Introduction to Financial Mathematics

Kevin J. Hastings 2015-10-21 This book is for a two-semester Introduction to Financial Mathematics course for undergraduates. It focuses on preparing students for the actuarial exam, motivates through a discussion of personal finances and portfolio management and goes on to cover higher level mathematics, such as stochastic calculus and Brownian Motion. The author blends the better topic coverage, examples and exercises from the various available books and also attempts to standardize the course syllabi with a very well-thought and attractive table of contents.

Money Talks Graham Murdock 2015-01-01 Money Talks explores the ways the financial concepts of money and capital are understood and talked about by a range of people, from traders to ordinary investors, and how these accounts are framed and represented across a range of media. This collection brings together leading writers and emerging researchers to demonstrate how work in media and cultural studies can

contribute to debates around the meanings of money, the operations of capital and the nature of the current crisis. Drawing on a range of work from across disciplines, Money Talks offers a provocative and path-breaking demonstration of the value of incorporating approaches from media and cultural studies into an understanding of economic issues.

Introduction to International Commercial and European Law M.W. Mosselman 2015 This book covers the most important legal issues when conducting business abroad. The first part covers European law with a focus on the institutions of the European Union, the four freedoms and competition law. The second part focuses on individual international contracts. This part starts with the legal environment of the business transaction. The political and policy risks of doing business abroad are explained, as well as how they should be addressed. It continues with entry strategies in foreign markets and then goes on to focus on the individual contract of sale. A wide range of subjects are covered, including general conditions of sale, retention of title, the CISG, product safety and product liability, Incoterms, contract of carriage, jurisdiction, choice of law and arbitration, standard contract clauses and payment conditions. This book takes a practical approach and contains examples and exercises. The book does not pretend to be the ultimate guide: the field of international commercial law in particular is vast, and has many different angles. However, it does try to explain the main pitfalls of doing business in foreign countries and how to avoid them.

Introduction to Development Studies

Frik De Beer 2000 Written by Hennie Swanepoel and Frik de Beer (both based in South Africa) this development studies text, first published in 1997, is suitable for all introductory-level courses.

International Tax Michael Honiball 2011-03-15 This book is not merely a new edition, but a complete and significantly expanded rewrite. It comprises over 900 pages of expert and in-depth exposition of this complex subject that has become so important in the modern global economy. Already established over four previous editions as the pre-eminent work on the subject it is a 'must-own book' for all students and practitioners of tax, whether from a legal, business or accounting perspective. Professor Lynette Olivier and Michael Honiball are without peer in their understanding and clarity in this highly specialised field. Five new chapters have been added on: Taxation of individuals; Taxation of Companies and Dividends; Taxation of Partnerships; Cross-border VAT; and Interpretation of Statutes.

Becoming a teacher Josef de Beer 2020-12-31 This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the 'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student

teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open- and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Introduction to Business Information Systems James Norrie 2012-05-16 Most students, regardless of their major, need to understand information systems and technologies and their importance to the success of business organizations. While many of today's students have lived with technology their whole lives, they do not see the connection between what they use every day and what they need

to understand to be successful in the business world. Introduction to Business Information Systems, Third Canadian Edition by James Norrie, Michelle Nanjad and Mark Huber focuses on IT as a source of business value and outlines the innovative technologies, as well as the innovative ways to use technology, that help businesses excel. The goal of this book is to teach students that the effective integration of IS with knowledge can drive the creation of significant business value.

Introduction to Business Information Systems, Third Canadian Edition is written for both the IT and non-IT major. It is written in a friendly, accessible style that will draw students in and engage them with the content. Expanded coverage of highly technical concepts is included in the Technology Core box found in each chapter as well as the Tech Guides.

Introduction to Design Patterns in C++ with Qt Alan Ezust 2011-08-29 Master C++ "The Qt Way" with Modern Design Patterns and Efficient Reuse This fully updated, classroom-tested book teaches C++ "The Qt Way," emphasizing design patterns and efficient reuse. Readers will master both the C++ language and Qt libraries, as they learn to develop maintainable software with well-defined code layers and simple, reusable classes and functions. Every chapter of this edition has been improved with new content, better organization, or both. Readers will find extensively revised coverage of QObjects, Reflection, Widgets, Main Windows, Models and Views, Databases, Multi-Threaded Programming, and Reflection. This edition introduces the powerful new Qt Creator IDE; presents new multimedia APIs; and offers extended coverage of Qt Designer and C++ Integration. It has been restructured to help readers start writing software immediately and write robust, effective software sooner. The authors introduce several new design patterns, add many quiz questions and labs, and present more efficient solutions relying on new Qt features and best practices. They also provide an up-to-date C++

reference section and a complete application case study. Master C++ keywords, literals, identifiers, declarations, types, and type conversions. Understand classes and objects, organize them, and describe their interrelationships. Learn consistent programming style and naming rules. Use lists, functions, and other essential techniques. Define inheritance relationships to share code and promote reuse. Learn how code libraries are designed, built, and reused. Work with QObject, the base class underlying much of Qt. Build graphical user interfaces with Qt widgets. Use templates to write generic functions and classes. Master advanced reflective programming techniques. Use the Model-View framework to cleanly separate data and GUI classes. Validate input using regular expressions and other techniques. Parse XML data with SAX, DOM, and QDomStreamReader. Master today's most valuable creational and structural design patterns. Create, use, monitor, and debug processes and threads. Access databases with Qt's SQL classes. Manage memory reliably and efficiently. Understand how to effectively manage QThreads and use QtConcurrent algorithms. Click here to obtain supplementary materials for this book.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show

conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Annotation. International Financial Reporting Standards (IFRS) in a business situation can have a significant effect on the financial results and position of a division or an entire business enterprise. 'International Financial Reporting Standards: A Practical Guide' gives private or public sector executives, managers, and financial analysts without a strong background in accounting the tools they need to participate in discussions and decisions on the appropriateness or application of IFRS. Each chapter summarizes an International Financial Reporting Standard, following a consistent structure: • Problems addressed by the IFRS • Scope of the Standard • Key concepts and definitions • Accounting treatment • Presentation and disclosure • Financial analysis and interpretation.

Loose-leaf Version for Microeconomics

Austan Goolsbee 2015-12-03 Like no other text for the intermediate microeconomics course, Goolsbee, Levitt, and Syverson's Microeconomics bridges the gap between today's theory and practice, with a strong empirical dimension that lets students test theory and successfully apply it. With carefully crafted features and vivid examples, Goolsbee, Levitt, and Syverson's text helps answer two critical questions students ask, "Do people and firms really act as theory suggests?" and

"How can someone use microeconomics in a practical way?" The authors teach in economics departments and business schools and are active empirical microeconomics researchers. Their grounding in different areas of empirical research allows them to present the evidence developed in the last 20 years that has tested and refined fundamental theories. Their teaching and professional experiences are reflected in an outstanding presentation of theories and applications.

Law of Persons Trynie Boezaart 2010 "The law of persons is a dynamic area of the law, and it is this dynamic nature that generates interest in this subject and makes it stimulating to teach and learn. Law of Persons seeks to make this subject area accessible to students, including first-year students. In the law of persons, the common law and legislation have been harmonised with the spirit, purport and objects of the Bill of Rights, while the values entrenched in the Constitution are permeating every area of the law. The greatest change in our law of persons to date has been the Children's Act 38 of 2005: it had redefined basic concepts, it has revolutionised the parent-child relationship, it has ended the labelling of children in terms of their parents' marital status and it has radically altered the legal status of unmarried fathers. Law of Persons is also available in Afrikaans, and should ideally be used in conjunction with Personeregbronnebundel / Law of Persons Sourcebook"--Provided by

Academic Literacy Development Laura-Mihaela Muresan 2021-03-11 This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.
