Karin H. Kelder 2006-09-01 Study & Master Life Sciences Grade 10

This book presents to students and independent learners a collection of ideas, concepts, techniques, and resources for the teaching of life sciences. The innovative Teacher’s File includes:

- guidance on the teaching of each lesson for the Curriculum and Assessment Policy Statement (CAPS).
- ‘information’ boxes providing interesting additional information and ‘Note’ boxes that bring important information to the learner’s attention.
- ‘Skill questions’ for each of the topics that are banked in the question bank at the end of the module.
- ‘Procedure’ boxes providing step-by-step instructions along with pre-lab assignment, enabling you to easily incorporate lab safety into all your lab courses without building in curricula. Laboratory Safety for Chemistry Students is the ideal solution: Each section can be treated as a module and the content can be presented more than once, progressively building knowledge with new information that’s appropriate at different levels. A Better, Easier Way to Teach and Learn Lab Safety We all know that safety is of utmost importance; however, instructors continue to struggle with finding ways to incorporate safety into their curricula. Laboratory Safety for Chemistry Students is the ideal solution: Each section can be treated as a pre-lab assignment, enabling you to easily incorporate lab safety into all your lab courses without building in additional teaching time. Sections begin with a pre-lab quiz, a pre-lab quiz, and a brief description of a laboratory incident that illustrates the importance of the Safety Box. Sections at the end of each section guide your students to the latest print and web resources. Students will also find “Chemical Connections” that illustrate how chemical principles apply to laboratory safety and “Special Topics” that amplify certain sections by exploring additional, relevant safety issues.
