Financial Reporting
under IFRS Wolfgang Dick
2011-02-25 The
International Financial
Reporting Standards are
quite different from
other sets of accounting
standards, and are
fundamentally different
from US-GAAP, in that
they are based on
principles, and not on
detailed rules.
Financial Reporting
under IFRS: A topic-based
approach offers a global
perspective on IFRS by
presenting the
prescribed rationale and
principles and
illustrating them
through numerous
examples from large
international companies.
It aims to develop the
fundamental skills
necessary to read and
use the information
contained in all types

of financial statements,
through examples,
activities, questions
and answers. The book is
broadly divided into
three sections. Section
one examines the
structure of the Balance
Sheet and the Income
Statement, their links
and the accounting
mechanisms used to
prepare them. Section
two deals with the
identification,
evaluation and reporting
of Balance Sheet items.
Section three covers the
use of financial
statements to analyze a
firm's performance and
its risks. Throughout
the book special topics
are covered, including
Derivatives and Hedge
accounting (IAS 39),
Business Combination
(IFRS 3) and Operating
Segments (IFRS 8).
Financial Reporting
under IFRS is ideally
suited to the needs of
students of accounting
and financial reporting,

but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments will benefit from its concise, topic-based approach.

Consolidated Financial Statements in IAS/IFRS and German GAAP - Major Differences Explained

Khanh Pham-Gia 2009-07

Research Paper

(undergraduate) from the year 2008 in the subject Business economics - Business Management, Corporate Governance, grade: 1,3, University of applied sciences, Munich, language: English, abstract: Due to a regulation of the European Union (EU) concerning financial accounting issued on June 6th, 2002, all listed companies in EU are obligated to provide their Consolidated Financial Statements (CFS) in accordance with financial accounting

principles of International Accounting Standards (IAS) or International Financial Reporting Standards (IFRS) from January 1st, 2005. This regulation enables a necessary harmonization of accounting principles within the EU and supports a clear comparability of CFS worldwide. The object of this study is to analyze major differences of CFS in German GAAP and IAS/IFRS. Thereby, variations of both accounting standards are compared and a major difference is explained thoroughly with a concrete example. The major differences of CFS in IAS/IFRS and German GAAP result from different aims of both accounting standards. The German GAAP is strongly based on prudence principle for protection of creditors and authoritative

principle (tax accounting based on commercial accounting). In comparison, the IAS/IFRS deliver potential investors realistic and decision useful information about assets, finance, and profit situations of a company (true and fair view / fair presentation principle). These basic principles could be reflected in several key points of the both accounting standards whose differences are clarified in this study. Furthermore, an essential key point of CFS namely the basis of consolidation (contains enterprises included in the consolidation and capital consolidation methods) is illuminated with a concrete example. Hereby, the relation between the control influence of the parent enterprise on its "sub-entities" and the correspondent capital

consolidation methods are studied.

the creation of new standards; and corporate regulators are increasingly turning to various conceptual frameworks of accounting to guide regulation and the interpretation of accounting practices. The global financial crisis has also led to a new found appreciation of the social, economic and political importance of accounting concepts generally and corporate financial reporting in particular.
