting the fertility of men and women. The author provides an overview of the biology and technology of fertility, followed by discussions on infertility, male infertility, and female infertility.

Recent Advances in Colonoscopy (Preliminary) Precolitis 2012-07-16 Recent Advances in Colonoscopy provides an overview of modern developments in the field of gastroenterology, with a focus on colonoscopy. The book covers the latest advances in colonoscopy technology, including new procedures, equipment, and techniques. The book also covers the latest research on colon cancer and its prevention, as well as the latest developments in endoscopic treatment of colorectal disease. The book is aimed at gastroenterologists, nurses, and other health professionals involved in colonoscopy.

Medical Aspects of Colonoscopy (Krisztina G. Márton 2011-11-08) This book provides an in-depth examination of the medical aspects of colonoscopy, with a focus on the prevention, diagnosis, and treatment of colorectal cancer.

Minimally Invasive Thyroidectomy (Massimo Conio 2008) Endoscopic mucosal resection is a new endotherapy technique that can avoid the need for open surgery in the treatment of superficial gastric/enteric lesions. In this practical ‘how-to’ manual, the authors provide specific, technical guidance on how to perform endoscopic mucosal resection for a wide range of different diagnostic and therapeutic purposes. The authors introduce the concept of endoscopic mucosal resection and provide a comprehensive description of the technique, including its indications, complications, and outcomes. The book also covers the latest advances in the field, with a focus on the use of endoscopic mucosal resection in the treatment of superficial gastric/enteric lesions.

Coping Thought and the Social Environm (Preliminary) John Beynon 2012-12-06 Recent Advances in Colonoscopy provides an overview of modern developments in the field of gastroenterology, with a focus on colonoscopy. The book covers the latest advances in colonoscopy technology, including new procedures, equipment, and techniques. The book also covers the latest research on colon cancer and its prevention, as well as the latest developments in endoscopic treatment of colorectal disease. The book is aimed at gastroenterologists, nurses, and other health professionals involved in colonoscopy.

Building an Inclusive Development Community Karen Kerst-Wicks 2004 *An essential resource for all endoscopy agencies seeking to increase their marketing and patient engagement efforts, this book provides a practical guide to developing and implementing strategies that will help endoscopy agencies and their patients better understand and engage in the endoscopy process.

Gastrointestinal Interventional Endoscopy (Donald A. Carter 2015) This illustrated book that includes tables, charts, and maps primarily discusses the role of USAREUR (US Army Region Europe and Africa) in rearming and training the new German Army which was perhaps the Army's single greatest contribution toward maintaining security in Western Europe.
