The European Campaign Samuel J. Newland 2011 Since the end of World War II, there has been a stream of publications about the War in Europe, but despite the volume of literature, interest in the subject remains high. Given the significance of this conflict and the interest in this campaign, the Strategic Studies Institute offers a fresh look at the campaign in Europe. This publication begins with an examination of prewar planning for various contingencies, then moves to the origins of “Germany first” in American war planning. The authors then focus on the concept, favored by both George C. Marshall and Dwight D. Eisenhower, that the United States and its Allies had to conduct a cross-channel attack and undertake an offensive aimed at the heartland of Germany. Following the background provided in these initial chapters, the remainder of the book provides a comprehensive discussion outlining how the European Campaign was carried out.

The Last One Standing Paul Shirek 2011-09-06 We are in trouble. Church attendance has dropped, spiritual life in our services has ebbed and we face a serious lack of preparation for the next generation. We must change our thinking is that we have failed to reach or keep our youth. The Sunday school rooms and youth groups of many churches have no real hope or strategy in place to bring them in. Beyond this, dozens of churches close each week never to reopen, while just a few new ones are started. Without any real changes in these areas we will lose our Christian influence in this nation almost entirely in the very near future.Certainly God has not planned for this to happen.

Idyllic No More Giff Johnson 2015-07-11 Can Pacific nations, endowed with islands of travel poster beauty, vibrant cultures, and centuries old ways of life based on sustainable practices, hurdle significant development and political challenges they face today - in addition to withstanding climate change and rising sea levels? Corruption, reliance on donor-driven aid and consultants, dwindling rural populations and burgeoning urban centers that stress the ability of governments to provide education and health services, an epidemic of non-communicable diseases as lifestyles change, and battles with countries outside the region for control of fish, forest, and mineral resources - these are just a few of the increasingly challenging issues facing the islands today. In a series of essays about the looming climate threat, sustainable development and the region's multi-billion dollar tuna industry, the U.S. nuclear test legacy in the Marshall Islands, and the impact of out-migration, 'Idyllic No More' addresses the often difficult problems and choices facing the Pacific islands today.
