How to Build a Computer: The Best Beginner's Guide to Building Your Own PC from Scratch!

This book will show you how to build your own media centre. It breaks down the seemingly complex task of building and configuring the media centre into four fundamental sections: 1. Working out what you need. 2. Building the physical machine. 3. Installing and configuring the software. 4. Adding extra functionality with the power of add-ons and plugins. Note that you might be thinking: "Anything I read in this book is already out of date - technology moves very quickly and computer components are upgraded almost monthly." And you'd be right. So instead of telling you what items and components to use, this book deconstructs component specifications, explains what you should look for when buying computer hardware. It also provides suggestions on which brands to seek out to ensure that your media centre experience is the best it can be. The following sections provide step-by-step instructions on building your very own media centre. This includes the all-important software installation and configuration process. Each step comes with a screen grab so that you can see exactly what is happening - and then compare that with what you are seeing on your very own system, so you can be sure that you are getting it right. When you have finished reading the book, and have followed the instructions, you will have your very own working media centre. It will be able to play all of your digital media.
